BAQ Air Permitting Division

Company Name:	New-Indy Catawba LLC	Permit Writer:	Katharine K Buckner
Agency Air Number:	2440-0005	Date:	July 10, 2025
Permit Number:	CP-50000061 v1.2		

DATE APPLICATION RECEIVED: June 27, 2025

PROJECT DESCRIPTION

Condition B.30 of CP-61 requires source testing on a semiannual basis for eight consecutive tests and then two annual tests. A time between testing events was incorrectly specified for semiannual tests as no less than 270 days from previous test and the time between annual tests was not specified.

The time between semiannual tests should have been specified as no less than 120 days from the previous test. The time between annual tests should have been specified as no less than 270 days from the previous test. The language will be updated and added to the third paragraph in condition B.30.

The original language in the third paragraph is:

Semiannual performance tests shall be conducted for the new steam stripper. After completion of eight consecutive semiannual tests, performance testing shall be conducted annually for a period of two years and once every five (5) years thereafter. Semiannual tests shall be conducted no less than 270 days from the previous test. Subsequent performance tests shall be used to verify and/or update the relationship between the operating and monitoring parameters and percent removal of TRS, H₂S, and methanol. Updates to the operating and monitoring plan shall be submitted within 60 days of the performance test.

The update to Condition B.30 will include the following language; changes underlined:

Semiannual performance tests shall be conducted for the new steam stripper. Semiannual tests shall be conducted no less than 120 days from the previous test. After completion of eight consecutive semiannual tests, performance testing shall be conducted annually for a period of two years and once every five (5) years thereafter. Annual tests shall be conducted no less than 270 days from the previous test. Subsequent performance tests shall be used to verify and/or update the relationship between the operating and monitoring parameters and percent removal of TRS, H₂S, and methanol. Updates to the operating and monitoring plan shall be submitted within 60 days of the performance test.

FACILITY DESCRIPTION

SIC CODE: 2611 - Pulp Mills, 2621 – Paper Mills, 2631- Paperboard Mills

NAICS CODE: 322110 – Pulp Mills, 322120 – Paper Mills, 322130 – Paperboard Mills

New-Indy Catawba LLC (New-Indy) operates an integrated pulp and paper mill located in Catawba, South Carolina. The original pulp mill was constructed in 1959. Previously, the facility produced bleached pulp and operated 3 paper machines and one pulp dryer. In 2019, the pulp production was converted from bleached to unbleached and utilized one paper machine and one pulp dryer. A second paper machine at the mill is currently idled. New-Indy Catawba is comprised of seven distinct process areas that include the following: the woodyard area, the kraft pulp mill area, the paper mill area, the chemical recovery area, the utilities area, the waste treatment area, and a miscellaneous area.

OPERATING PERMIT INCORPORATION

A minor permit modification shall be submitted to incorporate this construction permit into the TV operating permit.

Company Name:	New-Indy Catawba LLC	Permit Writer:	Katharine K Buckner
