Notes:

The Qualifiers in this report are defined as follows:

U	U	Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
P	P	Organics--The concentrations between the primary and confirmation columns/detectors is >40% different. For HPLC, the difference is >70%.
J	J	Value is estimated
E	E	Concentration of the target analyte exceeds the instrument calibration range
h	h	Preparation or preservation holding time was exceeded
Q	Q	ISO17025 / NELAC accredited; SC certification not held at time of analysis
B	B	The target analyte was detected in the associated blank.

QC Summary

Workorder: **769625**

Parmname	NOM	Sample	Qual	QC	Units	RPD/D%	REC%	Range	Anlst	Date	Time

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
* Indicates that a Quality Control parameter was not within specifications.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

Technical Case Narrative
GEL Engineering, LLC
SDG #: 769625

GC/MS Volatile

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 2971014

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
769625001	LS-SW-01
769625003	LS-SW-05
769625005	LS-TW-13
769625007	LS-TW-02
769625009	LS-TW-10
769625011	LS-TW-10 DP
1206424674	Laboratory Control Sample (LCS) **Batch 2971014**
1206424675	Laboratory Control Sample (LCS)
1206424676	Method Blank (MB)
1206424677	769603002(NonSDG) Matrix Spike (MS)
1206424678	769603002(NonSDG) Matrix Spike Duplicate (MSD)
1206424679	769603002(NonSDG) Matrix Spike (MS)
1206424680	769603002(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Blank (MB) Statement
Target analytes were detected in the blank (See Below) below the reporting limit. The associated data are qualified accordingly and reported.

Sample	Analyte	Value
1206424676 (MB)	Methylene chloride	1.13 ug/L between (0.5 - 5)

Miscellaneous Information

Manual Integrations
Some initial calibration standards, continuing calibration standards, and/or samples may have required manual integrations due to software limitations.

GC/MS Semivolatile

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3510C/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 2967841

Preparation Method: SW846 3510C
Preparation Procedure: GL-OA-E-013 REV# 37
Preparation Batch: 2967840

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
769625001	LS-SW-01
769625003	LS-SW-05
769625005	LS-TW-13
769625007	LS-TW-02
769625009	LS-TW-10
769625011	LS-TW-10 DP
1206418798	Method Blank (MB) **Batch 2967841**
1206418799	Laboratory Control Sample (LCS)
1206418800	769680001(NonSDG) Matrix Spike (MS)
1206418801	769680001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Surrogate Recoveries

Sample (See Below) did not meet surrogate recovery acceptance criteria. The sample was re-extracted out of holding and passed surrogate recovery acceptance criteria. As the sample results confirmed, the lab reported the in holding results.

Sample	Analyte	Value
769625011 (LS-TW-10 DP)	2, 4, 6-Tribromophenol	27* (28%-113%)
	2-Fluorophenol	13* (15%-72%)
	Phenol-d5	11* (15%-85%)
	p-Terphenyl-d14	12* (20%-118%)

Laboratory Control Sample (LCS) Recovery
The LCS and/or LCSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206418799 (LCS)	Hexachlorocyclopentadiene	28* (31%-64%)

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

GC Semivolatile Pesticide

Product: **Organochlorine Pesticides and Chlorinated Hydrocarbons**
Analytical Method: SW846 3535A/8081B
Analytical Procedure: GL-OA-E-041 REV# 25
Analytical Batch: 2966985

Preparation Method: SW846 3535A
Preparation Procedure: GL-OA-E-070 REV# 15
Preparation Batch: 2966984

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
769625007	LS-TW-02
1206417360	Method Blank (MB) **Batch 2966985**
1206417361	Laboratory Control Sample (LCS)
1206417362	769481001(NonSDG) Matrix Spike (MS)
1206417363	769481001(NonSDG) Matrix Spike Duplicate (MSD)
1206417364	Laboratory Control Sample (LCS)
1206417365	Laboratory Control Sample (LCS)
1206417366	Laboratory Control Sample (LCS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification (CCV) Requirements
Calibration verification standard (ICV or CCV) requirements have not been met for sample 769625007 (LS-TW-02) in this batch in this SDG. One or more target analytes failed acceptance criteria with a positive bias in the standards bracketing the samples in this SDG. These target analytes were not detected above the PQL in the associated environmental samples; therefore, the non-compliance had no adverse effect on the data.

Quality Control (QC) Information

Surrogate Recoveries
Sample (See Below) did not meet acceptance criteria for surrogate recovery. There was no more sample aliquot available for re-extraction; therefore, the data were reported.

Sample	Analyte	Value
769625007 (LS-TW-02)	Decachlorobiphenyl	10* (43%-140%)

Laboratory Control Sample (LCS/LCSD) Recovery

There is no more SC sample available for re-extraction.

Sample	Analyte	Value
1206417361 (LCS)	Aldrin	67* (70%-130%)

MS/MSD Relative Percent Difference (RPD) Statement
The RPD values between the MS and MSD, (See Below), were not within the acceptance limits due to the large difference between the individual recoveries in each MS and MSD analyte pair.

Sample	Analyte	Value
1206417362MS and 1206417363MSD (Non SDG 769481001)	4, 4’-DDD	RPD 40* (0%-30%)
	4, 4’-DDE	RPD 35* (0%-30%)
	4, 4’-DDT	RPD 32* (0%-30%)
	Aldrin	RPD 39* (0%-30%)
	Dieldrin	RPD 57* (0%-30%)
	Endosulfan II	RPD 39* (0%-30%)
	Endosulfan sulfate	RPD 40* (0%-30%)
	Endrin	RPD 39* (0%-30%)
	Endrin aldehyde	RPD 40* (0%-30%)
	Endrin ketone	RPD 42* (0%-30%)
	Methoxychlor	RPD 39* (0%-30%)
	alpha-BHC	RPD 49* (0%-30%)
	beta-BHC	RPD 42* (0%-30%)
	cis-Chlordane	RPD 33* (0%-30%)
	delta-BHC	RPD 44* (0%-30%)
	gamma-BHC (Lindane)	RPD 45* (0%-30%)

Technical Information

Florisil
Florisil clean-up was not performed on samples in this batch.

GC Semivolatile PCB

Product: **Analysis of The Analysis of Polychlorinated Biphenyls by GC/ECD by ECD**
Analytical Method: SW846 3535A/8082A
Analytical Procedure: GL-OA-E-040 REV# 30
Analytical Batch: 2969573

Preparation Method: SW846 3535A
Preparation Procedure: GL-OA-E-070 REV# 15
Preparation Batch: 2969572

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
769625007	LS-TW-02
1206421894	Method Blank (MB) **Batch 2969573**
1206421895	Laboratory Control Sample (LCS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Technical Information

Preparation/Analytical Method Verification

All reported analyte detections in client and quality control samples were within the established retention time windows. Reported analyte concentrations were confirmed on dissimilar columns.

Miscellaneous Information

Manual integrations
Samples 1206421894 (MB) and 1206421895 (LCS) required manual integration to correctly position the baseline as set in the calibration standard injections and to properly identify one or more peaks.

Additional Comments
A set of MS/MSD analysis was performed in this batch; however, the MS/MSD results were not reported because the parent sample was re-extracted and reported in another batch.

Metals

Product: **Determination of Metals by ICP**
Analytical Method: SW846 3005A/6010D
Analytical Procedure: GL-MA-E-013 REV# 35
Analytical Batch: 2967014

Preparation Method: SW846 3005A

1206417414	769625001(LS-SW-01SD) Matrix Spike Duplicate (MSD)
1206417415	769625001(LS-SW-01PS) Post Spike (PS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement
The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analyte. The post spike recovery was within the required control limits. This verifies the absence of a matrix interference in the post-spike digested sample. The recovery may be attributed to possible sample matrix interference and/or non-homogeneity.

Sample	Analyte	Value
1206417413 (LS-SW-01MS)	Iron	74.2* (75%-125%)

Product: **Mercury Analysis Using the Perkin Elmer Automated Mercury Analyzer**

1206417243	769625001(LS-SW-01) Matrix Spike (MS)
1206417244	769625011(LS-TW-10 DP) Sample Duplicate (DUP)
1206417245	769625011(LS-TW-10 DP) Matrix Spike (MS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS)/Post Spike (PS) Recovery Statement
The percent recoveries (%R) obtained from the spike analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The matrix spike recovered outside of the established acceptance limits due to matrix interference and/or non-homogeneity.

Analyte	Sample	Value

Hexavalent Chromium	1206417245 (LS-TW-10 DPMS)	129* (85%-115%)

Technical Information

Sample Dilutions

The following samples 1206417244 (LS-TW-10 DPDUP), 1206417245 (LS-TW-10 DPMS), 769625005 (LS-TW-13), 769625009 (LS-TW-10) and 769625011 (LS-TW-10 DP) in this sample group were diluted due to matrix interference. Dilutions may be required for many reasons, including to minimize matrix interferences or to bring over range target analyte concentrations into the linear calibration range.

Analyte	**769625**		
	005	**009**	**011**
Hexavalent Chromium	5X	5X	5X

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Re: Liberty Steel VCC Sampling
Work Order: 771102

Dear Robert MacPhee:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on April 06, 2026. This revised data report has been prepared and reviewed in accordance with GEL's standard operating procedures. This report replaces the original version which is noted as SDG number 771102 in the left-hand footer of the data report. This package has been revised to add "Field Filtered" to the dissolved sample ID names.

The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4289.

Sincerely,

Caitlyn Mettetal for
Julie Robinson
Project Manager

Purchase Order: GELP26-0217

Certificate of Analysis Report
for

GEEL003 GEL Engineering, LLC

Client SDG: 771102 GEL Work Order: 771102

The Qualifiers in this report are defined as follows:

* A quality control analyte recovery is outside of specified acceptance criteria
** Analyte is a Tracer compound
** Analyte is a surrogate compound
B The target analyte was detected in the associated blank.
E Concentration of the target analyte exceeds the instrument calibration range
J Value is estimated
Q ISO17025 / NELAC accredited; SC certification not held at time of analysis
U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Julie Robinson.

Notes:

The Qualifiers in this report are defined as follows:

U	U	Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
J	J	Value is estimated
Q	Q	ISO17025 / NELAC accredited; SC certification not held at time of analysis
B	B	The target analyte was detected in the associated blank.
E	E	Concentration of the target analyte exceeds the instrument calibration range

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
* Indicates that a Quality Control parameter was not within specifications.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

Technical Case Narrative
GEL Engineering, LLC
SDG #: 771102

GC/MS Volatile

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 2977529

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771102001	LS-TB-040626
771102002	LS-TW-09
771102004	LS-TW-06
1206435764	Laboratory Control Sample (LCS) **Batch 2977529**
1206435765	Laboratory Control Sample (LCS)
1206435766	Method Blank (MB)
1206435767	771102002(LS-TW-09) Matrix Spike (MS)
1206435768	771102002(LS-TW-09) Matrix Spike Duplicate (MSD)
1206435769	771102002(LS-TW-09) Matrix Spike (MS)
1206435770	771102002(LS-TW-09) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Blank (MB) Statement
Target analytes were detected in the blank (See Below) below the reporting limit. The associated data are qualified accordingly and reported.

Sample	Analyte	Value
1206435766 (MB)	Methylene chloride	1.46 ug/L between (0.5 - 5)

GC/MS Semivolatile

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3510C/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 2973326

Preparation Method: SW846 3510C
Preparation Procedure: GL-OA-E-013 REV# 37
Preparation Batch: 2973325

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771102002	LS-TW-09
1206428336	Method Blank (MB) **Batch 2973326**
1206428337	Laboratory Control Sample (LCS)
1206428338	770893001(NonSDG) Matrix Spike (MS)
1206428339	770893001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Laboratory Control Sample (LCS) Recovery
The LCS and/or LCSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206428337 (LCS)	Hexachlorocyclopentadiene	24* (31%-64%)

MS/MSD Relative Percent Difference (RPD) Statement
The RPD values between the MS and MSD, (See Below), were not within the acceptance limits due to the large difference between the individual recoveries in each MS and MSD analyte pair. The failures may be attributed to an error in the extraction process.

Sample	Analyte	Value
1206428338MS and 1206428339MSD (Non SDG 770893001)	Benzaldehyde	88* (0%-30%)

Technical Information

Sample Re-extraction/Re-analysis
Sample 771102004 (LS-TW-06) was re-extracted within holding due to surrogate failure. The passing re-extraction data were reported.

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3510C/8270E
Analytical Procedure: GL-OA-E-009 REV# 53

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771102004	LS-TW-06
1206432449	Method Blank (MB) **Batch 2975606**
1206432450	Laboratory Control Sample (LCS)
1206434271	Laboratory Control Sample Duplicate (LCSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Laboratory Control Sample Duplicate (LCSD)
An LCSD was used in place of matrix QC due to limited sample volume.

Technical Information

Sample Re-extraction/Re-analysis
Sample 771102004 (LS-TW-06) was re-extracted within holding due to surrogate failure. The passing re-extraction data were reported.

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

Metals

Product: **Determination of Metals by ICP**
Analytical Method: SW846 3005A/6010D
Analytical Procedure: GL-MA-E-013 REV# 35
Analytical Batch: 2973303

Preparation Method: SW846 3005A
Preparation Procedure: GL-MA-E-006 REV# 15

1206428287	771102002(LS-TW-09S) Matrix Spike (MS)
1206428288	771102002(LS-TW-09SD) Matrix Spike Duplicate (MSD)
1206428289	771102002(LS-TW-09PS) Post Spike (PS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement
The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analyte. The post spike recovery was within the required control limits. This verifies the absence of a matrix interference in the post-spike digested sample. The recovery may be attributed to possible sample matrix interference and/or non-homogeneity.

Sample	Analyte	Value
1206428288 (LS-TW-09MSD)	Aluminum	128* (75%-125%)

Product: **Mercury Analysis Using the Perkin Elmer Automated Mercury Analyzer**
Analytical Method: SW846 7470A
Analytical Procedure: GL-MA-E-010 REV# 42

Analytical Batch: 2973199

Preparation Method: SW846 7470A Prep

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771102002	LS-TW-09
771102003	LS-TW-09 Field Filtered
771102004	LS-TW-06
771102005	LS-TW-06
1206428169	Method Blank (MB)**CVAA Batch 2973199**
1206428170	Laboratory Control Sample (LCS)
1206428171	770785001(NonSDGD) Sample Duplicate (DUP)
1206428172	770785001(NonSDGS) Matrix Spike (MS)
1206428173	770785001(NonSDGPS) Post Spike (PS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement
The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analyte. The post spike recovery was within the required control limits. This verifies the absence of a matrix interference in the post-spike digested sample. The recovery may be attributed to possible sample matrix interference and/or non-homogeneity.

Sample	Analyte	Value
1206428172 (Non SDG 770785001MS)	Mercury	0* (75%-125%)

Technical Information

Preparation Information
The samples and associated matrix QC 1206428171 (Non SDG 770785001DUP), 1206428172 (Non SDG 770785001MS) and 1206428173 (Non SDG 770785001PS) were prepared at a dilution for CVAA analysis because larger volumes of the matrix consume excessive amounts of potassium permanganate.

General Chemistry

Product: **Hexavalent Chromium**
Analytical Method: SW846 7196A
Analytical Procedure: GL-GC-E-044 REV# 29
Analytical Batch: 2973290

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771102002	LS-TW-09
771102003	LS-TW-09 Field Filtered
771102004	LS-TW-06

Re: Liberty Steel VCC Sampling
Work Order: 771268

Dear Robert MacPhee:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on April 07, 2026. This revised data report has been prepared and reviewed in accordance with GEL's standard operating procedures. This report replaces the original version which is noted as SDG number 771268 in the left-hand footer of the data report. This package has been revised to add "Field Filtered" to the dissolved sample ID names.

The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4289.

Sincerely,

Caitlyn Mettetal for
Julie Robinson
Project Manager

Certificate of Analysis Report
for

GEEL003 GEL Engineering, LLC

Client SDG: 771268 GEL Work Order: 771268

The Qualifiers in this report are defined as follows:

* A quality control analyte recovery is outside of specified acceptance criteria
** Analyte is a Tracer compound
** Analyte is a surrogate compound
B The target analyte was detected in the associated blank.
E %difference of sample and SD is >10%. Sample concentration must meet flagging criteria
E Concentration of the target analyte exceeds the instrument calibration range
J Value is estimated
N/A RPD or %Recovery limits do not apply.
Q ISO17025 / NELAC accredited; SC certification not held at time of analysis
Q One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Julie Robinson.

Notes:

The Qualifiers in this report are defined as follows:

U	U	Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
J	J	Value is estimated
E	E	Concentration of the target analyte exceeds the instrument calibration range
Q	Q	One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
Q	Q	ISO17025 / NELAC accredited; SC certification not held at time of analysis
E	E	%difference of sample and SD is >10%. Sample concentration must meet flagging criteria
B	B	The target analyte was detected in the associated blank.

QC Summary

Workorder: **771268**

Parmname	NOM	Sample	Qual	QC	Units	RPD/D%	REC%	Range	Anlst	Date	Time

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
* Indicates that a Quality Control parameter was not within specifications.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

Technical Case Narrative
GEL Engineering, LLC
SDG #: 771268

GC/MS Volatile

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 2977529

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771268001	LS-TW-07
771268003	LS-TW-12
771268005	LS-TW-11
771268007	LS-TW-15
1206435764	Laboratory Control Sample (LCS) **Batch 2977529**
1206435765	Laboratory Control Sample (LCS)
1206435766	Method Blank (MB)
1206435767	771102002(LS-TW-09) Matrix Spike (MS)
1206435768	771102002(LS-TW-09) Matrix Spike Duplicate (MSD)
1206435769	771102002(LS-TW-09) Matrix Spike (MS)
1206435770	771102002(LS-TW-09) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Blank (MB) Statement
Target analytes were detected in the blank (See Below) below the reporting limit. The associated data are qualified accordingly and reported.

Sample	Analyte	Value
1206435766 (MB)	Methylene chloride	1.46 ug/L between (0.5 - 5)

GC/MS Semivolatile

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3510C/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 2974972

Preparation Method: SW846 3510C
Preparation Procedure: GL-OA-E-013 REV# 37
Preparation Batch: 2974962

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771268001	LS-TW-07
771268003	LS-TW-12
771268005	LS-TW-11
1206431266	Method Blank (MB) **Batch 2974972**
1206431267	Laboratory Control Sample (LCS)
1206431268	771374001(NonSDG) Matrix Spike (MS)
1206431269	771374001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Surrogate Recoveries
Sample (See Below) did not meet surrogate recovery acceptance criteria. The sample was re-extracted and displayed similar surrogate failures. The failures were attributed to matrix interference. The original extraction results have been reported.

Sample	Analyte	Value
771268001 (LS-TW-07)	Phenol-d5	10* (15%-85%)

Miscellaneous Information

Manual Integrations
Sample (See Below) required manual integration in order to properly identify one or more peaks and/or to correctly position the baseline as set in the calibration standard injections.

Sample	Analyte	Value
771268001 (LS-TW-07)	2, 4-Dimethylphenol	Result 8.32ug/L

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine

decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3510C/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 2977020

Preparation Method: SW846 3510C
Preparation Procedure: GL-OA-E-013 REV# 37
Preparation Batch: 2977016

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771268007	LS-TW-15
1206434904	Method Blank (MB) **Batch 2977020**
1206434905	Laboratory Control Sample (LCS)
1206434906	Laboratory Control Sample Duplicate (LCSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Laboratory Control Sample Duplicate (LCSD)
An LCSD was used in place of matrix QC due to limited sample volume.

Laboratory Control Sample (LCS) Recovery
The LCS and/or LCSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206434905 (LCS)	1, 1'-Biphenyl	42* (45%-114%)
	1, 2, 4, 5-Tetrachlorobenzene	37* (39%-107%)
	4-Nitrophenol	0* (25%-69%)
	Hexachlorocyclopentadiene	14* (31%-64%)
1206434906 (LCSD)	2, 4-Dimethylphenol	29* (31%-68%)
	4-Nitrophenol	0* (25%-69%)
	Hexachlorocyclopentadiene	15* (31%-64%)

Miscellaneous Information

Manual Integrations
Samples (See Below) required manual integration in order to properly identify one or more peaks and/or to correctly position the baseline as set in the calibration standard injections.

Sample	Analyte	Value
1206434905 (LCS)	4-Nitrophenol	Result 17.9ug/L
1206434906 (LCSD)	4-Nitrophenol	Result 14.3ug/L

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

Metals

Product: **Determination of Metals by ICP**
Analytical Method: SW846 3005A/6010D

1206429456	771268001(LS-TW-07S) Matrix Spike (MS)
1206429457	771268001(LS-TW-07SD) Matrix Spike Duplicate (MSD)
1206429458	771268001(LS-TW-07PS) Post Spike (PS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement
The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analytes. The post spike recoveries were within the required control limits. This verifies the absence of a matrix interference in the post-spike digested sample. The recoveries may be attributed to possible sample matrix interference and/or non-homogeneity.

Sample	Analyte	Value
1206429456 (LS-TW-07MS)	Aluminum	312* (75%-125%)
	Iron	159* (75%-125%)
1206429457 (LS-TW-07MSD)	Aluminum	298* (75%-125%)
	Iron	146* (75%-125%)

Serial Dilution % Difference Statement
The serial dilution is used to assess matrix suppression or enhancement. Raw element concentrations 25x the IDL/MDL for CVAA, 50X the IDL/MDL for ICP and 100X the IDL/MDL for ICP-MS analyses are applicable for serial dilution assessment. Not all the applicable analytes were within the established acceptance criteria. Matrix suppression may be suspected. The data has been qualified.

Sample	Analyte	Value
1206429459 (LS-TW-07SDILT)	Aluminum	25.9 *(0%-20%)
	Barium	22.4 *(0%-20%)
	Calcium	26 *(0%-20%)
	Iron	26.2 *(0%-20%)
	Manganese	25.9 *(0%-20%)
	Potassium	22.6 *(0%-20%)
	Sodium	25.5 *(0%-20%)

Re: Liberty Steel VCC Sampling
Work Order: 771270

Dear Robert MacPhee:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on April 07, 2026. This revised data report has been prepared and reviewed in accordance with GEL's standard operating procedures. This report replaces the original version which is noted as SDG number 771270 in the left-hand footer of the data report. This package has been revised to add "Field Filtered" to the dissolved sample ID names.

The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4289.

Sincerely,

Caitlyn Mettetal for
Julie Robinson
Project Manager

Certificate of Analysis Report
for

GEEL003 GEL Engineering, LLC

Client SDG: 771270 GEL Work Order: 771270

The Qualifiers in this report are defined as follows:

* A quality control analyte recovery is outside of specified acceptance criteria
** Analyte is a Tracer compound
** Analyte is a surrogate compound
B The target analyte was detected in the associated blank.
E %difference of sample and SD is >10%. Sample concentration must meet flagging criteria
E Concentration of the target analyte exceeds the instrument calibration range
J Value is estimated
N/A RPD or %Recovery limits do not apply.
Q ISO17025 / NELAC accredited; SC certification not held at time of analysis
Q One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Julie Robinson.

Notes:

The Qualifiers in this report are defined as follows:

U	U	Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
J	J	Value is estimated
E	E	Concentration of the target analyte exceeds the instrument calibration range
Q	Q	One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
Q	Q	ISO17025 / NELAC accredited; SC certification not held at time of analysis
E	E	%difference of sample and SD is >10%. Sample concentration must meet flagging criteria
B	B	The target analyte was detected in the associated blank.

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
* Indicates that a Quality Control parameter was not within specifications.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

Technical Case Narrative
GEL Engineering, LLC
SDG #: 771270

GC/MS Volatile

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 2977529

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771270001	LS-MW-14
771270003	LS-MW-05
1206435764	Laboratory Control Sample (LCS) **Batch 2977529**
1206435765	Laboratory Control Sample (LCS)
1206435766	Method Blank (MB)
1206435767	771102002(LS-TW-09) Matrix Spike (MS)
1206435768	771102002(LS-TW-09) Matrix Spike Duplicate (MSD)
1206435769	771102002(LS-TW-09) Matrix Spike (MS)
1206435770	771102002(LS-TW-09) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Blank (MB) Statement
Target analytes were detected in the blank (See Below) below the reporting limit. The associated data are qualified accordingly and reported.

Sample	Analyte	Value
1206435766 (MB)	Methylene chloride	1.46 ug/L between (0.5 - 5)

GC/MS Semivolatile

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3510C/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 2974972

Preparation Method: SW846 3510C
Preparation Procedure: GL-OA-E-013 REV# 37
Preparation Batch: 2974962

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771270001	LS-MW-14
771270003	LS-MW-05
1206431266	Method Blank (MB) **Batch 2974972**
1206431267	Laboratory Control Sample (LCS)
1206431268	771374001(NonSDG) Matrix Spike (MS)
1206431269	771374001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Surrogate Recoveries
Sample (See Below) did not meet surrogate recovery acceptance criteria. The sample was re-extracted and displayed similar surrogate failures. The failures were attributed to matrix interference. The original extraction results have been reported.

Sample	Analyte	Value
771270001 (LS-MW-14)	Phenol-d5	14* (15%-85%)

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

Metals

Product: **Determination of Metals by ICP**
Analytical Method: SW846 3005A/6010D

Analytical Procedure: GL-MA-E-013 REV# 35
Analytical Batch: 2974011

Preparation Method: SW846 3005A
Preparation Procedure: GL-MA-E-006 REV# 15
Preparation Batch: 2974010

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771270001	LS-MW-14
771270002	LS-MW-14 Field Filtered
771270003	LS-MW-05
771270004	LS-MW-05
1206429454	Method Blank (MB)**ICP Batch 2974011**
1206429455	Laboratory Control Sample (LCS)
1206429459	771268001(LS-TW-07L) Serial Dilution (SD)
1206429456	771268001(LS-TW-07S) Matrix Spike (MS)
1206429457	771268001(LS-TW-07SD) Matrix Spike Duplicate (MSD)
1206429458	771268001(LS-TW-07PS) Post Spike (PS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement
The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analytes. The post spike recoveries were within the required control limits. This verifies the absence of a matrix interference in the post-spike digested sample. The recoveries may be attributed to possible sample matrix interference and/or non-homogeneity.

Sample	Analyte	Value
1206429456 (LS-TW-07MS)	Aluminum	312* (75%-125%)
	Iron	159* (75%-125%)
1206429457 (LS-TW-07MSD)	Aluminum	298* (75%-125%)
	Iron	146* (75%-125%)

Serial Dilution % Difference Statement
The serial dilution is used to assess matrix suppression or enhancement. Raw element concentrations 25x the IDL/MDL for CVAA, 50X the IDL/MDL for ICP and 100X the IDL/MDL for ICP-MS analyses are applicable for serial dilution assessment. Not all the applicable analytes were within the established acceptance criteria. Matrix suppression may be suspected. The data has been qualified.

Sample	Analyte	Value
1206429459 (LS-TW-07SDILT)	Aluminum	25.9 *(0%-20%)
	Barium	22.4 *(0%-20%)

	Calcium	26 *(0%-20%)
	Iron	26.2 *(0%-20%)
	Manganese	25.9 *(0%-20%)
	Potassium	22.6 *(0%-20%)
	Sodium	25.5 *(0%-20%)

Product: **Mercury Analysis Using the Perkin Elmer Automated Mercury Analyzer**
Analytical Method: SW846 7470A
Analytical Procedure: GL-MA-E-010 REV# 42
Analytical Batch: 2974138

Preparation Method: SW846 7470A Prep
Preparation Procedure: GL-MA-E-010 REV# 42
Preparation Batch: 2974137

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771270001	LS-MW-14
771270002	LS-MW-14 Field Filtered
771270003	LS-MW-05
771270004	LS-MW-05
1206429738	Method Blank (MB)**CVAA Batch 2974138**
1206429739	Laboratory Control Sample (LCS)
1206429740	771145001(NonSDGD) Sample Duplicate (DUP)
1206429741	771145001(NonSDGS) Matrix Spike (MS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

There are no exceptions, anomalies or deviations from the specified methods. All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable.

General Chemistry

Product: **Hexavalent Chromium**
Analytical Method: SW846 7196A
Analytical Procedure: GL-GC-E-044 REV# 29
Analytical Batch: 2974009

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771270001	LS-MW-14
771270002	LS-MW-14 Field Filtered
771270003	LS-MW-05

771270004	LS-MW-05
1206429448	Method Blank (MB) **Batch 2974009**
1206429449	Laboratory Control Sample (LCS)
1206429450	771268001(LS-TW-07) Sample Duplicate (DUP)
1206429451	771268001(LS-TW-07) Matrix Spike (MS)
1206429452	771271003(LS-MW-24 Field Filtered) Sample Duplicate (DUP)
1206429453	771271003(LS-MW-24 Field Filtered) Matrix Spike (MS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS)/Post Spike (PS) Recovery Statement
The percent recoveries (%R) obtained from the spike analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The matrix spike recovered outside of the established acceptance limits due to matrix interference and/or non-homogeneity.

Analyte	Sample	Value
Hexavalent Chromium	1206429451 (LS-TW-07MS)	30.6* (85%-115%)

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Re: Liberty Steel VCC Sampling
Work Order: 771271

Dear Robert MacPhee:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on April 07, 2026. This revised data report has been prepared and reviewed in accordance with GEL's standard operating procedures. This report replaces the original version which is noted as SDG number 771271 in the left-hand footer of the data report. This package has been revised to add "Field Filtered" to the dissolved sample ID names.

The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4289.

Sincerely,

Caitlyn Mettetal for
Julie Robinson
Project Manager

Certificate of Analysis Report
for

GEEL003 GEL Engineering, LLC

Client SDG: 771271 GEL Work Order: 771271

The Qualifiers in this report are defined as follows:

* A quality control analyte recovery is outside of specified acceptance criteria
** Analyte is a Tracer compound
** Analyte is a surrogate compound
B The target analyte was detected in the associated blank.
E %difference of sample and SD is >10%. Sample concentration must meet flagging criteria
E Concentration of the target analyte exceeds the instrument calibration range
J Value is estimated
N/A RPD or %Recovery limits do not apply.
Q ISO17025 / NELAC accredited; SC certification not held at time of analysis
Q One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Julie Robinson.

The following Analytical Methods were performed:

Method	Description	Analyst Comments
1	SW846 8260D	

Surrogate/Tracer Recovery	Test	Result	Nominal	Recovery%	Acceptable Limits
Bromofluorobenzene	SW846 8260 TCL Volatiles "As Received"	49.3 ug/L	50.0	99	(77%-123%)
1,2-Dichloroethane-d4	SW846 8260 TCL Volatiles "As Received"	52.1 ug/L	50.0	104	(71%-131%)
Toluene-d8	SW846 8260 TCL Volatiles "As Received"	47.6 ug/L	50.0	95	(77%-121%)

Notes:

Column headers are defined as follows:

DF: Dilution Factor
DL: Detection Limit
MDA: Minimum Detectable Activity
MDC: Minimum Detectable Concentration
Lc/LC: Critical Level
PF: Prep Factor
RL: Reporting Limit
SQL: Sample Quantitation Limit

Notes:

The Qualifiers in this report are defined as follows:

U	U	Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
E	E	Concentration of the target analyte exceeds the instrument calibration range
Q	Q	One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
Q	Q	ISO17025 / NELAC accredited; SC certification not held at time of analysis
J	J	Value is estimated
E	E	%difference of sample and SD is >10%. Sample concentration must meet flagging criteria
B	B	The target analyte was detected in the associated blank.

QC Summary

Workorder: **771271**

Parmname	NOM	Sample	Qual	QC	Units	RPD/D%	REC%	Range	Anlst	Date	Time

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
* Indicates that a Quality Control parameter was not within specifications.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

Technical Case Narrative
GEL Engineering, LLC
SDG #: 771271

GC/MS Volatile

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 2977529

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771271001	LS-TB-040726
771271002	LS-MW-24
771271004	LS-MW-24-DP
1206435764	Laboratory Control Sample (LCS) **Batch 2977529**
1206435765	Laboratory Control Sample (LCS)
1206435766	Method Blank (MB)
1206435767	771102002(LS-TW-09) Matrix Spike (MS)
1206435768	771102002(LS-TW-09) Matrix Spike Duplicate (MSD)
1206435769	771102002(LS-TW-09) Matrix Spike (MS)
1206435770	771102002(LS-TW-09) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Blank (MB) Statement
Target analytes were detected in the blank (See Below) below the reporting limit. The associated data are qualified accordingly and reported.

Sample	Analyte	Value
1206435766 (MB)	Methylene chloride	1.46 ug/L between (0.5 - 5)

GC/MS Semivolatile

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3510C/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 2974972

Preparation Method: SW846 3510C
Preparation Procedure: GL-OA-E-013 REV# 37
Preparation Batch: 2974962

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771271002	LS-MW-24
771271004	LS-MW-24-DP
1206431266	Method Blank (MB) **Batch 2974972**
1206431267	Laboratory Control Sample (LCS)
1206431268	771374001(NonSDG) Matrix Spike (MS)
1206431269	771374001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

LCMSMS-Misc

Product: **Extraction and Analysis of Per- and Polyfluoroalkyl (PFAS) Substances using LCMSMS by Method 1633/1633A**
Analytical Method: EPA 1633
Analytical Procedure: GL-OA-E-076D REV# 7
Analytical Batches: 2976456 and 2976455

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771271002	LS-MW-24
771271004	LS-MW-24-DP
1206434043	Method Blank (MB) **Batch 2976456**
1206434044	Laboratory Control Sample (LCS)
1206434045	Laboratory Control Sample (LCS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Initial Calibration
Due to a software limitation, PFTrDA is quantitated using the average areas of the labeled compound 13C2-PFTeDA only.

Quality Control (QC) Information

Internal Standard (ISTD) Acceptance
The following internal standards recovered outside the acceptance range with a positive bias. The associated native target compound was a non-detect, therefore there is no effect on the quality of the data.

Sample	Analyte	Value
771271002 (LS-MW-24)	13C2_4:2 FTS Recovery	267* (40%-200%)
771271004 (LS-MW-24-DP)	13C2_4:2 FTS Recovery	265* (40%-200%)

Miscellaneous Information

Additional Comments
Total Suspended Solids (TSS) of 50 mg per sample are assessed by visual comparison.

GC Semivolatile Pesticide

Product: **Organochlorine Pesticides and Chlorinated Hydrocarbons**
Analytical Method: SW846 3535A/8081B
Analytical Procedure: GL-OA-E-041 REV# 25
Analytical Batch: 2974186

Preparation Method: SW846 3535A
Preparation Procedure: GL-OA-E-070 REV# 15
Preparation Batch: 2974185

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771271002	LS-MW-24
771271004	LS-MW-24-DP
1206429810	Method Blank (MB) **Batch 2974186**
1206429811	Laboratory Control Sample (LCS)
1206429812	771154015(NonSDG) Matrix Spike (MS)
1206429813	771154015(NonSDG) Matrix Spike Duplicate (MSD)
1206429814	Laboratory Control Sample (LCS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification (CCV) Requirements
Calibration verification standards (ICV or CCV) requirements have not been met for samples in this batch in this SDG. One or more target analytes failed acceptance criteria with a positive bias in the standards bracketing the samples in this SDG. These target analytes were not detected above the PQL in the associated environmental samples; therefore, the non-compliance had no adverse effect on the data.

Technical Information

Florisil
Florisil clean-up was not performed on samples in this batch.

GC Semivolatile PCB

Product: **Analysis of The Analysis of Polychlorinated Biphenyls by GC/ECD by ECD**
Analytical Method: SW846 3535A/8082A
Analytical Procedure: GL-OA-E-040 REV# 30
Analytical Batch: 2979246

Preparation Method: SW846 3535A
Preparation Procedure: GL-OA-E-070 REV# 15
Preparation Batch: 2979245

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771271002	LS-MW-24
771271004	LS-MW-24-DP
1206438586	Method Blank (MB) **Batch 2979246**
1206438587	Laboratory Control Sample (LCS)
1206438588	772714003(NonSDG) Matrix Spike (MS)
1206438589	772714003(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Technical Information

Preparation/Analytical Method Verification
Samples and the associated QC samples in this batch were cleaned using alumina in order to remove oil and other

high molecular weight interferences.
Samples and QC in this batch were cleaned with activated copper in order to remove sulfur.

All reported analyte detections in client and quality control samples were within the established retention time windows. Reported analyte concentrations were confirmed on dissimilar columns.

Miscellaneous Information

Manual integrations
Samples (See Below) required manual integration to correctly position the baseline as set in the calibration standard injections.

Sample	Analyte	Value
1206438587 (LCS)	Aroclor-1016	Result 0.801ug/L
	Aroclor-1260	Result 0.832ug/L
1206438589 (Non SDG 772714003MSD)	4cmx	Result 0.287ug/L
	Aroclor-1016	Result 1.64ug/L
	Aroclor-1260	Result 1.52ug/L

Additional Comments
The column 1 has been chosen as the primary column. The data are reported from the column 1 for all samples in this batch.

Metals

Product: **Determination of Metals by ICP**
Analytical Method: SW846 3005A/6010D
Analytical Procedure: GL-MA-E-013 REV# 35
Analytical Batch: 2974011

Preparation Method: SW846 3005A
Preparation Procedure: GL-MA-E-006 REV# 15
Preparation Batch: 2974010

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771271002	LS-MW-24
771271003	LS-MW-24 Field Filtered
771271004	LS-MW-24-DP
771271005	LS-MW-24-DP
1206429454	Method Blank (MB)**ICP Batch 2974011**
1206429455	Laboratory Control Sample (LCS)
1206429459	771268001(LS-TW-07L) Serial Dilution (SD)
1206429456	771268001(LS-TW-07S) Matrix Spike (MS)
1206429457	771268001(LS-TW-07SD) Matrix Spike Duplicate (MSD)
1206429458	771268001(LS-TW-07PS) Post Spike (PS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement
The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analytes. The post spike recoveries were within the required control limits. This verifies the absence of a matrix interference in the post-spike digested sample. The recoveries may be attributed to possible sample matrix interference and/or non-homogeneity.

Sample	Analyte	Value
1206429456 (LS-TW-07MS)	Aluminum	312* (75%-125%)
	Iron	159* (75%-125%)
1206429457 (LS-TW-07MSD)	Aluminum	298* (75%-125%)
	Iron	146* (75%-125%)

Serial Dilution % Difference Statement
The serial dilution is used to assess matrix suppression or enhancement. Raw element concentrations 25x the IDL/MDL for CVAA, 50X the IDL/MDL for ICP and 100X the IDL/MDL for ICP-MS analyses are applicable for serial dilution assessment. Not all the applicable analytes were within the established acceptance criteria. Matrix suppression may be suspected. The data has been qualified.

Sample	Analyte	Value
1206429459 (LS-TW-07SDILT)	Aluminum	25.9 *(0%-20%)
	Barium	22.4 *(0%-20%)
	Calcium	26 *(0%-20%)
	Iron	26.2 *(0%-20%)
	Manganese	25.9 *(0%-20%)
	Potassium	22.6 *(0%-20%)
	Sodium	25.5 *(0%-20%)

Product: **Mercury Analysis Using the Perkin Elmer Automated Mercury Analyzer**
Analytical Method: SW846 7470A
Analytical Procedure: GL-MA-E-010 REV# 42
Analytical Batch: 2974138

Preparation Method: SW846 7470A Prep
Preparation Procedure: GL-MA-E-010 REV# 42
Preparation Batch: 2974137

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771271002	LS-MW-24
771271003	LS-MW-24 Field Filtered
771271004	LS-MW-24-DP

1206429453	771271003(LS-MW-24 Field Filtered) Matrix Spike (MS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS)/Post Spike (PS) Recovery Statement
The percent recoveries (%R) obtained from the spike analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The matrix spike recovered outside of the established acceptance limits due to matrix interference and/or non-homogeneity.

Analyte	Sample	Value
Hexavalent Chromium	1206429451 (LS-TW-07MS)	30.6* (85%-115%)

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Re: Liberty Steel VCC Sampling
Work Order: 771803

Dear Robert MacPhee:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on April 09, 2026. This revised data report has been prepared and reviewed in accordance with GEL's standard operating procedures. This report replaces the original version which is noted as SDG number 771803 in the left-hand footer of the data report. This package has been revised to add "Field Filtered" to the dissolved sample ID names and correct the ID name for sample 771803012.

The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4289.

Sincerely,

Caitlyn Mettetal for
Julie Robinson
Project Manager

Purchase Order: GELP26-0217

Certificate of Analysis Report
for

GEEL003 GEL Engineering, LLC

Client SDG: 771803 GEL Work Order: 771803

The Qualifiers in this report are defined as follows:

* A quality control analyte recovery is outside of specified acceptance criteria

** Analyte is a Tracer compound

** Analyte is a surrogate compound

E %difference of sample and SD is >10%. Sample concentration must meet flagging criteria

J Value is estimated

N/A RPD or %Recovery limits do not apply.

Q ISO17025 / NELAC accredited; SC certification not held at time of analysis

Q One or more quality control criteria have not been met. Refer to the applicable narrative or DER.

U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

h Preparation or preservation holding time was exceeded

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Julie Robinson.

Certificate of Analysis

Report Date: May 4, 2026

Company :	GEL Engineering, LLC
Address :	111 Smith Hines Road Suite J Greenville, South Carolina 29607
Contact:	Robert MacPhee
Project:	Liberty Steel VCC Sampling

Client Sample ID:	LS-SD-03	Project:	RVDE00226C
Sample ID:	771803012	Client ID:	GEEL003

Parameter	Qualifier	Result	DL	RL	Units	PF	DF	Analyst	Date	Time	Batch	Method
Toluene-d8		SW846 8260 TCL Volatiles "Dry Weight Corrected"		23200	ug/kg	50.0		97		(79%-122%)		

Notes:

Column headers are defined as follows:

DF: Dilution Factor	Lc/LC: Critical Level
DL: Detection Limit	PF: Prep Factor
MDA: Minimum Detectable Activity	RL: Reporting Limit
MDC: Minimum Detectable Concentration	SQL: Sample Quantitation Limit

Report Date: May 4, 2026

Contact: Robert MacPhee
Project: Liberty Steel VCC Sampling

Client Sample ID: LS-SD-03
Sample ID: 771803012
Matrix: Solid
Collect Date: 09-APR-26
Receive Date: 09-APR-26
Collector: Client
Moisture: 81%

Project: RVDE00226C
Client ID: GEEL003

Parameter	Qualifier	Result	Uncertainty	MDC	TPU	RL	Units	PF	DF	Analyst	Date	Time	Batch	Mtd.
Gravimetric Solids														
"As Received"														

The following Analytical Methods were performed

Method	Description
1	ASTM D 2216 (Modified)

Surrogate/Tracer Recovery	Test	Batch ID	Recovery%	Acceptable Limits

Notes:

The MDC is a sample specific MDC.
TPU and Counting Uncertainty are calculated at the 95% confidence level (1.96-sigma).

Column headers are defined as follows:

DF: Dilution Factor
DL: Detection Limit
Lc/LC: Critical Level
MDA: Minimum Detectable Activity
MDC: Minimum Detectable Concentration
Mtd.: Method
PF: Prep Factor
RL: Reporting Limit
TPU: Total Propagated Uncertainty

QC Summary

Workorder: **771803**

Parmname	NOM	Sample	Qual	QC	Units	RPD/D%	REC%	Range	Anlst	Date	Time

The Qualifiers in this report are defined as follows:

U	U	Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
J	J	Value is estimated
h	h	Preparation or preservation holding time was exceeded
Q	Q	One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
Q	Q	ISO17025 / NELAC accredited; SC certification not held at time of analysis
E	E	%difference of sample and SD is >10%. Sample concentration must meet flagging criteria

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
* Indicates that a Quality Control parameter was not within specifications.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

1206443380	773323001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples 771803001 (LS-TB-040926), 771803002 (LS-MW-04), 771803004 (LS-MW-22), 771803006 (LS-MW-22-DP), 771803008 (LS-SW-06) and 771803010 (LS-SW-06-DP) and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 2982825

Preparation Method: SW846 5035
Preparation Procedure: GL-OA-E-039 REV# 14

Preparation Batch: 2982824

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771803012	LS-SD-03
1206445290	Laboratory Control Sample (LCS) **Batch 2982825**
1206445291	Laboratory Control Sample (LCS)
1206445292	Method Blank (MB)
1206445293	771803012(LS-SD-03) Matrix Spike (MS)
1206445294	771803012(LS-SD-03) Matrix Spike Duplicate (MSD)
1206445295	High Blank (HB)
1206445430	771803012(LS-SD-03) Matrix Spike (MS)
1206445431	771803012(LS-SD-03) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on a "dry weight" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Relative Percent Difference (RPD) Statement
The RPD between the matrix spike pair (See Below) were not all within the acceptance limits. However, the spike recoveries passed. The unacceptable RPD may be attributed to matrix interference and/or sample non-homogeneity.

Sample	Analyte	Value
1206445293MS and 1206445294MSD (LS-SD-03)	Bromomethane	RPD 67* (0%-20%)
1206445430MS and 1206445431MSD (LS-SD-03)	1, 4-Dioxane	RPD 61* (0%-20%)
	Trichlorotrifluoroethane	RPD 66* (0%-20%)

Technical Information

Sample Dilutions/Methanol Dilutions
Sample 771803012 (LS-SD-03) was analyzed employing a methanol dilution extraction procedure because the sample matrices were not amenable to more concentrated analyses.

Analyte	**771803012**

1206435779	Method Blank (MB) **Batch 2977541**
1206435780	Laboratory Control Sample (LCS)
1206435783	771903001(NonSDG) Matrix Spike (MS)
1206435784	771903001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

CCV Requirements

All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8270 for samples and the associated QC. One or more target analytes failed acceptance criteria with a positive bias. As there were no target analytes detected in the associated samples above the reporting limits, the data were reported.

Quality Control (QC) Information

Surrogate Recoveries
Sample (See Below) displayed failing surrogate recoveries. Because the recoveries were biased high and target analytes were not detected in the associated samples above the reporting limit, the data were reported.

Sample	Analyte	Value
1206435784 (Non SDG 771903001MSD)	2-Fluorophenol	78* (15%-72%)

Sample (See Below) did not meet surrogate recovery criteria. The sample was re-extracted out of holding and displayed similar low, but passing surrogate recoveries. The failures were attributed to sample matrix interference and the initial data were reported.

Sample	Analyte	Value
771803006 (LS-MW-22-DP)	p-Terphenyl-d14	18* (20%-118%)

Laboratory Control Sample (LCS) Recovery
The LCS and/or LCSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206435780 (LCS)	Benzaldehyde	25* (27%-111%)
	Hexachlorocyclopentadiene	30* (31%-64%)

Spike Recovery Statement
The MS or MSD (See Below) recovered spiked analytes outside of the established acceptance limits. Because the recoveries were biased high and the target analytes were not detected in the associated samples above the reporting limit, the data were reported.

Sample	Analyte	Value
1206435783 (Non SDG 771903001MS)	4-Nitrophenol	96* (9%-95%)
1206435784 (Non SDG 771903001MSD)	Phenol	83* (16%-74%)
	m, p-Cresols	110* (21%-105%)

The MS and/or MSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206435783 (Non SDG 771903001MS)	Benzaldehyde	0* (16%-109%)
1206435784 (Non SDG 771903001MSD)	Benzaldehyde	15* (16%-109%)

MS/MSD Relative Percent Difference (RPD) Statement
The RPD values between the MS and MSD, (See Below), were not within the acceptance limits. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries which attributed to the RPD failures. The data were reported.

Sample	Analyte	Value
1206435783MS and 1206435784MSD (Non SDG 771903001)	Benzaldehyde	RPD 200* (0%-30%)

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all

reports and forms.

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3541/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 2978441

Preparation Method: SW846 3541
Preparation Procedure: GL-OA-E-066 REV# 11
Preparation Batch: 2978440

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771803012	LS-SD-03
1206437200	Method Blank (MB) **Batch 2978441**

1206437202	771803012(LS-SD-03) Matrix Spike (MS)
1206437203	771803012(LS-SD-03) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on a "dry weight" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Surrogate Recoveries
The MS and MSD (See Below) did not meet surrogate recovery acceptance criteria. The parent sample met all surrogate recovery acceptance criteria, while the MS and MSD also displayed multiple spike recovery failures. The parent sample was re-extracted within holding but without a MS/MSD pair. The re-extraction did not meet surrogate recovery acceptance criteria. There were no target analytes detected in either extraction. The failures may be attributed to possible matrix interference and/or sample non-homogeneity. The initial data were reported.

Sample	Analyte	Value
1206437202 (LS-SD-03MS)	2, 4, 6-Tribromophenol	18* (20%-104%)
	2-Fluorobiphenyl	17* (20%-93%)
	p-Terphenyl-d14	20* (24%-107%)
1206437203 (LS-SD-03MSD)	2, 4, 6-Tribromophenol	12* (20%-104%)
	2-Fluorobiphenyl	10* (20%-93%)
	2-Fluorophenol	11* (19%-94%)
	Nitrobenzene-d5	10* (19%-90%)
	Phenol-d5	12* (20%-99%)
	p-Terphenyl-d14	14* (24%-107%)

Spike Recovery Statement
The MS and MSD (See Below) did not meet spike recovery acceptance criteria. The parent sample met all surrogate recovery acceptance criteria, while the MS and MSD also displayed multiple surrogate recovery failures. The parent sample was re-extracted within holding but without a MS/MSD pair. The re-extraction did not meet surrogate recovery acceptance criteria. There were no target analytes detected in either extraction. The failures may be attributed to possible matrix interference and/or sample non-homogeneity. The initial data were reported.

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Technical Information

Preparation/Analytical Method Verification
Samples and the associated QC samples in this batch were cleaned using alumina in order to remove oil and other high molecular weight interferences.
Samples and QC in this batch were cleaned with activated copper in order to remove sulfur.

All reported analyte detections in client and quality control samples were within the established retention time windows. Reported analyte concentrations were confirmed on dissimilar columns.

Miscellaneous Information

Manual integrations

Samples (See Below) required manual integration to correctly position the baseline as set in the calibration standard injections.

Sample	Analyte	Value
1206438587 (LCS)	Aroclor-1016	Result 0.801ug/L
	Aroclor-1260	Result 0.832ug/L
1206438589 (Non SDG 772714003MSD)	4cmx	Result 0.287ug/L
	Aroclor-1016	Result 1.64ug/L
	Aroclor-1260	Result 1.52ug/L

Additional Comments
The column 1 has been chosen as the primary column. The data are reported from the column 1 for all samples in this batch.

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the

following exceptions.

Quality Control (QC) Information

Serial Dilution % Difference Statement
The serial dilution is used to assess matrix suppression or enhancement. Raw element concentrations 25x the IDL/MDL for CVAA, 50X the IDL/MDL for ICP and 100X the IDL/MDL for ICP-MS analyses are applicable for serial dilution assessment. Not all the applicable analytes were within the established acceptance criteria. Matrix suppression may be suspected. The data has been qualified.

Sample	Analyte	Value
1206432307 (LS-MW-04SDILT)	Calcium	409 *(0%-20%)
	Magnesium	406 *(0%-20%)
	Sodium	404 *(0%-20%)

Technical Information

Sample Dilutions
Dilutions may be required for many reasons, including to minimize matrix interferences or to bring over range target analyte concentrations into the linear calibration range. Samples were diluted in order to bring raw values of calcium, iron and manganese within the linear range of the instrument, and for the analytes interfered with, in order to ensure that the inter-element correction factors were valid. 771803004 (LS-MW-22), 771803005 (LS-MW-22 Field Filtered), 771803006 (LS-MW-22-DP) and 771803007 (LS-MW-22-DP Field Filtered).

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement
The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analyte. The post spike recovery was within the required control limits. This verifies the absence of a matrix interference in the post-spike digested sample. The recovery may be attributed to possible sample matrix interference and/or non-homogeneity.

Sample	Analyte	Value
1206432310 (LS-SD-03MS)	Magnesium	134* (75%-125%)

MS/MSD Relative Percent Difference (RPD) Statement
The RPD values between qualifying analyte results in the MS and MSD were not within the acceptance limits. Sample non-homogeneity and/or possible matrix interferences may be suspected.

Sample	Analyte	Value
1206432310MS and 1206432311MSD (LS-SD-03)	Aluminum	RPD 21* (0%-20%)
	Iron	RPD 26.3* (0%-20%)

Technical Information

Preparation/Analytical Method Verification

Method SW-846 3050B is not a total digestion technique for most samples. It is a very strong acid digestion that will dissolve almost all elements that could become environmentally available. By design, elements bound in silicate structures are not normally dissolved by this procedure as they are not usually mobile in the environment.

1206433491	771808001(NonSDG) Sample Duplicate (DUP)
1206433492	771808001(NonSDG) Matrix Spike (MS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

There are no exceptions, anomalies or deviations from the specified methods. All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable.

Product: **Hexavalent Chromium**
Analytical Method: SW846 7196A
Analytical Procedure: GL-GC-E-044 REV# 29
Analytical Batch: 2975721

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification

1206440373	771638009(NonSDG) Matrix Spike (MS)
1206440374	Insoluble Lab Control Sample (ILCS)

The samples in this SDG were analyzed on a "dry weight" basis.

Data Summary:

There are no exceptions, anomalies or deviations from the specified methods. All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable.

Radiochemistry

Product: **Dry Weight**

Preparation Method: ASTM D 2216 (Modified)
Preparation Procedure: GL-OA-E-020 REV# 14
Preparation Batch: 2975541

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771803012	LS-SD-03
1206432284	771803012(LS-SD-03) Sample Duplicate (DUP) **Batch 2975541**

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

There are no exceptions, anomalies or deviations from the specified methods. All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable.

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Re: Liberty Steel VCC Sampling
Work Order: 771804

Dear Robert MacPhee:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on April 09, 2026. This revised data report has been prepared and reviewed in accordance with GEL's standard operating procedures. This report replaces the original version which is noted as SDG number 771804 in the left-hand footer of the data report. This package has been revised to add "Field Filtered" to the dissolved sample ID names.

The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4289.

Sincerely,

Caitlyn Mettetal for
Julie Robinson
Project Manager

Purchase Order: GELP26-0217

Certificate of Analysis Report
for

GEEL003 GEL Engineering, LLC

Client SDG: 771804 GEL Work Order: 771804

The Qualifiers in this report are defined as follows:

* A quality control analyte recovery is outside of specified acceptance criteria

** Analyte is a Tracer compound

** Analyte is a surrogate compound

J Value is estimated

Q ISO17025 / NELAC accredited; SC certification not held at time of analysis

Q One or more quality control criteria have not been met. Refer to the applicable narrative or DER.

U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

h Preparation or preservation holding time was exceeded

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Julie Robinson.

Notes:

The Qualifiers in this report are defined as follows:

U U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

J J Value is estimated

h h Preparation or preservation holding time was exceeded

QC Summary

Workorder: **771804**

Parmname	NOM	Sample	Qual	QC	Units	RPD/D%	REC%	Range	Anlst	Date	Time

Q Q One or more quality control criteria have not been met. Refer to the applicable narrative or DER.

Q Q ISO17025 / NELAC accredited; SC certification not held at time of analysis

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
* Indicates that a Quality Control parameter was not within specifications.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

771804011	LS-MW-21
1206435779	Method Blank (MB) **Batch 2977541**
1206435780	Laboratory Control Sample (LCS)
1206435783	771903001(NonSDG) Matrix Spike (MS)
1206435784	771903001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

CCV Requirements

All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8270 for samples and the associated QC. One or more target analytes failed acceptance criteria with a positive bias. As there were no target analytes detected in the associated samples above the reporting limits, the data were reported.

Quality Control (QC) Information

Surrogate Recoveries
Sample (See Below) displayed failing surrogate recoveries. Because the recoveries were biased high and target analytes were not detected in the associated samples above the reporting limit, the data were reported.

Sample	Analyte	Value
1206435784 (Non SDG 771903001MSD)	2-Fluorophenol	78* (15%-72%)

Sample (See Below) did not meet surrogate recovery criteria. The sample was re-extracted out of holding and displayed similar low, but passing surrogate recoveries. The failures were attributed to sample matrix interference and the initial data were reported.

Sample	Analyte	Value
771804007 (LS-MW-26)	p-Terphenyl-d14	15* (20%-118%)

Sample (See Below) did not meet surrogate recovery criteria. The sample was re-extracted out of holding and confirmed the low surrogate recovery. The failure was attributed to sample matrix interference and the initial data were reported.

Sample	Analyte	Value
771804005 (LS-MW-01)	p-Terphenyl-d14	15* (20%-118%)

Laboratory Control Sample (LCS) Recovery
The LCS and/or LCSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be

poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206435780 (LCS)	Benzaldehyde	25* (27%-111%)
	Hexachlorocyclopentadiene	30* (31%-64%)

Spike Recovery Statement
The MS or MSD (See Below) recovered spiked analytes outside of the established acceptance limits. Because the recoveries were biased high and the target analytes were not detected in the associated samples above the reporting limit, the data were reported.

Sample	Analyte	Value
1206435783 (Non SDG 771903001MS)	4-Nitrophenol	96* (9%-95%)
1206435784 (Non SDG 771903001MSD)	Phenol	83* (16%-74%)
	m, p-Cresols	110* (21%-105%)

The MS and/or MSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206435783 (Non SDG 771903001MS)	Benzaldehyde	0* (16%-109%)
1206435784 (Non SDG 771903001MSD)	Benzaldehyde	15* (16%-109%)

MS/MSD Relative Percent Difference (RPD) Statement
The RPD values between the MS and MSD, (See Below), were not within the acceptance limits. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries which attributed to the RPD failures. The data were reported.

Sample	Analyte	Value
1206435783MS and 1206435784MSD (Non SDG 771903001)	Benzaldehyde	RPD 200* (0%-30%)

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

LCMSMS-Misc

Product: **Extraction and Analysis of Per- and Polyfluoroalkyl (PFAS) Substances using LCMSMS by Method 1633/1633A**
Analytical Method: EPA 1633
Analytical Procedure: GL-OA-E-076D REV# 7
Analytical Batches: 2980639 and 2980636

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771804003	LS-MW-27
1206441131	Method Blank (MB) **Batch 2980639**
1206441132	Laboratory Control Sample (LCS)
1206441133	Laboratory Control Sample (LCS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Initial Calibration
Due to a software limitation, PFTrDA is quantitated using the average areas of the labeled compound 13C2-PFTeDA only.

CCV Requirements
Calibration verification standard (ICV or CCV) requirements have not been met for sample 771804003 (LS-MW-27) in this batch in this SDG. One or more target analytes failed acceptance criteria with a positive bias in the standards bracketing the samples in this SDG. These target analytes were not detected in the associated environmental samples; therefore, the non-compliance had no adverse effect on the data.

Miscellaneous Information

Manual Integrations
Sample required manual integrations in order to properly identify the peak for PFOSA. 771804003 (LS-MW-27).

Additional Comments
Total Suspended Solids (TSS) of 50 mg per sample are assessed by visual comparison.

Metals

Product: **Determination of Metals by ICP**
Analytical Method: SW846 3005A/6010D
Analytical Procedure: GL-MA-E-013 REV# 35
Analytical Batch: 2975545

1206432293	771804001(LS-MW-25SD) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Technical Information

Sample Dilutions
Dilutions may be required for many reasons, including to minimize matrix interferences or to bring over range target analyte concentrations into the linear calibration range. Samples were diluted in order to bring raw values of calcium within the linear range of the instrument, and for the analytes interfered with, in order to ensure that the inter-element correction factors were valid. 771804011 (LS-MW-21) and 771804012 (LS-MW-21 Field Filtered).

1206432725	771803002(LS-MW-04) Sample Duplicate (DUP)
1206432726	771803002(LS-MW-04) Matrix Spike (MS)
1206432727	771804009(LS-MW-16) Sample Duplicate (DUP)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

There are no exceptions, anomalies or deviations from the specified methods. All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable.

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Re: Liberty Steel VCC Sampling
Work Order: 780734

Dear Robert MacPhee:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on June 08, 2026. This original data report has been prepared and reviewed in accordance with GEL's standard operating procedures.

The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

The laboratory preserved the following containers:
No containers were preserved at GEL

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4289.

Sincerely,

Caitlyn Mettetal for
Julie Robinson
Project Manager

Certificate of Analysis Report
for

GEEL003 GEL Engineering, LLC

Client SDG: 780734 GEL Work Order: 780734

The Qualifiers in this report are defined as follows:

* A quality control analyte recovery is outside of specified acceptance criteria

** Analyte is a Tracer compound

** Analyte is a surrogate compound

J Value is estimated

Q One or more quality control criteria have not been met. Refer to the applicable narrative or DER.

U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

h Preparation or preservation holding time was exceeded

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Julie Robinson.

Notes:

The Qualifiers in this report are defined as follows:

U	U	Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
J	J	Value is estimated
h	h	Preparation or preservation holding time was exceeded
Q	Q	One or more quality control criteria have not been met. Refer to the applicable narrative or DER.

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
* Indicates that a Quality Control parameter was not within specifications.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

1.) Chain of Custody Number = Client Determined

2.) QC Codes: **N** = Normal Sample, **TB** = Trip Blank, **FD** = Field Duplicate, **EB** = Equipment Blank, **MS** = Matrix Spike Sample, **MSD** = Matrix Spike Duplicate Sample, **G** = Grab, **C** = Composite

3.) Field Filtered: For liquid matrices, indicate with a **- Y -** for yes the sample was field filtered or **- N -** for sample was not field filtered.

4.) Matrix Codes: **DW**=Drinking Water, **GW**=Groundwater, **SW**=Surface Water, **WW**=Waste Water, **W**=Water, **ML**=Misc Liquid, **SO**=Soil, **SD**=Sediment, **SL**=Sludge, **SS**=Solid Waste, **O**=Oil, **F**=Filter, **P**=Wipe, **U**=Urine, **F**=Fecal, **N**=Nasal

5.) Sample Analysis Requested: Analytical method requested (i.e. **8260B, 6010B/7470A**) and number of containers provided for each (i.e. *8260B* **- 3**, *6010B/7470A* **- 1**).

6.) Preservative Type: **HA** = Hydrochloric Acid, **NI** = Nitric Acid, **SH** = Sodium Hydroxide, **SA** = Sulfuric Acid, **AA** = Ascorbic Acid, **HX** = Hexane, **ST** = Sodium Thiosulfate, If no preservative is added = leave field blank

7.) *Are there any known or possible hazards associated with these samples?*

RCRA Metals
As = Arsenic **Hg**= Mercury
Ba = Barium **Se**= Selenium
Cd = Cadmium **Ag**= Silver
Cr = Chromium **MR**= Miscellaneous RCRA metals
Pb = Lead

Characteristic Hazards
FL = Flammable/Ignitable
CO = Corrosive
RE = Reactive

TSCA Regulated
PCB = Polychlorinated biphenyls

Listed Waste
LW= Listed Waste
(F,K,P and U-listed wastes.)
Waste code(s):

Other
OT= Other / Unknown
(i.e.: High/low pH, asbestos, beryllium, irritants, other misc. health hazards, etc.)
Description:

Please provide any additional details below regarding handling and/or disposal concerns. *(i.e.: Origin of sample(s), type of site collected from, odd matrices, etc.)*

Technical Case Narrative
GEL Engineering, LLC
SDG #: 780734

GC/MS Volatile

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 3015279

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
780734001	LS-TB-060826
780734002	LS-MW-28D
780734003	LS-MW-20
780734005	LS-MW-17
780734007	LS-MW-18
780734009	LS-MW-19
780734011	LS-TW-08
780734013	LS-TW-03
1206505276	Laboratory Control Sample (LCS) **Batch 3015279**
1206505277	Laboratory Control Sample (LCS)
1206505278	Method Blank (MB)
1206505279	780734002(LS-MW-28D) Matrix Spike (MS)
1206505280	780734002(LS-MW-28D) Matrix Spike Duplicate (MSD)
1206505281	780734002(LS-MW-28D) Matrix Spike (MS)
1206505282	780734002(LS-MW-28D) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Laboratory Control Sample (LCS) Recovery
The LCS and/or LCSD (See Below) recoveries were not within the acceptance limits for all analytes. The unacceptable analytes were not detected in the samples associated with the laboratory control samples. Therefore, the data were reported.

Sample	Analyte	Value
1206505276 (LCS)	Bromomethane	151* (70%-130%)

	Vinyl chloride	137* (70%-130%)

GC/MS Semivolatile

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3510C/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 3009257

Preparation Method: SW846 3510C
Preparation Procedure: GL-OA-E-013 REV# 37
Preparation Batch: 3009253

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
780734003	LS-MW-20
780734005	LS-MW-17
780734007	LS-MW-18
780734009	LS-MW-19
780734011	LS-TW-08
780734013	LS-TW-03
1206493693	Method Blank (MB) **Batch 3009257**
1206493694	Laboratory Control Sample (LCS)
1206493695	780734003(LS-MW-20) Matrix Spike (MS)
1206493696	780734003(LS-MW-20) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Surrogate Recoveries
Samples (See Below) did not meet surrogate recovery acceptance criteria. The samples were re-extracted and displayed similar surrogate failures. The failures were attributed to matrix interference. The original extraction results have been reported.

Sample	Analyte	Value
780734007 (LS-MW-18)	Phenol-d5	14* (15%-85%)
780734009 (LS-MW-19)	Phenol-d5	13* (15%-85%)
	p-Terphenyl-d14	18* (20%-118%)
780734011 (LS-TW-08)	2-Fluorobiphenyl	18* (32%-102%)
	2-Fluorophenol	14* (15%-72%)

	Nitrobenzene-d5	30* (31%-100%)
	Phenol-d5	10* (15%-85%)
	p-Terphenyl-d14	10* (20%-118%)
780734013 (LS-TW-03)	Phenol-d5	11* (15%-85%)

Sample (See Below) did not meet surrogate recovery acceptance criteria. The sample was re-extracted out of holding and passed recovery criteria. As no target compounds were detected in either extraction, the lab reported the in-holding results.

Sample	Analyte	Value
780734005 (LS-MW-17)	Phenol-d5	12* (15%-85%)

Laboratory Control Sample (LCS) Recovery

The LCS did not meet DoDQSM spike recovery acceptance criteria. The associated DoDQSM samples in this batch were re-extracted.

Sample	Analyte	Value
1206493694 (LCS)	2, 4-Dimethylphenol	30* (31%-68%)
	Benzaldehyde	16* (27%-111%)
	Hexachlorocyclopentadiene	21* (31%-64%)

Technical Information

Sample Re-extraction/Re-analysis
Samples 780734005 (LS-MW-17), 780734007 (LS-MW-18), 780734009 (LS-MW-19), 780734011 (LS-TW-08) and 780734013 (LS-TW-03) were scheduled for re-extraction due to surrogate failure and/or batch QC failure.

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

LCMSMS-Misc

Product: **Extraction and Analysis of Per- and Polyfluoroalkyl (PFAS) Substances using LC-MS/MS by Method 1633/1633A**
Analytical Method: EPA 1633
Analytical Procedure: GL-OA-E-076D REV# 8
Analytical Batches: 3010454 and 3010448

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
780734003	LS-MW-20
780734005	LS-MW-17
780734009	LS-MW-19
780734015	LS-Facility Water
1206495886	Method Blank (MB) **Batch 3010454**
1206495887	Laboratory Control Sample (LCS)
1206495888	Laboratory Control Sample (LCS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Initial Calibration
Due to a software limitation, PFTrDA is quantitated using the average areas of the labeled compound 13C2-PFTeDA only.

Quality Control (QC) Information

Internal Standard (ISTD) Acceptance
The following internal standards recovered outside the acceptance range with a positive bias. The associated native target compound was a non-detect, therefore there is no effect on the quality of the data.

Sample	Analyte	Value
780734003 (LS-MW-20)	13C5_PFPeA Recovery	132* (40%-130%)
	d3-N-MeFOSAA Recovery	205* (40%-170%)
780734005 (LS-MW-17)	13C2_4:2 FTS Recovery	210* (40%-200%)
	13C3_PFBS Recovery	193* (40%-135%)
	13C5_PFPeA Recovery	183* (40%-130%)
	13C9_PFNA Recovery	136* (40%-130%)
780734009 (LS-MW-19)	13C2_4:2 FTS Recovery	271* (40%-200%)
	13C2_6:2 FTS Recovery	276* (40%-200%)
	13C2_8:2 FTS Recovery	350* (40%-300%)
	d5-N-EtFOSAA Recovery	144* (25%-135%)
780734015 (LS-Facility Water)	13C3_PFPrOPrA Recovery	140* (40%-130%)

Technical Information

Sample Dilutions
The following samples and/or QC were diluted because the Internal Standard Recovery was not within limits in the undiluted analysis. 780734003 (LS-MW-20), 780734005 (LS-MW-17) and 780734009 (LS-MW-19).

Analyte	780734		
	003	005	009
Perfluorobutane sulfonic acid (PFBS)	10X	5X	5X
Perfluorononanoic acid (PFNA)	1X	5X	1X
Perfluorooctane sulfonamide (PFOSAm)	1X	5X	1X
Perfluoropentanoic acid (PFPeA)	5X	5X	1X

Miscellaneous Information

Manual Integrations

Sample required manual integrations in order to properly identify the peaks for PFBA, PFPeA, and PFOSA. 780734003 (LS-MW-20).
Sample required manual integrations in order to properly identify the peaks for PFBA, PFPeA, PFHxA, and PFOSA. 780734005 (LS-MW-17).
Sample required manual integrations in order to properly identify the peaks for PFBA and PFPeA. 780734009 (LS-MW-19).

Additional Comments
Total Suspended Solids (TSS) of 50 mg per sample are assessed by visual comparison.

GC Semivolatile Pesticide

Product: **Organochlorine Pesticides and Chlorinated Hydrocarbons**
Analytical Method: SW846 3535A/8081B
Analytical Procedure: GL-OA-E-041 REV# 26
Analytical Batch: 3010513

Preparation Method: SW846 3535A
Preparation Procedure: GL-OA-E-070 REV# 15
Preparation Batch: 3010511

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
780734007	LS-MW-18
1206495973	Method Blank (MB) **Batch 3010513**
1206495974	Laboratory Control Sample (LCS)
1206495975	781020011(NonSDG) Matrix Spike (MS)
1206495976	781020011(NonSDG) Matrix Spike Duplicate (MSD)
1206495979	Laboratory Control Sample (LCS)
1206496620	Laboratory Control Sample Duplicate (LCSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Miscellaneous Information

Manual Integrations
Samples (See Below) required manual integration to correctly position the baseline as set in the calibration standard injections.

Sample	Analyte	Value
1206495975 (Non SDG 781020011MS)	4cmx	Result 0.756ug/L
	alpha-BHC	Result 0.538ug/L
1206495976 (Non SDG 781020011MSD)	4cmx	Result 0.794ug/L

GC Semivolatile PCB

Product: **Analysis of The Analysis of Polychlorinated Biphenyls by GC/ECD by ECD**
Analytical Method: SW846 3535A/8082A
Analytical Procedure: GL-OA-E-040 REV# 30
Analytical Batch: 3008550

Preparation Method: SW846 3535A
Preparation Procedure: GL-OA-E-070 REV# 15
Preparation Batch: 3008549

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
780734007	LS-MW-18
1206492389	Method Blank (MB) **Batch 3008550**
1206492390	Laboratory Control Sample (LCS)
1206493886	Laboratory Control Sample Duplicate (LCSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Laboratory Control Sample (LCSD)
An LCSD was used in place of matrix QC due to limited sample volume.

Technical Information

Preparation/Analytical Method Verification
Samples and the associated QC samples in this batch were cleaned using alumina in order to remove oil and other high molecular weight interferences.
Samples and QC in this batch were cleaned with activated copper in order to remove sulfur.

All reported analyte detections in client and quality control samples were within the established retention time windows. Reported analyte concentrations were confirmed on dissimilar columns.

Metals

Product: **Determination of Metals by ICP**
Analytical Method: SW846 3005A/6010D
Analytical Procedure: GL-MA-E-013 REV# 35
Analytical Batch: 3008924

Preparation Method: SW846 3005A
Preparation Procedure: GL-MA-E-006 REV# 15
Preparation Batch: 3008923

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
780734003	LS-MW-20
780734004	LS-MW-20 Dissolved
780734005	LS-MW-17
780734006	LS-MW-17 Dissolved
780734007	LS-MW-18

1206492053	780734013(LS-TW-03) Matrix Spike (MS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS)/Post Spike (PS) Recovery Statement
The percent recoveries (%R) obtained from the spike analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The matrix spike recovered outside of the established acceptance limits due to matrix interference and/or non-homogeneity.

Analyte	Sample	Value
Hexavalent Chromium	1206492051 (LS-MW-20MS)	2.36* (85%-115%)
	1206492053 (LS-TW-03MS)	49.6* (85%-115%)

Technical Information

Sample Dilutions

The following samples 780734009 (LS-MW-19) and 780734011 (LS-TW-08) in this sample group were diluted due to matrix interference. Dilutions may be required for many reasons, including to minimize matrix interferences or to bring over range target analyte concentrations into the linear calibration range.

Analyte	780734	
	009	011
Hexavalent Chromium	50X	20X

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Re: Liberty Steel VCC Sampling
Work Order: 771544

Dear Robert MacPhee:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on April 08, 2026. This revised data report has been prepared and reviewed in accordance with GEL's standard operating procedures. This report replaces the original version which is noted as SDG number 771544 in the left-hand footer of the data report. This package has been revised to add "Field Filtered" to the dissolved sample ID names.

The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4289.

Sincerely,

Caitlyn Mettetal for
Julie Robinson
Project Manager

Certificate of Analysis Report
for

GEEL003 GEL Engineering, LLC

Client SDG: 771544 GEL Work Order: 771544

The Qualifiers in this report are defined as follows:

* A quality control analyte recovery is outside of specified acceptance criteria
** Analyte is a Tracer compound
** Analyte is a surrogate compound
B Either presence of analyte detected in the associated blank, or MDL/IDL < sample value < PQL
B The target analyte was detected in the associated blank.
E %difference of sample and SD is >10%. Sample concentration must meet flagging criteria
J Value is estimated
N/A RPD or %Recovery limits do not apply.
Q ISO17025 / NELAC accredited; SC certification not held at time of analysis
Q One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Julie Robinson.

Notes:

The Qualifiers in this report are defined as follows:

- U U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
- J J Value is estimated
- Q Q ISO17025 / NELAC accredited; SC certification not held at time of analysis
- Q Q One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
- E E %difference of sample and SD is >10%. Sample concentration must meet flagging criteria
- B B The target analyte was detected in the associated blank.

QC Summary

Workorder: **771544**

Parmname	NOM	Sample	Qual	QC	Units	RPD/D%	REC%	Range	Anlst	Date	Time

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
* Indicates that a Quality Control parameter was not within specifications.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

Technical Case Narrative
GEL Engineering, LLC
SDG #: 771544

GC/MS Volatile

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 2981021

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771544001	LS-TB-040826
771544002	LS-PW-02
771544004	LS-PW-02-DP
771544006	LS-PW-01
771544008	LS-PW-03
771544010	LS-PW-04
1206442007	Laboratory Control Sample (LCS) **Batch 2981021**
1206442008	Laboratory Control Sample (LCS)
1206442009	Method Blank (MB)

1206442011	771387001(NonSDG) Matrix Spike Duplicate (MSD)
1206442012	771387001(NonSDG) Matrix Spike (MS)
1206442013	771387001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples 771544001 (LS-TB-040826), 771544002 (LS-PW-02), 771544004 (LS-PW-02-DP), 771544006 (LS-PW-01), 771544008 (LS-PW-03) and 771544010 (LS-PW-04) and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Blank (MB) Statement
Target analytes were detected in the blank (See Below) below the reporting limit. The associated data are qualified accordingly and reported.

Sample	Analyte	Value
1206442009 (MB)	Methylene chloride	1.96 ug/L between (0.5 - 5)

Laboratory Control Sample (LCS) Recovery
The LCS and/or LCSD (See Below) recoveries were not within the acceptance limits for all analytes. The unacceptable analytes were not detected in the samples associated with the laboratory control samples. Therefore, the data were reported.

Sample	Analyte	Value
1206442007 (LCS)	Vinyl chloride	134* (70%-130%)

Miscellaneous Information

Manual Integrations
Some initial calibration standards, continuing calibration standards, and/or samples may have required manual integrations due to software limitations.

GC/MS Semivolatile

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3510C/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 2975606

Preparation Method: SW846 3510C
Preparation Procedure: GL-OA-E-013 REV# 37
Preparation Batch: 2975605

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771544002	LS-PW-02
771544004	LS-PW-02-DP
771544006	LS-PW-01
1206432449	Method Blank (MB) **Batch 2975606**
1206432450	Laboratory Control Sample (LCS)
1206434271	Laboratory Control Sample Duplicate (LCSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Laboratory Control Sample Duplicate (LCSD)
An LCSD was used in place of matrix QC due to limited sample volume.

Technical Information

Preparation/Analytical Method Verification

Per Prep Logbook Comments: Samples 771544008 (LS-PW-03) and 771544010 (LS-PW-04) were emulsive during acid and base extractions.

Sample Re-extraction/Re-analysis
Samples 771544008 (LS-PW-03) and 771544010 (LS-PW-04) were re-extracted within holding due to surrogate failure. The passing re-extraction data were reported.

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3510C/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 2977541

Preparation Method: SW846 3510C
Preparation Procedure: GL-OA-E-013 REV# 37
Preparation Batch: 2977540

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771544008	LS-PW-03
771544010	LS-PW-04
1206435779	Method Blank (MB) **Batch 2977541**
1206435780	Laboratory Control Sample (LCS)
1206435783	771903001(NonSDG) Matrix Spike (MS)
1206435784	771903001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

CCV Requirements

All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8270 for samples and the associated QC. One or more target analytes failed acceptance criteria with a positive bias. As there were no target analytes detected in the associated samples above the reporting limits, the data were reported.

Quality Control (QC) Information

Surrogate Recoveries
Sample (See Below) displayed failing surrogate recoveries. Because the recoveries were biased high and target analytes were not detected in the associated samples above the reporting limit, the data were reported.

Sample	Analyte	Value
1206435784 (Non SDG 771903001MSD)	2-Fluorophenol	78* (15%-72%)

Laboratory Control Sample (LCS) Recovery
The LCS and/or LCSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206435780 (LCS)	Benzaldehyde	25* (27%-111%)
	Hexachlorocyclopentadiene	30* (31%-64%)

Spike Recovery Statement
The MS or MSD (See Below) recovered spiked analytes outside of the established acceptance limits. Because the recoveries were biased high and the target analytes were not detected in the associated samples above the reporting limit, the data were reported.

Sample	Analyte	Value
1206435783 (Non SDG 771903001MS)	4-Nitrophenol	96* (9%-95%)
1206435784 (Non SDG 771903001MSD)	Phenol	83* (16%-74%)
	m, p-Cresols	110* (21%-105%)

The MS and/or MSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206435783 (Non SDG 771903001MS)	Benzaldehyde	0* (16%-109%)
1206435784 (Non SDG 771903001MSD)	Benzaldehyde	15* (16%-109%)

MS/MSD Relative Percent Difference (RPD) Statement
The RPD values between the MS and MSD, (See Below), were not within the acceptance limits. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries which attributed to the RPD failures. The data were reported.

Sample	Analyte	Value
1206435783MS and 1206435784MSD (Non SDG 771903001)	Benzaldehyde	RPD 200* (0%-30%)

Technical Information

Preparation/Analytical Method Verification
Samples 771544008 (LS-PW-03) and 771544010 (LS-PW-04) were emulsive during acid and base extractions.

Sample Re-extraction/Re-analysis
Samples 771544008 (LS-PW-03) and 771544010 (LS-PW-04) were re-extracted within holding due to surrogate failure. The passing re-extraction data were reported.

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

LCMSMS-Misc

Product: **Extraction and Analysis of Per- and Polyfluoroalkyl (PFAS) Substances using LCMSMS by Method 1633/1633A**
Analytical Method: EPA 1633
Analytical Procedure: GL-OA-E-076D REV# 7
Analytical Batches: 2976456 and 2976455

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771544002	LS-PW-02
771544004	LS-PW-02-DP
1206434043	Method Blank (MB) **Batch 2976456**
1206434044	Laboratory Control Sample (LCS)
1206434045	Laboratory Control Sample (LCS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Initial Calibration
Due to a software limitation, PFTrDA is quantitated using the average areas of the labeled compound 13C2-PFTeDA only.

Miscellaneous Information

Additional Comments
Total Suspended Solids (TSS) of 50 mg per sample are assessed by visual comparison.

Product: **Extraction and Analysis of Per- and Polyfluoroalkyl (PFAS) Substances using LCMSMS by Method 1633/1633A**

1206430771	771544002(LS-PW-02SD) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Serial Dilution % Difference Statement
The serial dilution is used to assess matrix suppression or enhancement. Raw element concentrations 25x the IDL/MDL for CVAA, 50X the IDL/MDL for ICP and 100X the IDL/MDL for ICP-MS analyses are applicable for serial dilution assessment. Not all the applicable analytes were within the established acceptance criteria. Matrix suppression may be suspected. The data has been qualified.

Sample	Analyte	Value
1206430773 (LS-PW-02SDILT)	Barium	24.6 *(0%-20%)
	Calcium	27.1 *(0%-20%)
	Iron, Magnesium	26.6 *(0%-20%)
	Manganese	23.5 *(0%-20%)

Technical Information

Sample Dilutions
Dilutions may be required for many reasons, including to minimize matrix interferences or to bring over range target analyte concentrations into the linear calibration range. Samples were diluted in order to bring raw values of sodium within the linear range of the instrument, and for the analytes interfered with, in order to ensure that the inter-element correction factors were valid. 771544002 (LS-PW-02), 771544003 (LS-PW-02 Field Filtered), 771544004 (LS-PW-02-DP), 771544005 (LS-PW-02-DP Field Filtered), 771544008 (LS-PW-03), 771544009 (LS-PW-03 Field Filtered), 771544010 (LS-PW-04) and 771544011 (LS-PW-04).

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement
The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analyte. The post spike also did not meet the required control limits; thus, confirming matrix interferences and/or sample non-homogeneity.

Sample	Analyte	Value
1206430979 (Non SDG 771225001MS)	Mercury	-2.2* (75%-125%)

1206430728	771544002(LS-PW-02) Matrix Spike (MS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Technical Information

Sample Dilutions
The following samples 771544008 (LS-PW-03) and 771544010 (LS-PW-04) were diluted because target analyte concentrations exceeded the calibration range. Dilutions may be required for many reasons, including to minimize matrix interferences or to bring over range target analyte concentrations into the linear calibration range.

Analyte	771544	
	008	010

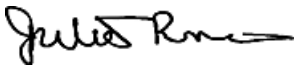
Re: Liberty Steel VCC Sampling
Work Order: 768213

Dear Robert MacPhee:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on March 12, 2026. This revised data report has been prepared and reviewed in accordance with GEL's standard operating procedures. This report replaces the previous revision noted as SDG number 768213 Rev02 in the left-hand footer of the data report. The report has been revised to include VOC analysis for 1,4-Dioxane.



The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

The laboratory preserved the following containers:
No containers were preserved at GEL

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4289.

Sincerely,

Julie Robinson
Project Manager

Certificate of Analysis Report
for

GEEL003 GEL Engineering, LLC

Client SDG: 768213 GEL Work Order: 768213

The Qualifiers in this report are defined as follows:

* A quality control analyte recovery is outside of specified acceptance criteria
** Analyte is a Tracer compound
** Analyte is a surrogate compound
B The target analyte was detected in the associated blank.
J Value is estimated
Q ISO17025 / NELAC accredited; SC certification not held at time of analysis
Q One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Julie Robinson.

Notes:

The Qualifiers in this report are defined as follows:

U U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

QC Summary

Workorder: **768213**

Parmname	NOM	Sample	Qual	QC	Units	RPD/D%	REC%	Range	Anlst	Date	Time

J	J	Value is estimated
B	B	The target analyte was detected in the associated blank.
Q	Q	One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
Q	Q	ISO17025 / NELAC accredited; SC certification not held at time of analysis

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
* Indicates that a Quality Control parameter was not within specifications.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

Technical Case Narrative
GEL Engineering, LLC
SDG #: 768213

GC/MS Volatile

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 2967250

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
768213001	LS-TB-031226
768213002	LS-SW-04
768213004	LS-SW-03
768213006	LS-SW-02
1206417830	769194001(NonSDG) Matrix Spike (MS) **Batch 2967250**
1206417831	769194001(NonSDG) Matrix Spike Duplicate (MSD)
1206417832	769194001(NonSDG) Matrix Spike (MS)
1206417833	769194001(NonSDG) Matrix Spike Duplicate (MSD)
1206419148	Laboratory Control Sample (LCS)
1206419149	Laboratory Control Sample (LCS)
1206419150	Method Blank (MB)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Laboratory Control Sample (LCS) Recovery
The LCS and/or LCSD (See Below) recoveries were not within the acceptance limits for all analytes. The unacceptable analytes were not detected in the samples associated with the laboratory control samples. Therefore, the data were reported.

Sample	Analyte	Value
1206419148 (LCS)	1, 1, 2, 2-Tetrachloroethane	133* (70%-130%)

The LCS recoveries for 1,4-Dioxane were not within the acceptance limits. The data are reported at the client’s

request.

Sample	Analyte	Value
1206419149 (LCS)	1, 4-Dioxane	60* (70%-130%)

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 2967540

Preparation Method: SW846 5035
Preparation Procedure: GL-OA-E-039 REV# 14
Preparation Batch: 2967539

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
768213008	LS-SD-02
1206418278	Laboratory Control Sample (LCS) **Batch 2967540**
1206418279	Laboratory Control Sample Duplicate (LCSD)
1206418280	Laboratory Control Sample (LCS)
1206418281	Laboratory Control Sample Duplicate (LCSD)
1206418282	Method Blank (MB)

The samples in this SDG were analyzed on a "dry weight" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Laboratory Control Sample Duplicate (LCSD)
An LCS/LCSD pair were analyzed in order to demonstrate precision and accuracy.

LCS/LCSD Relative Percent Difference (RPD) Statement
The RPD between the LCS/LCSD pair (See Below) were not all within the acceptance limits.

Sample	Analyte	Value
1206418280 (LCS) and 1206418281 (LCSD)	1, 4-Dioxane	RPD 22* (0%-20%)

GC/MS Semivolatile

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3510C/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 2962635

Preparation Method: SW846 3510C
Preparation Procedure: GL-OA-E-013 REV# 37
Preparation Batch: 2962628

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
768213002	LS-SW-04
768213004	LS-SW-03
768213006	LS-SW-02
1206409548	Method Blank (MB) **Batch 2962635**
1206409549	Laboratory Control Sample (LCS)
1206409550	768399001(NonSDG) Matrix Spike (MS)
1206409551	768399001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

CCV Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8270 for samples 768213002 (LS-SW-04), 768213004 (LS-SW-03) and 768213006 (LS-SW-02) and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8270 outlier acceptance criteria. If required, a CRDL was analyzed after the CCVs to demonstrate that there is adequate sensitivity to detect the failed compounds at the applicable lower quantitation limit.

Quality Control (QC) Information

MS/MSD Relative Percent Difference (RPD) Statement
The RPD values between the MS and MSD, (See Below), were not within the acceptance limits due to the large difference between the individual recoveries in each MS and MSD analyte pair. The failures may be attributed to an error in the extraction process.

Sample	Analyte	Value
1206409550MS and 1206409551MSD (Non SDG 768399001)	4-Chloroaniline	RPD 43* (0%-30%)

Miscellaneous Information

Manual Integrations
Sample (See Below) required manual integration to ensure proper identification of one or more peaks and/or correct baseline placement consistent with the calibration standard injections.

Sample	Analyte	Value
1206409551 (Non SDG 768399001MSD)	Benzo(ghi)perylene	Result 78.8ug/L

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3541/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 2964568

Preparation Method: SW846 3541
Preparation Procedure: GL-OA-E-066 REV# 11
Preparation Batch: 2964565

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
768213008	LS-SD-02
1206412893	Method Blank (MB) **Batch 2964568**
1206412894	Laboratory Control Sample (LCS)
1206412895	769001002(LS-SB-20-1.0) Matrix Spike (MS)
1206412896	769001002(LS-SB-20-1.0) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on a "dry weight" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Laboratory Control Sample (LCS) Recovery
The LCS and/or LCSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value

1206412894 (LCS)	Benzaldehyde	13* (21%-89%)

Spike Recovery Statement
The MS and/or MSD (See Below) spike recoveries were not within the acceptance limits. The associated MS or MSD passed recoveries, as did the LCS. It appears that the low spike recoveries were isolated to the MS or MSD only and were the result of a poor extraction.

Sample	Analyte	Value
1206412896 (LS-SB-20-1.0MSD)	Phenol	0* (16%-107%)

The MS and/or MSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206412896 (LS-SB-20-1.0MSD)	4-Nitrophenol	0* (14%-122%)
	Hexachlorocyclopentadiene	10* (16%-60%)

MS/MSD Relative Percent Difference (RPD) Statement
The relative percent difference (RPD) between the MS and MSD (See Below) did not meet acceptance limits. As the individual MS and MSD recoveries were within the acceptance limits, the failures had no adverse impact on the reported sample data.

Sample	Analyte	Value
1206412895MS and 1206412896MSD (LS-SB-20-1.0)	1, 1'-Biphenyl	RPD 35* (0%-30%)
	1, 2, 4, 5-Tetrachlorobenzene	RPD 37* (0%-30%)
	2, 3, 4, 6-Tetrachlorophenol	RPD 36* (0%-30%)
	2, 4, 5-Trichlorophenol	RPD 34* (0%-30%)
	2, 4, 6-Trichlorophenol	RPD 36* (0%-30%)
	2, 4-Dichlorophenol	RPD 35* (0%-30%)
	2, 4-Dimethylphenol	RPD 32* (0%-30%)
	2, 4-Dinitrotoluene	RPD 40* (0%-30%)
	2, 6-Dinitrotoluene	RPD 39* (0%-30%)
	2-Chloronaphthalene	RPD 36* (0%-30%)
	2-Chlorophenol	RPD 32* (0%-30%)

	2-Methyl-4, 6-dinitrophenol	RPD 59* (0%-30%)
	2-Methylnaphthalene	RPD 35* (0%-30%)
	2-Nitrophenol	RPD 40* (0%-30%)
	4-Bromophenylphenylether, 4-Chloro-3-methylphenol, 4-Chlorophenylphenylether	RPD 35* (0%-30%)
	Acenaphthene	RPD 36* (0%-30%)
	Acenaphthylene	RPD 35* (0%-30%)
	Acetophenone	RPD 33* (0%-30%)
	Anthracene	RPD 34* (0%-30%)
	Atrazine, Benzaldehyde	RPD 43* (0%-30%)
	Benzo(a)anthracene, Benzo(a)pyrene	RPD 32* (0%-30%)
	Benzo(b)fluoranthene	RPD 34* (0%-30%)
	Benzo(ghi)perylene, Benzo(k)fluoranthene	RPD 31* (0%-30%)

	Hexachlorobutadiene	RPD 40* (0%-30%)
	Hexachloroethane	RPD 39* (0%-30%)
	Indeno(1, 2, 3-cd)pyrene	RPD 31* (0%-30%)
	Isophorone	RPD 39* (0%-30%)
	N-Nitrosodipropylamine	RPD 35* (0%-30%)
	Naphthalene	RPD 36* (0%-30%)
	Nitrobenzene	RPD 37* (0%-30%)
	Phenanthrene, Pyrene	RPD 33* (0%-30%)
	bis(2-Chloro-1-methylethyl)ether	RPD 36* (0%-30%)
	bis(2-Chloroethoxy)methane	RPD 37* (0%-30%)
	bis(2-Chloroethyl) ether	RPD 32* (0%-30%)
	bis(2-Ethylhexyl)phthalate	RPD 34* (0%-30%)
	m, p-Cresols	RPD 32* (0%-30%)
	o-Cresol	RPD 34* (0%-30%)
	o-Nitroaniline	RPD 39* (0%-30%)
	p-Nitroaniline	RPD 34* (0%-30%)

The RPD values between the MS and MSD, (See Below), were not within the acceptance limits due to the large difference between the individual recoveries in each MS and MSD analyte pair. The failures may be attributed to an error in the extraction process.

Sample	Analyte	Value
1206412895MS and 1206412896MSD (LS-SB-20-1.0)	Phenol	RPD 200* (0%-30%)

The RPD values between the MS and MSD, (See Below), were not within the acceptance limits. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries which attributed to the RPD failures. The data were reported.

Sample	Analyte	Value
1206412895MS and 1206412896MSD (LS-SB-20-1.0)	4-Nitrophenol	RPD 200* (0%-30%)
	Hexachlorocyclopentadiene	RPD 85* (0%-30%)

Technical Information

Sample Re-extraction/Re-analysis
Sample 768213008 (LS-SD-02) was re-extracted within holding due to the initial extraction being biphasic and had no surrogate recovery. The passing re-extraction data were reported.

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement
The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analytes. The post spike recoveries were within the required control limits. This verifies the absence of a matrix interference in the post-spike digested sample. The recoveries may be attributed to possible sample matrix interference and/or non-homogeneity.

Sample	Analyte	Value
1206406707 (LS-SW-04MS)	Iron	21.8* (75%-125%)
1206406708 (LS-SW-04MSD)	Iron	-24.2* (75%-125%)

Product: **Determination of Metals by ICP**
Analytical Method: SW846 3050B/6010D
Analytical Procedure: GL-MA-E-013 REV# 35
Analytical Batch: 2961125

Preparation Method: SW846 3050B
Preparation Procedure: GL-MA-E-009 REV# 30
Preparation Batch: 2961124

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
768213008	LS-SD-02
1206406711	Method Blank (MB)**ICP Batch 2961125**
1206406712	Laboratory Control Sample (LCS)
1206406716	768213008(LS-SD-02L) Serial Dilution (SD)
1206406713	768213008(LS-SD-02S) Matrix Spike (MS)
1206406714	768213008(LS-SD-02SD) Matrix Spike Duplicate (MSD)
1206406715	768213008(LS-SD-02PS) Post Spike (PS)

The samples in this SDG were analyzed on a "dry weight" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement
The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is

less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analytes. The post spike recoveries were within the required control limits. This verifies the absence of a matrix interference in the post-spike digested sample. The recoveries may be attributed to possible sample matrix interference and/or non-homogeneity.

Sample	Analyte	Value
1206406713 (LS-SD-02MS)	Aluminum	219* (75%-125%)
	Potassium	67.7* (75%-125%)
	Vanadium	138* (75%-125%)
1206406714 (LS-SD-02MSD)	Aluminum	223* (75%-125%)
	Selenium	132* (75%-125%)

MS/MSD Relative Percent Difference (RPD) Statement
The RPD values between qualifying analyte results in the MS and MSD were not within the acceptance limits. Sample non-homogeneity and/or possible matrix interferences may be suspected.

Sample	Analyte	Value
1206406713MS and 1206406714MSD (LS-SD-02)	Selenium	RPD 27.4* (0%-20%)

Technical Information

Preparation/Analytical Method Verification
Method SW-846 3050B is not a total digestion technique for most samples. It is a very strong acid digestion that will dissolve almost all elements that could become environmentally available. By design, elements bound in silicate structures are not normally dissolved by this procedure as they are not usually mobile in the environment.

Sample Dilutions
Dilutions may be required for many reasons, including to minimize matrix interferences or to bring over range target analyte concentrations into the linear calibration range. Sample was diluted in order to bring raw values of iron within the linear range of the instrument, and for the analytes interfered with, in order to ensure that the inter-element correction factors were valid. 768213008 (LS-SD-02).

Re: Liberty Steel VCC Sampling
Work Order: 769625

Dear Robert MacPhee:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on March 24, 2026. This revised data report has been prepared and reviewed in accordance with GEL's standard operating procedures. This report replaces the original version which is noted as SDG number 769625 in the left-hand footer of the data report. This package has been revised to add "Field Filtered" to the dissolved sample ID names.

The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4289.

Sincerely,

Caitlyn Mettetal for
Julie Robinson
Project Manager

Certificate of Analysis Report
for

GEEL003 GEL Engineering, LLC

Client SDG: 769625 GEL Work Order: 769625

The Qualifiers in this report are defined as follows:

* A quality control analyte recovery is outside of specified acceptance criteria

** Analyte is a Tracer compound

** Analyte is a surrogate compound

B The target analyte was detected in the associated blank.

E Concentration of the target analyte exceeds the instrument calibration range

J Value is estimated

P Organics--The concentrations between the primary and confirmation columns/detectors is >40% different. For HPLC, the difference is >70%.

Q ISO17025 / NELAC accredited; SC certification not held at time of analysis

U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

h Preparation or preservation holding time was exceeded

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Julie Robinson.

Notes:

The Qualifiers in this report are defined as follows:

U	U	Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
P	P	Organics--The concentrations between the primary and confirmation columns/detectors is >40% different. For HPLC, the difference is >70%.
J	J	Value is estimated
E	E	Concentration of the target analyte exceeds the instrument calibration range
h	h	Preparation or preservation holding time was exceeded
Q	Q	ISO17025 / NELAC accredited; SC certification not held at time of analysis
B	B	The target analyte was detected in the associated blank.

QC Summary

Workorder: **769625**

Parmname	NOM	Sample	Qual	QC	Units	RPD/D%	REC%	Range	Anlst	Date	Time

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
* Indicates that a Quality Control parameter was not within specifications.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

Technical Case Narrative
GEL Engineering, LLC
SDG #: 769625

GC/MS Volatile

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 2971014

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
769625001	LS-SW-01
769625003	LS-SW-05
769625005	LS-TW-13
769625007	LS-TW-02
769625009	LS-TW-10
769625011	LS-TW-10 DP
1206424674	Laboratory Control Sample (LCS) **Batch 2971014**
1206424675	Laboratory Control Sample (LCS)
1206424676	Method Blank (MB)
1206424677	769603002(NonSDG) Matrix Spike (MS)
1206424678	769603002(NonSDG) Matrix Spike Duplicate (MSD)
1206424679	769603002(NonSDG) Matrix Spike (MS)
1206424680	769603002(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Blank (MB) Statement
Target analytes were detected in the blank (See Below) below the reporting limit. The associated data are qualified accordingly and reported.

Sample	Analyte	Value
1206424676 (MB)	Methylene chloride	1.13 ug/L between (0.5 - 5)

Miscellaneous Information

Manual Integrations
Some initial calibration standards, continuing calibration standards, and/or samples may have required manual integrations due to software limitations.

GC/MS Semivolatile

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**
Analytical Method: SW846 3510C/8270E
Analytical Procedure: GL-OA-E-009 REV# 53
Analytical Batch: 2967841

Preparation Method: SW846 3510C
Preparation Procedure: GL-OA-E-013 REV# 37
Preparation Batch: 2967840

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
769625001	LS-SW-01
769625003	LS-SW-05
769625005	LS-TW-13
769625007	LS-TW-02
769625009	LS-TW-10
769625011	LS-TW-10 DP
1206418798	Method Blank (MB) **Batch 2967841**
1206418799	Laboratory Control Sample (LCS)
1206418800	769680001(NonSDG) Matrix Spike (MS)
1206418801	769680001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Surrogate Recoveries

Sample (See Below) did not meet surrogate recovery acceptance criteria. The sample was re-extracted out of holding and passed surrogate recovery acceptance criteria. As the sample results confirmed, the lab reported the in holding results.

Sample	Analyte	Value
769625011 (LS-TW-10 DP)	2, 4, 6-Tribromophenol	27* (28%-113%)
	2-Fluorophenol	13* (15%-72%)
	Phenol-d5	11* (15%-85%)
	p-Terphenyl-d14	12* (20%-118%)

Laboratory Control Sample (LCS) Recovery
The LCS and/or LCSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206418799 (LCS)	Hexachlorocyclopentadiene	28* (31%-64%)

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

GC Semivolatile Pesticide

Product: **Organochlorine Pesticides and Chlorinated Hydrocarbons**
Analytical Method: SW846 3535A/8081B
Analytical Procedure: GL-OA-E-041 REV# 25
Analytical Batch: 2966985

Preparation Method: SW846 3535A
Preparation Procedure: GL-OA-E-070 REV# 15
Preparation Batch: 2966984

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
769625007	LS-TW-02
1206417360	Method Blank (MB) **Batch 2966985**
1206417361	Laboratory Control Sample (LCS)
1206417362	769481001(NonSDG) Matrix Spike (MS)
1206417363	769481001(NonSDG) Matrix Spike Duplicate (MSD)
1206417364	Laboratory Control Sample (LCS)
1206417365	Laboratory Control Sample (LCS)
1206417366	Laboratory Control Sample (LCS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification (CCV) Requirements
Calibration verification standard (ICV or CCV) requirements have not been met for sample 769625007 (LS-TW-02) in this batch in this SDG. One or more target analytes failed acceptance criteria with a positive bias in the standards bracketing the samples in this SDG. These target analytes were not detected above the PQL in the associated environmental samples; therefore, the non-compliance had no adverse effect on the data.

Quality Control (QC) Information

Surrogate Recoveries
Sample (See Below) did not meet acceptance criteria for surrogate recovery. There was no more sample aliquot available for re-extraction; therefore, the data were reported.

Sample	Analyte	Value
769625007 (LS-TW-02)	Decachlorobiphenyl	10* (43%-140%)

Laboratory Control Sample (LCS/LCSD) Recovery

There is no more SC sample available for re-extraction.

Sample	Analyte	Value
1206417361 (LCS)	Aldrin	67* (70%-130%)

MS/MSD Relative Percent Difference (RPD) Statement
The RPD values between the MS and MSD, (See Below), were not within the acceptance limits due to the large difference between the individual recoveries in each MS and MSD analyte pair.

Sample	Analyte	Value
1206417362MS and 1206417363MSD (Non SDG 769481001)	4, 4’-DDD	RPD 40* (0%-30%)
	4, 4’-DDE	RPD 35* (0%-30%)
	4, 4’-DDT	RPD 32* (0%-30%)
	Aldrin	RPD 39* (0%-30%)
	Dieldrin	RPD 57* (0%-30%)
	Endosulfan II	RPD 39* (0%-30%)
	Endosulfan sulfate	RPD 40* (0%-30%)
	Endrin	RPD 39* (0%-30%)
	Endrin aldehyde	RPD 40* (0%-30%)
	Endrin ketone	RPD 42* (0%-30%)
	Methoxychlor	RPD 39* (0%-30%)
	alpha-BHC	RPD 49* (0%-30%)
	beta-BHC	RPD 42* (0%-30%)
	cis-Chlordane	RPD 33* (0%-30%)
	delta-BHC	RPD 44* (0%-30%)
	gamma-BHC (Lindane)	RPD 45* (0%-30%)

Technical Information

Florisil
Florisil clean-up was not performed on samples in this batch.

GC Semivolatile PCB

Product: **Analysis of The Analysis of Polychlorinated Biphenyls by GC/ECD by ECD**
Analytical Method: SW846 3535A/8082A
Analytical Procedure: GL-OA-E-040 REV# 30
Analytical Batch: 2969573

Preparation Method: SW846 3535A
Preparation Procedure: GL-OA-E-070 REV# 15
Preparation Batch: 2969572

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
769625007	LS-TW-02
1206421894	Method Blank (MB) **Batch 2969573**
1206421895	Laboratory Control Sample (LCS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Technical Information

Preparation/Analytical Method Verification

All reported analyte detections in client and quality control samples were within the established retention time windows. Reported analyte concentrations were confirmed on dissimilar columns.

Miscellaneous Information

Manual integrations
Samples 1206421894 (MB) and 1206421895 (LCS) required manual integration to correctly position the baseline as set in the calibration standard injections and to properly identify one or more peaks.

Additional Comments
A set of MS/MSD analysis was performed in this batch; however, the MS/MSD results were not reported because the parent sample was re-extracted and reported in another batch.

Metals

Product: **Determination of Metals by ICP**
Analytical Method: SW846 3005A/6010D
Analytical Procedure: GL-MA-E-013 REV# 35
Analytical Batch: 2967014

Preparation Method: SW846 3005A
Preparation Procedure: GL-MA-E-006 REV# 15
Preparation Batch: 2967013

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
769625001	LS-SW-01
769625002	LS-SW-01 Field Filtered
769625003	LS-SW-05

1206417415	769625001(LS-SW-01PS) Post Spike (PS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement
The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analyte. The post spike recovery was within the required control limits. This verifies the absence of a matrix interference in the post-spike digested sample. The recovery may be attributed to possible sample matrix interference and/or non-homogeneity.

Sample	Analyte	Value
1206417413 (LS-SW-01MS)	Iron	74.2* (75%-125%)

Product: **Mercury Analysis Using the Perkin Elmer Automated Mercury Analyzer**

1206417245	769625011(LS-TW-10 DP) Matrix Spike (MS)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS)/Post Spike (PS) Recovery Statement
The percent recoveries (%R) obtained from the spike analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The matrix spike recovered outside of the established acceptance limits due to matrix interference and/or non-homogeneity.

Analyte	Sample	Value

Hexavalent Chromium	1206417245 (LS-TW-10 DPMS)	129* (85%-115%)

Technical Information

Sample Dilutions

The following samples 1206417244 (LS-TW-10 DPDUP), 1206417245 (LS-TW-10 DPMS), 769625005 (LS-TW-13), 769625009 (LS-TW-10) and 769625011 (LS-TW-10 DP) in this sample group were diluted due to matrix interference. Dilutions may be required for many reasons, including to minimize matrix interferences or to bring over range target analyte concentrations into the linear calibration range.

Analyte	**769625**		
	005	**009**	**011**
Hexavalent Chromium	5X	5X	5X

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Re: Liberty Steel VCC Sampling
Work Order: 771803

Dear Robert MacPhee:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on April 09, 2026. This revised data report has been prepared and reviewed in accordance with GEL's standard operating procedures. This report replaces the original version which is noted as SDG number 771803 in the left-hand footer of the data report. This package has been revised to add "Field Filtered" to the dissolved sample ID names and correct the ID name for sample 771803012.

The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4289.

Sincerely,

Caitlyn Mettetal for
Julie Robinson
Project Manager

Certificate of Analysis Report
for

GEEL003 GEL Engineering, LLC

Client SDG: 771803 GEL Work Order: 771803

The Qualifiers in this report are defined as follows:

* A quality control analyte recovery is outside of specified acceptance criteria

** Analyte is a Tracer compound

** Analyte is a surrogate compound

E %difference of sample and SD is >10%. Sample concentration must meet flagging criteria

J Value is estimated

N/A RPD or %Recovery limits do not apply.

Q ISO17025 / NELAC accredited; SC certification not held at time of analysis

Q One or more quality control criteria have not been met. Refer to the applicable narrative or DER.

U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

h Preparation or preservation holding time was exceeded

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

The designation ND, if present, appears in the result column when the analyte concentration is not detected above the limit as defined in the 'U' qualifier above.

This data report has been prepared and reviewed in accordance with GEL Laboratories LLC standard operating procedures. Please direct any questions to your Project Manager, Julie Robinson.

Notes:

QC Summary

Workorder: **771803**

Parmname	NOM	Sample	Qual	QC	Units	RPD/D%	REC%	Range	Anlst	Date	Time

The Qualifiers in this report are defined as follows:

U	U	Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
J	J	Value is estimated
h	h	Preparation or preservation holding time was exceeded
Q	Q	One or more quality control criteria have not been met. Refer to the applicable narrative or DER.
Q	Q	ISO17025 / NELAC accredited; SC certification not held at time of analysis
E	E	%difference of sample and SD is >10%. Sample concentration must meet flagging criteria

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
* Indicates that a Quality Control parameter was not within specifications.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

Notes:

TPU and Counting Uncertainty are calculated at the 95% confidence level (1.96-sigma).

The Qualifiers in this report are defined as follows:

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more or %RPD not applicable.
** Indicates analyte is a surrogate/tracer compound.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptence criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

Suspected Hazard Information	Yes	No	*If Net Counts > 100cpm on samples not marked "radioactive", contact the Radiation Safety Group for further investigation.
A)Shipped as a DOT Hazardous?		✓	Hazard Class Shipped: UN#: If UN2910, Is the Radioactive Shipment Survey Compliant? Yes___ No___
B) Did the client designate the samples are to be received as radioactive?		✓	COC notation or radioactive stickers on containers equal client designation.
C) Did the RSO classify the samples as radioactive?		✓	Maximum Net Counts Observed* (Observed Counts - Area Background Counts): Ø CPM / uR/Hr Classified as: Rad 1 Rad 2 Rad 3
D) Are there any sample hazards to document?		✓	If yes, select Hazards below. PCBs Flammable Foreign Soil RCRA Asbestos Beryllium Corrosive Other:
E) Was a SDS received and reviewed by Lab Safety?		✓	Circle Applicable: See additional Comments below. No additional comments needed after review.

	Sample Receipt Criteria	Yes	NA	No	Comments/Qualifiers (Required for Non-Conforming Items)
1	Shipping containers received intact and sealed?	✓			Circle Applicable: Direct client dropoff Seals broken Damaged container Leaking container Other (describe)
2	Chain of custody documents included with shipment?	✓			Circle Applicable: Client contacted and provided COC COC created upon receipt
3	If there are samples requiring cold preservation, did they arrive within (0 < 6 °C)?	✓			Preservation Method: (Wet Ice) Ice Packs Dry Ice None Other: *all temperatures recorded next to tracking numbers are in Celcius
4	Sample containers intact and sealed?	✓			Circle Applicable: Seals broken Damaged container Leaking container Other (describe)
5	Samples requiring chemical preservation at proper pH?	✓			Preserved per COC request or list Sample IDs and Containers Affected: If Preservation added, Lot#:
6	Do any samples require Volatile Analysis? (If yes, answer all three additional questions.)	✓			If Yes, are Encores or Soil Kits present? Yes ✓ No___ (If yes, take to VOA Freezer) Do liquid VOA vials contain acid preservation? Yes ✓ No___ NA___ (If unknown, select No) Are liquid VOA vials free of headspace? Yes___ No___ NA ✓ Sample IDs and containers affected: LS-TB-040926
7	Samples received within holding time?	✓			IDs and tests affected:
8	Sample IDs on COC match IDs on bottles?	✓			IDs and containers affected:
9	Date & time on COC match date & time on bottles?	✓			Circle Applicable: No dates on containers No times on containers COC missing info Other (describe)
10	Number of containers received match number indicated on COC?	✓			Circle Applicable: No container count on COC Missing Container (provide details) Other (describe)
11	Are sample containers identifiable as GEL provided by use of GEL labels?	✓			
12	COC form is properly signed in relinquished/received sections?	✓			Circle Applicable: Not relinquished Other (describe)

Technical Case Narrative
GEL Engineering, LLC
SDG #: 771803

GC/MS Volatile

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 2981765

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771803001	LS-TB-040926
771803002	LS-MW-04
771803004	LS-MW-22
771803006	LS-MW-22-DP

1206443380	773323001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples 771803001 (LS-TB-040926), 771803002 (LS-MW-04), 771803004 (LS-MW-22), 771803006 (LS-MW-22-DP), 771803008 (LS-SW-06) and 771803010 (LS-SW-06-DP) and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Product: **Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer**
Analytical Method: SW846 8260D
Analytical Procedure: GL-OA-E-038 REV# 32
Analytical Batch: 2982825

Preparation Method: SW846 5035
Preparation Procedure: GL-OA-E-039 REV# 14

Preparation Batch: 2982824

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771803012	LS-SD-03
1206445290	Laboratory Control Sample (LCS) **Batch 2982825**
1206445291	Laboratory Control Sample (LCS)
1206445292	Method Blank (MB)
1206445293	771803012(LS-SD-03) Matrix Spike (MS)
1206445294	771803012(LS-SD-03) Matrix Spike Duplicate (MSD)
1206445295	High Blank (HB)
1206445430	771803012(LS-SD-03) Matrix Spike (MS)
1206445431	771803012(LS-SD-03) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on a "dry weight" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements
All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Relative Percent Difference (RPD) Statement
The RPD between the matrix spike pair (See Below) were not all within the acceptance limits. However, the spike recoveries passed. The unacceptable RPD may be attributed to matrix interference and/or sample non-homogeneity.

Sample	Analyte	Value
1206445293MS and 1206445294MSD (LS-SD-03)	Bromomethane	RPD 67* (0%-20%)
1206445430MS and 1206445431MSD (LS-SD-03)	1, 4-Dioxane	RPD 61* (0%-20%)
	Trichlorotrifluoroethane	RPD 66* (0%-20%)

Technical Information

Sample Dilutions/Methanol Dilutions
Sample 771803012 (LS-SD-03) was analyzed employing a methanol dilution extraction procedure because the sample matrices were not amenable to more concentrated analyses.

1206435783	771903001(NonSDG) Matrix Spike (MS)
1206435784	771903001(NonSDG) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

CCV Requirements

All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8270 for samples and the associated QC. One or more target analytes failed acceptance criteria with a positive bias. As there were no target analytes detected in the associated samples above the reporting limits, the data were reported.

Quality Control (QC) Information

Surrogate Recoveries
Sample (See Below) displayed failing surrogate recoveries. Because the recoveries were biased high and target analytes were not detected in the associated samples above the reporting limit, the data were reported.

Sample	Analyte	Value
1206435784 (Non SDG 771903001MSD)	2-Fluorophenol	78* (15%-72%)

Sample (See Below) did not meet surrogate recovery criteria. The sample was re-extracted out of holding and displayed similar low, but passing surrogate recoveries. The failures were attributed to sample matrix interference and the initial data were reported.

Sample	Analyte	Value
771803006 (LS-MW-22-DP)	p-Terphenyl-d14	18* (20%-118%)

Laboratory Control Sample (LCS) Recovery
The LCS and/or LCSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206435780 (LCS)	Benzaldehyde	25* (27%-111%)
	Hexachlorocyclopentadiene	30* (31%-64%)

Spike Recovery Statement
The MS or MSD (See Below) recovered spiked analytes outside of the established acceptance limits. Because the recoveries were biased high and the target analytes were not detected in the associated samples above the reporting limit, the data were reported.

Sample	Analyte	Value
1206435783 (Non SDG 771903001MS)	4-Nitrophenol	96* (9%-95%)
1206435784 (Non SDG 771903001MSD)	Phenol	83* (16%-74%)
	m, p-Cresols	110* (21%-105%)

The MS and/or MSD (See Below) did not meet spike recovery acceptance criteria. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries and the data were reported.

Sample	Analyte	Value
1206435783 (Non SDG 771903001MS)	Benzaldehyde	0* (16%-109%)
1206435784 (Non SDG 771903001MSD)	Benzaldehyde	15* (16%-109%)

MS/MSD Relative Percent Difference (RPD) Statement
The RPD values between the MS and MSD, (See Below), were not within the acceptance limits. The failures are known to be poor responding analytes as stated per the Method. This may account for the low recoveries which attributed to the RPD failures. The data were reported.

Sample	Analyte	Value
1206435783MS and 1206435784MSD (Non SDG 771903001)	Benzaldehyde	RPD 200* (0%-30%)

Miscellaneous Information

Additional Comments
Diphenylamine Statement
Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all

reports and forms.

Product: **Analysis of Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry**

1206437203	771803012(LS-SD-03) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on a "dry weight" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Surrogate Recoveries
The MS and MSD (See Below) did not meet surrogate recovery acceptance criteria. The parent sample met all surrogate recovery acceptance criteria, while the MS and MSD also displayed multiple spike recovery failures. The parent sample was re-extracted within holding but without a MS/MSD pair. The re-extraction did not meet surrogate recovery acceptance criteria. There were no target analytes detected in either extraction. The failures may be attributed to possible matrix interference and/or sample non-homogeneity. The initial data were reported.

Sample	Analyte	Value
1206437202 (LS-SD-03MS)	2, 4, 6-Tribromophenol	18* (20%-104%)
	2-Fluorobiphenyl	17* (20%-93%)
	p-Terphenyl-d14	20* (24%-107%)
1206437203 (LS-SD-03MSD)	2, 4, 6-Tribromophenol	12* (20%-104%)
	2-Fluorobiphenyl	10* (20%-93%)
	2-Fluorophenol	11* (19%-94%)
	Nitrobenzene-d5	10* (19%-90%)
	Phenol-d5	12* (20%-99%)
	p-Terphenyl-d14	14* (24%-107%)

Spike Recovery Statement
The MS and MSD (See Below) did not meet spike recovery acceptance criteria. The parent sample met all surrogate recovery acceptance criteria, while the MS and MSD also displayed multiple surrogate recovery failures. The parent sample was re-extracted within holding but without a MS/MSD pair. The re-extraction did not meet surrogate recovery acceptance criteria. There were no target analytes detected in either extraction. The failures may be attributed to possible matrix interference and/or sample non-homogeneity. The initial data were reported.

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Technical Information

Preparation/Analytical Method Verification
Samples and the associated QC samples in this batch were cleaned using alumina in order to remove oil and other high molecular weight interferences.
Samples and QC in this batch were cleaned with activated copper in order to remove sulfur.

All reported analyte detections in client and quality control samples were within the established retention time windows. Reported analyte concentrations were confirmed on dissimilar columns.

Miscellaneous Information

Manual integrations

Samples (See Below) required manual integration to correctly position the baseline as set in the calibration standard injections.

Sample	Analyte	Value
1206438587 (LCS)	Aroclor-1016	Result 0.801ug/L
	Aroclor-1260	Result 0.832ug/L
1206438589 (Non SDG 772714003MSD)	4cmx	Result 0.287ug/L
	Aroclor-1016	Result 1.64ug/L
	Aroclor-1260	Result 1.52ug/L

Additional Comments
The column 1 has been chosen as the primary column. The data are reported from the column 1 for all samples in this batch.

Metals

Product: **Determination of Metals by ICP**
Analytical Method: SW846 3005A/6010D
Analytical Procedure: GL-MA-E-013 REV# 35
Analytical Batch: 2975549

Preparation Method: SW846 3005A
Preparation Procedure: GL-MA-E-006 REV# 15
Preparation Batch: 2975548

The following samples were analyzed using the above methods and analytical procedure(s).

GEL Sample ID#	Client Sample Identification
771803002	LS-MW-04
771803003	LS-MW-04 Field Filtered
771803004	LS-MW-22

1206432305	771803002(LS-MW-04SD) Matrix Spike Duplicate (MSD)

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the

following exceptions.

Quality Control (QC) Information

Serial Dilution % Difference Statement
The serial dilution is used to assess matrix suppression or enhancement. Raw element concentrations 25x the IDL/MDL for CVAA, 50X the IDL/MDL for ICP and 100X the IDL/MDL for ICP-MS analyses are applicable for serial dilution assessment. Not all the applicable analytes were within the established acceptance criteria. Matrix suppression may be suspected. The data has been qualified.

Sample	Analyte	Value
1206432307 (LS-MW-04SDILT)	Calcium	409 *(0%-20%)
	Magnesium	406 *(0%-20%)
	Sodium	404 *(0%-20%)

Technical Information

Sample Dilutions
Dilutions may be required for many reasons, including to minimize matrix interferences or to bring over range target analyte concentrations into the linear calibration range. Samples were diluted in order to bring raw values of calcium, iron and manganese within the linear range of the instrument, and for the analytes interfered with, in order to ensure that the inter-element correction factors were valid. 771803004 (LS-MW-22), 771803005 (LS-MW-22 Field Filtered), 771803006 (LS-MW-22-DP) and 771803007 (LS-MW-22-DP Field Filtered).

1206432312	771803012(LS-SD-03PS) Post Spike (PS)

The samples in this SDG were analyzed on a "dry weight" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement
The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analyte. The post spike recovery was within the required control limits. This verifies the absence of a matrix interference in the post-spike digested sample. The recovery may be attributed to possible sample matrix interference and/or non-homogeneity.

Sample	Analyte	Value
1206432310 (LS-SD-03MS)	Magnesium	134* (75%-125%)

MS/MSD Relative Percent Difference (RPD) Statement
The RPD values between qualifying analyte results in the MS and MSD were not within the acceptance limits. Sample non-homogeneity and/or possible matrix interferences may be suspected.

Sample	Analyte	Value
1206432310MS and 1206432311MSD (LS-SD-03)	Aluminum	RPD 21* (0%-20%)
	Iron	RPD 26.3* (0%-20%)

Technical Information

Preparation/Analytical Method Verification

Method SW-846 3050B is not a total digestion technique for most samples. It is a very strong acid digestion that will dissolve almost all elements that could become environmentally available. By design, elements bound in silicate structures are not normally dissolved by this procedure as they are not usually mobile in the environment.

LABORATORY DATA VALIDATION REPORTS

GEL Engineering LLC
2040 Savage Road Charleston, SC 29407 P 843.769.7378

Data Validation Report

Project/Site Name: Liberty Steel Property

Report Date: July 23, 2026

Laboratory: GEL Laboratories, LLC

Sample Delivery Group(s) (SDG): 766749, 766977, 767474, 767718, 767984, 768213, 768430, 769001, 769624, 769625, 770021, 771102, 771268, 771270, 771271, 771544, 771803, 771804, 772041, 778952, 779423, 779753, 780734

Validator: Mackenzie Flannigan

INTRODUCTION

This Data Validation Report (DVR) presents data validation findings and results for the samples in SDG 766749, 766977, 767474, 767718, 767984, 768213, 768430, 769001, 769624, 769625, 770021, 771102, 771268, 771270, 771271, 771544, 771803, 771804, 772041, 778952, 779423, 779753, and 780734. Data validation was performed in accordance with a modified outline of the USEPA National Functional Guidelines (NFG) for Organic Superfund Methods Data Review (November 2020) and USEPA National Functional Guidelines (NFG) for Inorganic Superfund Methods Data Review (November 2020). Where specific guidance was not available, the data has been evaluated in a conservative manner consistent with industry standards using professional experience. All sample results were subjected to Level II data validation, which comprises an evaluation of quality control (QC) summary reports.

ANALYSIS SUMMARY

Groundwater, surface water, pore water, soil, and sediment samples were collected March 4, 2026 through June 8, 2026 by GEL Engineering, LLC. Samples were analyzed by GEL Laboratories, LLC for the parameters specified in Table 1. An explanation of the data qualifiers used in this report can be found in Table 2.

VALIDATION CRITERIA

I. Data Completeness Check

All data packages include the chain-of-custody (COC), laboratory case narrative, sample results, method blank report, laboratory control sample (LCS) data report, and matrix spike/matrix spike duplicate (MS/MSD) sample data report. The sample IDs, date and time sampled, and analyses requested on the COCs match those in the data reports.

II. Preservation and Holding Time

All the samples were preserved as required. All samples were extracted within holding times, however, samples 766749002, 766749013, and 766977010 were re-extracted for SVOC analysis out of holding due to QC failure. The data is qualified accordingly in the report.

III. Dilutions

There were dilutions performed on multiple compounds in multiple samples. Dilutions were performed for a variety of reasons such as to minimize matrix interference, to bring over range target analyte concentrations in to the linear calibration range, or the extract was very dark and/or viscous.

IV. Surrogates

Not all surrogate percent recoveries were within the QC acceptance limits. The compounds and samples that need to be flagged are listed in the table below. All results for the applicable analytical method for each sample receive a qualifier.

Failed Compound	Applicable Qualifier		Samples Requiring Qualification
	Detect	Non-detect	
2,4,6-Tribromophenol	JI	UJ	769001009
2,4,6-Tribromophenol	JI	UJ	769624012

V. Laboratory QC Analyses

All laboratory QC analyses were performed according to the analytical methods.

VI. Laboratory Control Sample

Not all LCS recoveries were within the QC acceptance limits. The compounds and samples that need to be flagged are listed in the table below. All results for the failed compound(s) within the associated analytical batch receive a qualifier.

Failed Compound	Applicable Qualifier		Samples Requiring Qualification
	Detect	Non-detect

IX. Blanks

a. Equipment/Trip Blanks

Not all Equipment and Trip Blanks met QC acceptance. The compounds and samples that need to be flagged are listed in the table below. A detection that requires qualification is less than five times the concentration detected in the blank. For common VOC contaminants (acetone, 2-butanone (MEK), methylene chloride, or toluene), the detection requires qualification if it is less than ten times the concentration detected in the blank. The data qualifier applied is "Ub". All results for the failed compound(s) within the report receive a qualifier.

Failed Compound	Applicable Qualifier		Samples Requiring Qualification
	Detect	Non-detect	
Antimony Calcium Lead Sodium Chloroform	Ub	No Flags	766749002 766749003 766749004 766749005 766749006 766749007 766749008 766749009 766749011 766749012 766749013 766749014

Methylene Chloride			

b. Method Blanks

Not all Method Blanks (MB) met QC acceptance. The compounds and samples that need to be flagged are listed in the table below. To determine if a detection requires qualification, first divide by the dilution factor. If the result is less than five times the concentration detected in the MB, it requires qualification. For common VOC contaminants (acetone, 2-butanone (MEK), methylene chloride, or toluene), the result requires qualification if it is less than ten times the concentration detected in the MB. The data qualifier applied is "Ub". All results for the failed compound(s) within the associated analytical batch receive a qualifier.

MW-CA-3		Groundwater	1	1	1	1	1	1				
MW-CA-4		Groundwater	1	1	1	1	1	1				
Field Duplicates	4 Groundwater Samples	Groundwater	4	4	4	4	4	4	1	1	1	1
LS-SW-01	Drum storage area near coil compactor area	Surface Water	1	1	1	1	1	1				
LS-SW-02	Downstream accessible point on storm drain or effluent discharge pipes	Surface Water	1	1	1	1	1	1				
LS-SW-03		Surface Water	1	1	1	1	1	1				
LS-SW-04		Surface Water	1	1	1	1	1	1				
LS-SW-05	Downgradient area near former DRI plant	Surface Water	1	1	1	1	1	1				
LS-SW-06	Bermed ponded area on southernmost parcel	Surface Water	1	1	1	1	1	1				
Field Duplicate	One Surface Water Sample	Surface Water	1	1	1	1	1	1				
LS-PW-01	Intertidal Zone of Sampit River	Pore Water	1	1	1	1	1	1				1
LS-PW-02	Intertidal Zone of Sampit River	Pore Water	1	1	1	1	1	1				1
LS-PW-03	Intertidal Zone of Sampit River	Pore Water	1	1	1	1	1	1				1
LS-PW-04	Intertidal Zone of Sampit River	Pore Water	1	1	1	1	1	1				1
Field Duplicate	One Pore Water Sample	Pore Water	1	1	1	1	1	1				1
Field Equipment Blank	Soil sampling equipment rinsate	Laboratory-provided deionized water	1	1	1	1						
Field Equipment Blank	Groundwater sampling equipment rinsate	Laboratory-provided deionized water	1	1	1	1						
Trip Blank	Assesses field and laboratory accuracy; One per shipment containing samples for VOC	Laboratory-provided deionized water	1									

* VOC analyses will not be conducted on surface soil samples.
PCBs = Polychlorinated biphenyls
TAL Metals = Target Analyte List Metals
TCL = EPA Target Compound List
SVOCs = Semivolatile organic compounds
VOCs = Volatile organic compounds
PFAS = Perfluorinated Alkyl Acids
Dissolved metals analysis conducted on field filtered groundwater samples.

Table 2. Explanation of Data Qualifiers

Liberty Steel Property

Georgetown, South Carolina

VCC 25-8848-NRP

Data Flag	Data Qualifier Explanation
J	The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample.
Jh	The reported concentration is approximate and probably biased towards higher values than the actual concentration of the analyte in the sample.
Jl	The reported concentration is approximate and probably biased towards lower values than the actual concentration of the analyte in the sample.
Jr	The analyte was positively identified above the method detection limit, but the reported numerical value is approximate because the detected concentration is below the practical quantitation limit.
R	The sample results are rejected due to serious deficiencies in the ability to analyze the sample and meet quality control criteria. The presence or absence of the analyte cannot be verified.
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
Ub	The sample result is qualitatively suspect because the analyte was detected in a field and/or laboratory blank at a similar level.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
