

REPORT

THE

S.C. SOLID WASTE MANAGEMENT ANNUAL REPORT FOR FISCAL YEAR 2024

SC DEPARTMENT of
**ENVIRONMENTAL
SERVICES**

Myra Reece, Interim Director

About This Report

This comprehensive report – prepared by the S.C. Department of Environmental Services (SCDES) – is a requirement of the S.C. Solid Waste Policy and Management Act of 1991 (Act) and must be submitted to the Governor and General Assembly annually by March 15.

Solid waste management (SWM) is the process associated with the generation, collection, transport, storage, treatment, disposal, and recovery of solid waste.

The Act outlines specific data and information required in this report including:

- **The amount of solid waste disposed of and incinerated by county;**
- **The amount and type of solid waste recycled by county;**
- **Identification of permitted solid waste management facilities and projection of remaining life of certain facilities;**
- **An estimate of current capacity to manage solid waste;**
- **The progress towards meeting the state’s waste reduction and recycling goals;**
- **Recommendations on improving solid waste management; and**
- **Revisions to the State Solid Waste Management Plan (State Plan) and an evaluation of progress made from the implementation of the State Plan.**

"The South Carolina Solid Waste Management Annual Report" (Annual Report) reflects SWM activities in fiscal year (FY) 2024 (July 1, 2023 – June 30, 2024).

What is measured?

The focus of this reporting is the measurement of two categories of solid waste.

1. **Municipal Solid Waste (MSW)** includes “everyday” items that are discarded from residential (i.e., single and multi-family homes), commercial (e.g., stores, office buildings, restaurants, hotels, groceries),

institutional (e.g., schools, colleges/ universities, government agencies, hospitals, military bases), and industrial sources (i.e., manufacturing). Items include:

- **Containers and packaging** (e.g., aluminum, glass, plastic, cardboard, steel);
 - **Durable goods** (e.g., appliances, carpet, rugs, electronics, furniture);
 - **Food waste;**
 - **Lead-acid batteries;**
 - **Non-durable goods** (e.g., clothing, paper, magazines);
 - **Tires;**
 - **Used motor oil from at-home oil changers;**
 - **Wood pallets; and**
 - **Yard trimmings.**
2. **Total Solid Waste (TSW)** is comprised of all solid waste that is generated, disposed of, and recovered. MSW – as defined in the Act – offers a narrow view while TSW provides a more realistic picture. TSW includes:
 - **Automobile bodies;**

Table of Contents

SECTION 2: Year at a Glance.....	4
SECTION 3: Solid Waste Planning.....	8
SECTION 4: Permitted Solid Waste Facilities.....	20
SECTION 5: Landfills & Disposal.....	27
SECTION 6: Recycling by Commodity.....	37
SECTION 7: Recycling by State & County.....	47
SECTION 8: Improving Solid Waste Management.....	74

- **Combustion ash;**
- **C&D debris;**
- **Industrial process waste** (i.e., scraps and by-products from manufacturing);
- **Land-clearing debris;**
- **MSW;**
- **Natural disaster debris;**
- **Processed waste tires;** and
- **Other material** (e.g., asbestos, contaminated soil, sludge, treated wood, manure).

Exported and imported waste is considered in the TSW totals. When discussing TSW generation, only South Carolina tonnages are included. However, only recycling tonnages generated in South Carolina counties are included in TSW calculations.

Data Sources

The data in this report is collected from multiple sources.

- **Permitted solid waste facilities;**
- **County governments;**
- **State agencies and colleges/universities;**
- **Businesses** (e.g., commercial, industrial);
- **S.C. Department of Commerce Recycling Market Development Advisory Council (RMDAC);** and
- **U.S. Census Bureau.**

Acknowledgements

The “S.C. Solid Waste Management Annual Report for Fiscal Year 2024” is published by SCDES’s Office of Solid Waste Regulation Development, Planning, and Reporting. The report is submitted in compliance with the Act (S.C. Code of Laws § 44-96-60). In addition, Act 119 of 2005 mandates that agencies provide all reports to the General Assembly in an electronic format.

Disclaimer

Every effort is made to ensure data accuracy. Any decisions on the use or omission of data were made with the goal of protecting the quality of information reported.

Recycling tonnages are rounded to the nearest hundredth and disposal data is rounded to the nearest ton. Some totals do not equal 100 percent due to rounding.

Data collection ended December 31, 2024.

Waste Reduction & Recycling Goals

By 2030, South Carolina’s goals are to:

1. **Reduce MSW disposal to 3.25 p/p/d or less;**
2. **Recycle at least 50 percent of its MSW;** and
3. **Reduce food loss and waste by 50 percent.**

Commonly Used Acronyms & Abbreviations

- **Act** - S.C. Solid Waste Policy and Management Act of 1991 (S.C. Code of Laws § 44-96-60)
- **C&D** - Construction and Demolition
- **EPA** - U.S. Environmental Protection Agency
- **FY** - Fiscal Year
- **FY24** - July 1, 2023 to June 30, 2024
- **MSW** - Municipal Solid Waste
- **p/p/d** - Pounds Per Person Per Day
- **SWM** - Solid Waste Management
- **TSW** - Total Solid Waste
- **SCDES** - S.C. Department of Environmental Services

S.C. Recycling Goal Calculations

Disposal and recycling data for this report is gathered from the following sources:

- **Permitted solid waste facilities** are required by the Act and subsequent regulations to submit annual reports of the amount of material disposed of to SCDES;
- **County governments, state agencies and state-supported colleges/universities** also are required to report the amount and type of material recycled; and
- **U.S. Census Bureau.**

It is important to recognize that businesses, municipalities and the recycling industry are encouraged, but not required to report their recycling efforts. Because this reporting is voluntary, the data collected from these sources

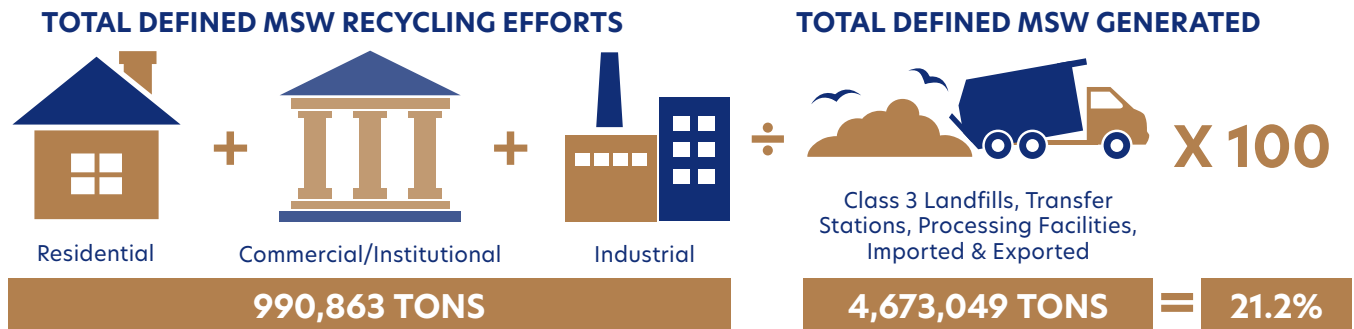

is inconsistent and impacts South Carolina's annual recycling rate.

The data is collected through two reporting systems - ReTRAC Connect and ePermitting. Re-TRAC Connect is used mainly by county and local governments as well as businesses while ePermitting is used by permitted solid waste facilities (e.g., landfills, transfer stations, processing facilities). The tables below show the formulas used to determine the per capita disposal and the county and state recycling percentages.

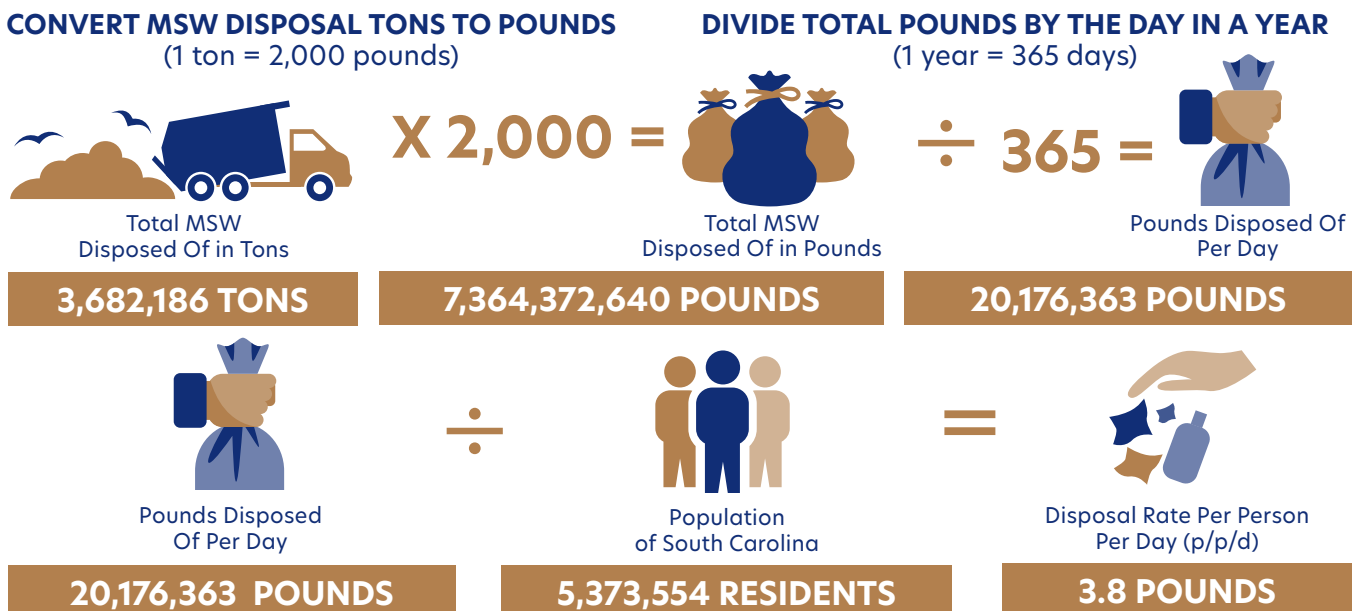

Every effort is made to ensure data accuracy. All decisions on the use or omission of data were made with the goal of protecting the quality of information reported. Recycling tonnages are rounded to the nearest hundredth and disposal numbers are rounded to the nearest ton. Some totals do not equal 100 percent due to rounding. Data collection ended December 31, 2024.

NOTE: See page 48, Table 7.4 for more information.

How to Calculate the Recycling Percentage

How to Calculate the Disposal Rate (p/p/d)

Year at a Glance

The tables below provide data for fiscal years (FY) 2020 to 2024. In South Carolina, FY24 runs from July 1, 2023 through June 30, 2024.

TABLE 2.1: S.C. MSW Recycled, Disposed Of, and Generated by FY¹

FISCAL YEAR	POPULATION	RECYCLED (tons)	RECYCLING RATE (percent)	RECYCLING RATE (p/p/d)	DISPOSAL (tons)	DISPOSAL RATE (p/p/d)	GENERATION (tons)	GENERATION RATE (p/p/d)
2020	5,160,714	1,141,299	24.4	1.2	3,541,739	3.8	4,683,038	5.0

¹ See Table 7.5 on page 49 for a breakdown by county of TSW recycling, disposal, and generation.

*As previously reported

TABLE 2.3: Cost of SWM for Local Governments by FY

FISCAL YEAR	EARNED REVENUE*	FULL COST**
FY20	\$3,280,131.55	\$390,455,836
FY21	\$12,920,373.68	\$380,041,946
FY22	\$14,378,824.39	\$422,970,685
FY23	\$9,056,222.57	\$483,780,722
FY24	\$9,938,030.81	\$540,899,863

* Earned Revenue is money local governments (those that reported) earned from the sale of their recyclables. The number of counties reporting varies from year to year.

** Full cost is the total amount of money local governments spent on solid waste activities.

TABLE 2.4: Solid Waste Disposal and Recycling Costs in FY24

SOLID WASTE COLLECTION COST	SOLID WASTE DISPOSAL COST	RECYCLING COST	OTHER SOLID WASTE COSTS	CALCULATED TOTAL SOLID WASTE COSTS	POPULATION	CALCULATED PER CAPITA COSTS
\$277,003,598.55	\$201,260,079.93	\$42,101,682.29	\$20,534,502.07	\$540,899,862.84	5,373,554	\$100.66

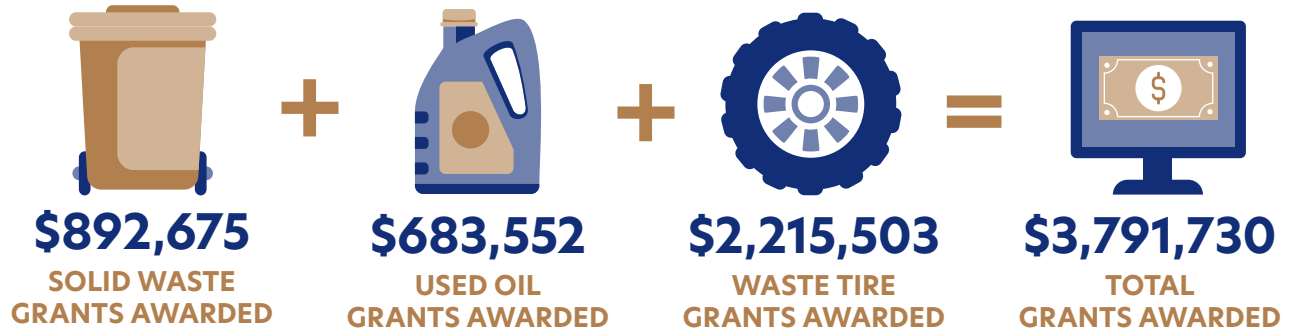

Recycling Grants

SCDES's Office of Solid Waste Reduction and Recycling maintains three recycling grant programs for local governments.

- **Solid Waste Grant** funds can be used for general recycling projects and/or recycling education. In FY24, 44 grants were awarded totaling \$892,674.82.
- **Used Oil Grant** funds can be used for used motor oil related recycling. In FY24, 42 grants were awarded totaling \$683,552.00.
- **Waste Tire Grant** funds can be used for waste tire stockpile clean-ups, waste tire collection programs and public education. In FY24, 29 grants were awarded totaling \$2,215,502.59

TABLE 2.5: Recycling Grants Awarded for FY20 to FY24

FISCAL YEAR	SOLID WASTE	USED OIL	WASTE TIRE
FY20	\$1,142,939.50	\$711,215.00	\$1,993,387.16
FY21	\$1,705,084.00	\$688,066.60	\$3,343,126.35
FY22	\$683,747.00	\$650,540.00	\$2,156,953.10
FY23	\$713,400.00	\$704,953.00	\$2,215,065.00
FY24	\$892,674.82	\$683,552.00	\$2,215,502.59
TOTAL	\$5,137,845.32	\$3,438,326.60	\$11,924,034.20

S.C. Electronics Clearinghouse Update

The S.C. Manufacturers Responsibility and Consumer Convenience Act (S.C. Code of Laws § 44-96-130) was passed in 2010 imposing a landfill ban of specific residential electronics (i.e., computers, printers, televisions and computer monitors) and creating recycling obligations for electronics manufacturers. The legislation was revised in 2022 and among the changes set up the S.C. Electronics Clearinghouse for county governments.

The legislation also requires SCDES to provide data supplied by the manufacturers in this report. During calendar year 2024, 19 counties (shown in blue on the map) participated in the clearinghouse.

Solid Waste Planning

State Plan Requirements

SCDES is required by law to maintain a state solid waste management plan (State Plan). The State Plan is required by the Act to address a 20-year planning period and at a minimum include:

- **An inventory of the amounts and types of solid waste currently being disposed of** at solid waste disposal facilities in the state;
- **An estimate of the amount of solid waste that will require disposal at solid waste disposal facilities** in the state for the projected planning period;
- **An estimate of current capacity in the state to manage solid waste** - including the identification of each solid waste management facility or treatment method and a projection of its remaining useful life;
- **An analysis of the types of solid waste facilities that will be needed** to manage the state's solid waste during the projected planning period; and
- **Recommendations on how to achieve the state's waste reduction/recycling goals.**

The complete list of requirements for the State Plan is in the Act (S.C. Section 44-96-60).

SCDES Guidance for Local Plans

The Act is the state law governing solid waste management. Local governments and regions are required to maintain solid waste management plans (local plans) that are consistent with the State Plan. Each local government and regional plan should address the requirements of the Act in a format chosen by the local government or region. Local government and regional plans should include specific information for the county or member counties and each city, town, or service area located in the county or region.

In general, for a 20-year planning period, local plans should clearly provide for the management of existing, projected, and potential solid waste streams through a combination of reduction, recycling, disposal, and treatment options. How the local government intends to provide for the management of each waste stream should be supported by a discussion of current and future

capacity of existing facilities and treatment methods, waste stream projections, and other factors the local government deems relevant when planning for the management of its solid waste.

Because local governments are responsible for providing for the management of all solid waste, the local plan should include a detailed discussion of each solid waste stream the county or region manages, and could potentially manage, and all the collection, transfer, recycling, treatment, and disposal methods available for each waste stream, for each county, town, and city.

State Plan Overview

- **On November 27, 1992, SCDES published the first State Plan, pursuant to the Act.** As required by the Act, subsequent annual reports have been developed each FY.
- **In 1998, SCDES adopted EPA's definition of MSW.**
- **On June 29, 1999, SCDES approved a revised State Plan.** The FY98 annual report and State Plan were approved and published as one document.
- **On February 9, 2006, the State Plan was amended** to include criteria for Research, Development, and Demonstration (RD&D) permitted facilities that utilize emerging technologies.
- **In 2011, the South Carolina Manufacturer Responsibility and Consumer Convenience Information Technology Equipment Collection and Recovery Act (e-Scrap Act) became effective.** This act was passed in order to promote the recycling of electronic devices at the end of their useful life.
- **In 2011, SCDES adopted new state solid waste recycling and reduction goals,** which were to recycle 40 percent or more of the state's MSW and to reduce the state's average per capita disposal to 3.25 p/p/d. This goal expired in 2020. The Act [S.C. Section 44-96-50 (F)] requires recycling and waste reduction goals to be revised.
- **In 2021, SCDES announced an updated solid waste recycling goal** with the publication of the FY21 annual report. The state's original reduction goal remained the same. With the adoption of EPA's new recycling goal - by 2030 and beginning in FY23 - new state solid waste recycling and reduction goals are to recycle 50 percent or more of the state's MSW and to reduce the state's average per capita disposal to 3.25 p/p/d.

The State Plan and its annual report updates should function as planning tools for local governments for the planning period. When writing and revising county or regional plans, local governments and regional governing bodies should refer to the state’s annual report for historical disposal and recycling data reported to SCDES for each county. Local governments should use appropriate local standards when calculating and determining projected solid waste maintenance needs for the planning period. SCDES maintains copies of local plans in the Division of Mining and Solid Waste Management (DMSWM). Solid waste planning, consistency, and demonstration of need (DON) assistance is available from DMSWM.

Additional SCDES Responsibilities

Beyond the State Plan, SCDES has additional responsibilities including:

- **Determining consistency** with state and local or regional solid waste management plans; and
- **Approving DON** for certain solid waste management facilities.

CONSISTENCY DETERMINATIONS

Before a solid waste management facility can be permitted, it must be determined by SCDES to be consistent with the State Plan and the local county or regional plan. SCDES looks at many factors when reviewing the local county or regional plan and making a consistency decision.

DEMONSTRATION OF NEED (DON)

DON refers to the criteria established for the:

- **Geographical placement**; and
- **Allowable annual disposal rate** of new and expanding solid waste management facilities.

The original DON regulation was put into effect in June 2000. On June 26, 2009, a revision to Regulation 61-107.17 SWM: Demonstration-of-Need became effective. The DON regulation addresses:

- **Commercial Class 3 landfills**;
- **Commercial Class 2 landfills**;
- **Commercial solid waste incinerators** that incinerate waste other than wood waste or yard trimmings; and

- **Commercial solid waste processing facilities** that process waste destined for disposal at Class 3 landfills.

The DON regulation stipulates that where there are at least two commercial solid waste management facilities of the same type within a specified planning area, no new facility is allowed. Non-commercial facilities are not required to demonstrate need. The data in Tables 3.2 and 3.3 is used for calculating annual tonnage limits as related to R.61-107.17 effective June 26, 2009. The historical data has been adjusted to reflect changes in the DON regulations.

CLASS 2 LANDFILLS

Class 2 landfills accept land-clearing debris, industrial process waste, C&D debris, household furniture and animal carcasses under specified conditions. Class 2 landfills have a 20-mile planning radius. (See pages 14-15 for a map detailing Class 2 landfill locations and planning radii.)

Local Plan Overview

County governments or regions are required to develop local plans that are consistent with the State Plan. These plans should be designed to achieve the current recycling and reduction goals, are required to address a 20-year planning period, and at a minimum include:

- **An estimate of the amount of solid waste being disposed of at solid waste disposal facilities** in the county or region and a projection of the amount of solid waste that will be disposed of at solid waste disposal facilities during the planning period;
- **An estimate of the current capacity within the county or region to manage its solid waste** - including an identification of each solid waste management facility or treatment method and a projection of its remaining useful life;
- **An analysis of existing and new solid waste facilities and treatment methods that will be needed** to manage the county's or region's solid waste during the projected planning period;
- **The designation of a recycling coordinator, description of the recycling program, and outreach/education initiatives**;
- **An outline on how the county or region plans to meet South Carolina's waste reduction and recycling goals**; and
- **An estimate of the cost of implementing the plan.**

The complete list of requirements for local plans may be found in the Act (S.C. Section 44-96-80).

SCDES calculates allowable annual disposal at new Class 2 landfills using:

- **100 percent of the host county generation;** and
- **30 percent of the generation in other counties within the planning area.**

Tonnage increases for existing Class 2 facilities are allowed only if the facility is operating within 20 percent of its permitted amount, (i.e., the amount of waste disposed per year is 80 percent or more of the annual permitted capacity). If a Class 2 landfill qualifies for an increase, it can receive the lesser of:

- **The increased amount of disposal in the planning area** since the last permitted increase; or
- **50,000 tons.**

Class 2 landfills operating on the effective date of the regulation may be allowed variances from certain DON requirements with respect to replacement facilities and expansions. See Table 3.2 for Class 2 waste generated for disposal by county for use in DON.

CLASS 3 LANDFILLS

Class 3 landfills accept MSW, industrial process waste, sewage sludge, non-hazardous MSW incinerator ash, and other non-hazardous waste. For new commercial Class 3 landfills, allowable tonnage is calculated using:

- **100 percent of the host county generation;** and
- **50 percent of the waste generated in other counties within the planning area.** (None is counted from other counties that have an existing commercial Class 3 landfill.)

Class 3 landfills have a 75-mile planning radius. (See pages 16-17 for a map detailing Class 3 landfill locations and planning radii). The yearly disposal rate at an existing landfill is allowed to increase only if the facility is within 20 percent of its permitted disposal rate (i.e., the amount of waste disposed of per year is 80 percent or more of the annual permitted capacity). If a Class 3 landfill qualifies for an increase, it can receive the lesser of:

- **The amount that disposal in South Carolina has increased since the facility last received a permitted increase;** or
- **150,000 tons.**

In addition, the allowable yearly disposal rate at any Class 3 landfill cannot exceed 30 percent of the total solid waste generated in South Carolina that is destined for disposal in Class 3 landfills. Class 3 landfills operating on the effective date of the regulation are allowed variances from certain DON requirements. See Table 3.3 for Class 3 waste generated for disposal by county for use in DON.

SOLID WASTE INCINERATORS

The yearly throughput for a solid waste incinerator is based on the manufacturer's design of the incinerator, but it cannot exceed 600 tons per day. The DON regulation does not apply to air curtain incinerators that receive only wood waste and yard trimmings. The planning area for a solid waste incinerator is 75 miles. There currently are no permitted MSW incinerators in the state.

SOLID WASTE PROCESSING FACILITIES

The maximum allowable yearly throughput of a solid waste processing facility that processes waste destined for disposal at a Class 3 landfill is equal to:

- **100 percent of the solid waste destined for disposal that is generated in the host county;** and
- **50 percent of the waste generated in each county other than the host county that falls wholly or partially within the 75-mile planning radius.**

See pages 18-19 for a map detailing Class 3 Solid Waste Processing Facility locations and planning radii. Solid Waste processing facilities that process waste destined for recycling or disposal in a Class 1 or Class 2 landfill are not required to demonstrate need.

STATE SOLID WASTE REGULATIONS

Federal, state, and local governments passed and continue to promulgate environmental laws to protect human health and the environment. EPA is the branch of the federal government that enforces the federal environmental laws and state environmental agencies enforce federal as well as state laws. SCDES is responsible for writing and enforcing environmental laws and regulations. Solid waste regulations are provided in Table 3.1. To view current solid waste laws and regulations, please visit des.sc.gov/RegulationsTable.

TABLE 3.1: S.C. Solid Waste Regulations

REGULATION	NAME	EFFECTIVE DATE
61-107.1 SWM	Solid Waste Management Grants, Recycling Education Grants, and Waste Tire Grants	April 23, 1993
61-107.2 SWM	Full Cost Disclosure	April 23, 1993

61-107.4 SWM Previously referred to as Regulation 61-107.4 SWM	Compost and Mulch Production from Land-clearing Debris, Yard Trimmings and Organic Residuals (Previous Name: Yard Trash and Land-Clearing, Debris; and Compost)	April 23, 1993 (revised May 28, 2021)
61-107.5 SWM	Collection, Temporary Storage and Transportation of Municipal Solid Waste	May 28, 1993
61-107.6 SWM	Solid Waste Processing Facilities	June 23, 1995
61-107.7 SWM	Transfer of Solid Waste	May 28, 1993
61-107.8 SWM	Lead-Acid Batteries	June 23, 1995
61-107.9 SWM	White Goods	June 25, 1993
61-107.10 SWM	Research, Development, and Demonstration Permit Criteria	June 25, 1993
61-107.11 SWM Repealed and replaced by R.61-107.19.	Construction, Demolition, and Land-Clearing Debris Landfills	April 24, 1998
61-107.12 SWM	Solid Waste Incineration and Solid Waste Pyrolysis Facilities <ul style="list-style-type: none"> Created a separate section for air curtain incineration facilities and reduced some of the application requirements for these facilities to obtain a permit. Also added public noticing requirements and revised other sections of the regulation for clarity and consistency with other Solid Waste Management regulations. 	May 28, 1999 (updated June 24, 2016)
61-107.13 SWM Repealed and replaced by R.61-107.19.	Municipal Solid Waste Incinerator Ash Landfills	May 27, 1994
61-107.14 SWM	Municipal Solid Waste Landfill Operator's Certification	May 27, 1994
61-107.15 SWM	Land Application of Solid Waste	July 26, 1996
61-107.16 SWM Repealed and replaced by R.61-107.19.	Industrial Solid Waste Landfills	June 26, 1998
61-107.17 SWM	Demonstration-of-Need	June 2000 (revised June 26, 2009)
61-107.18 SWM	Off-Site Treatment of Contaminated Soil	May 25, 2001
61-107.258 SWM Repealed and replaced by R.61-107.19.	Municipal Solid Waste Landfills	June 23, 1995
61-107.279 SWM	Used Oil <ul style="list-style-type: none"> Removed the requirement for used oil fuel marketers to be permitted. Added language addressing allowable levels for PCBs under this regulation to comply with EPA standards. Revised violations and penalties to conform to other solid waste management regulations. Added language for clarity and corrected minor clerical errors. 	July 28, 1995 (revised June 24, 2016)
61-107.19 SWM	Solid Waste Landfills and Structural Fill Replaced and simultaneously repealed regulations: <ul style="list-style-type: none"> 61-107.11 Solid Waste Management: Construction, Demolition, and Land-Clearing Debris Landfills; 61-107.13 Solid Waste Management: Municipal Solid Waste Incinerator Ash Landfills; 61-107.16 Solid Waste Management: Industrial Solid Waste Landfills; and 61-107.258 Solid Waste Management: Municipal Solid Waste Landfills. 	May 23, 2008
61-124 SWM	Consumer Electronic Equipment Collection and Recovery <ul style="list-style-type: none"> The e-Scrap Act established requirements for the sale, management, and recovery of covered electronic devices (CEDs), specifically household computers, printers, monitors, and televisions. The purpose of Regulation 61-124 is to execute the provisions of the e-Scrap Act and applies to the management of consumer computers, printers, monitors, and televisions by the manufacturers, retailers, and recoverers of these devices. 	February 26, 2016 (regulation repealed)
61-107.20 SWM	Solar Energy Systems	May 24, 2024

*Disposal of coal ash associated with site cleanups were excluded from the DON tables.

Demonstration of Need Map

Class 2 Landfills

As of June 30, 2024

CLASS 2

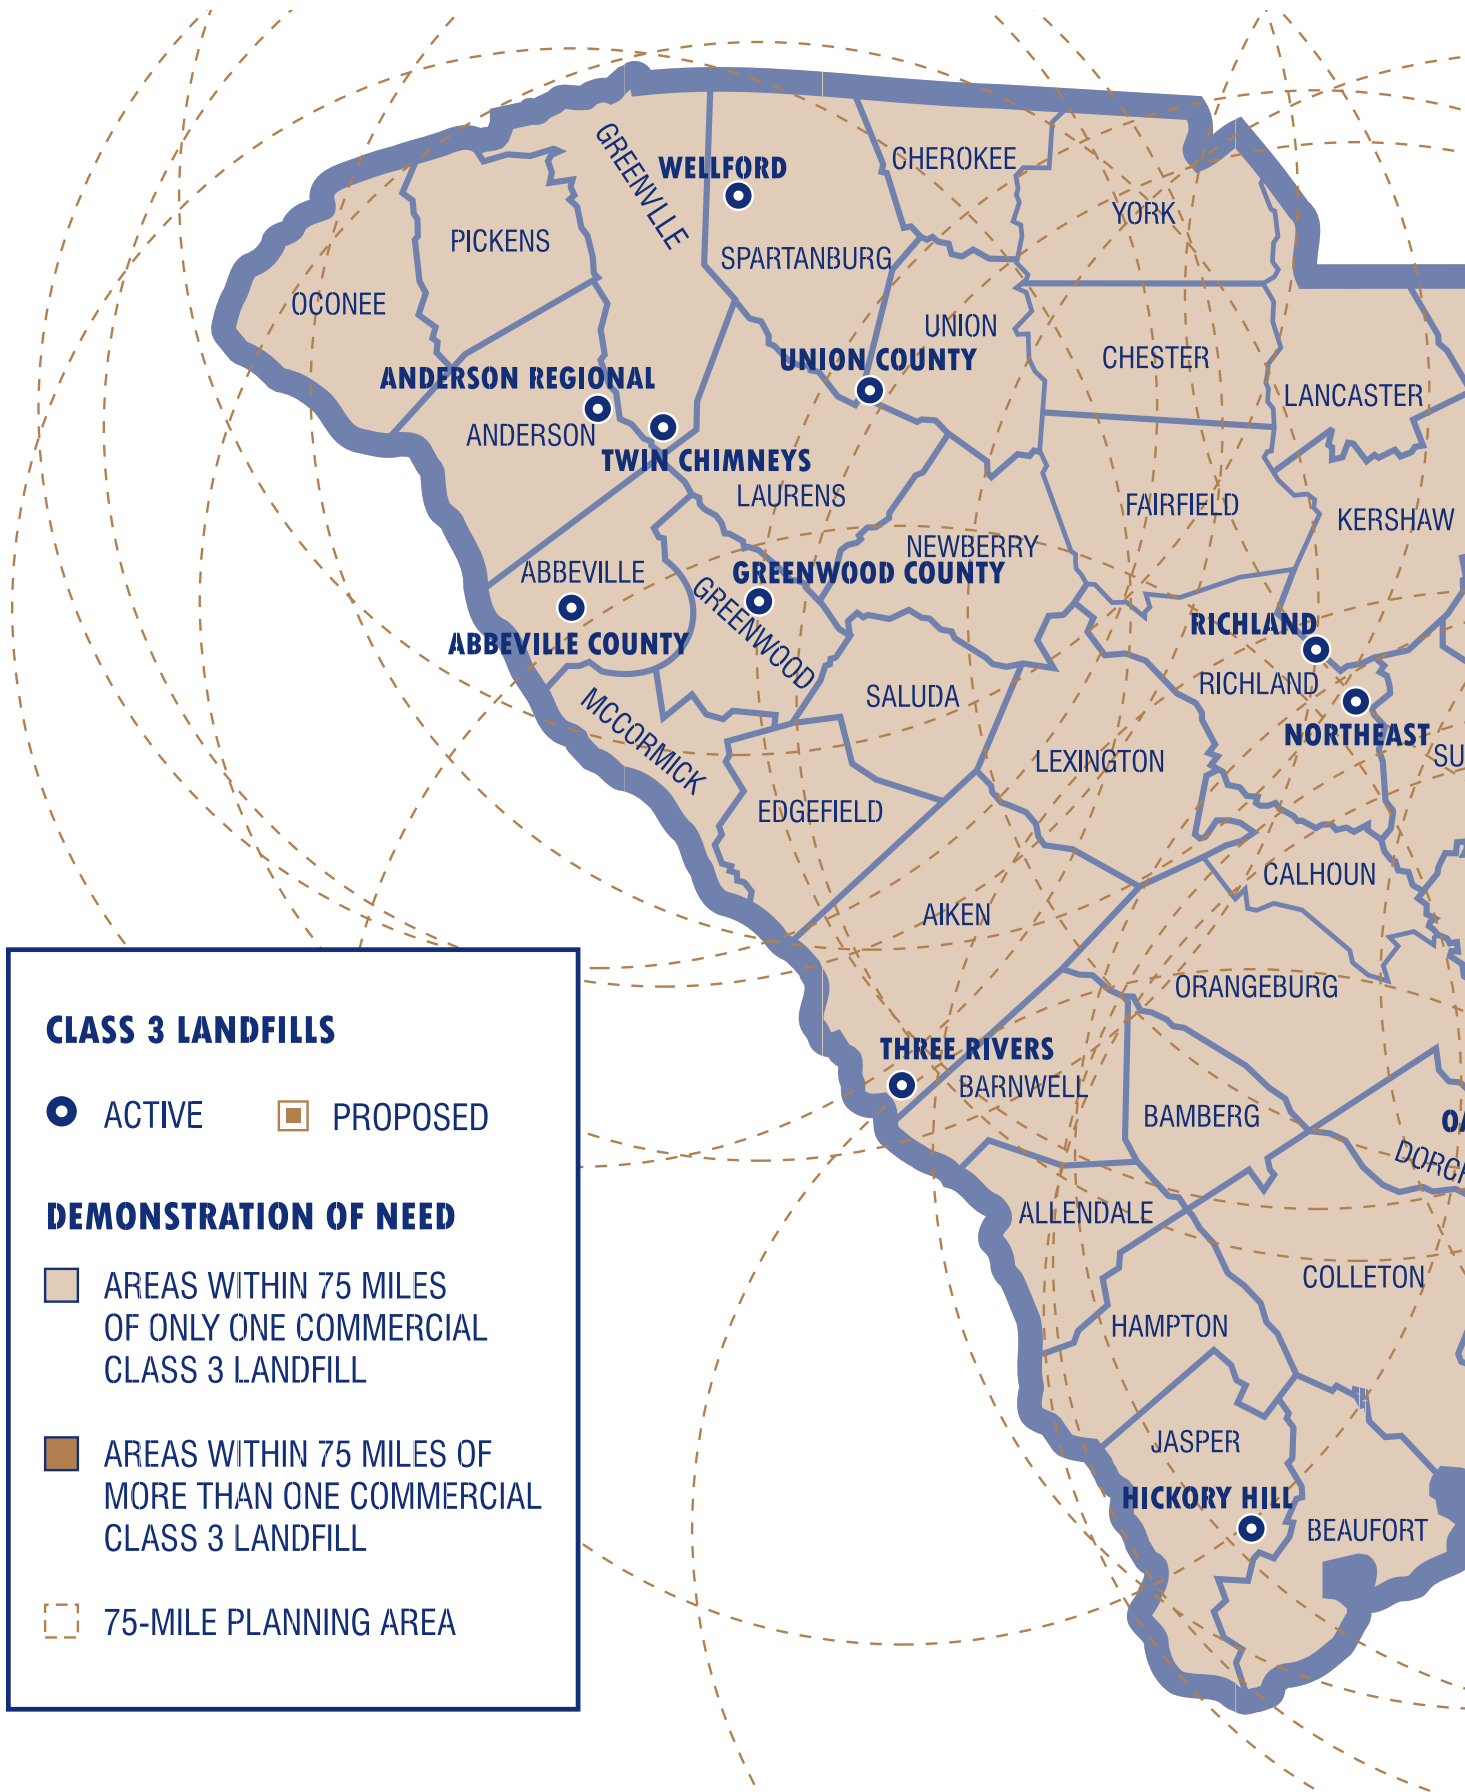

- Limits waste streams as specified in Regulation 61-107.19 SWM: Solid Waste Landfills and Structural Fill
- Waste that is characterized as less than 10 times the maximum contaminant level (MCL) and approved by SCDES may be added to the permit for acceptance/disposal

Operational Criteria:

- Unauthorized waste may be stored at the facility for 30 days; except that putrescible waste must be removed within 72 hours
- An annual survey to determine landfill capacity used and the remaining permitted capacity may be required
- Require scales - but exempts scales for facilities permitted for less than 10,000 tons per year and on-site landfills

Design Criteria:

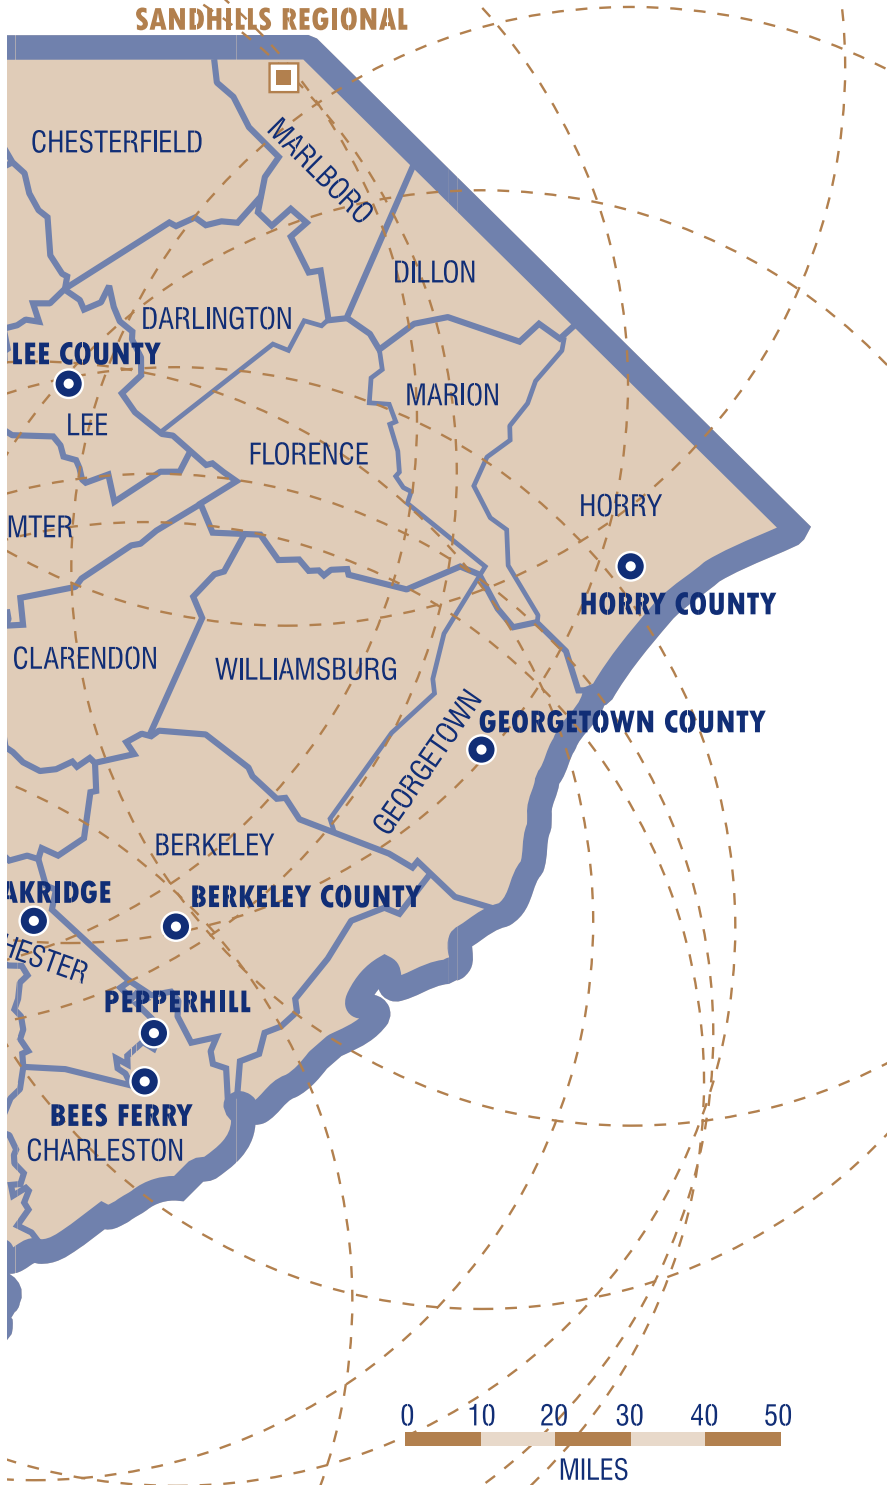

- Require settlement calculations on the base grades
- Require SCDES to inspect the landfill prior to waste placement
- Set cap requirements at 2 feet of soil
- Establish certain buffers when "Notice of Intent to File a Permit Application" is published
- Require groundwater monitoring and corrective action
- Set post-closure (20 years)
- Require closure and post-closure financial assurance

Demonstration of Need Map

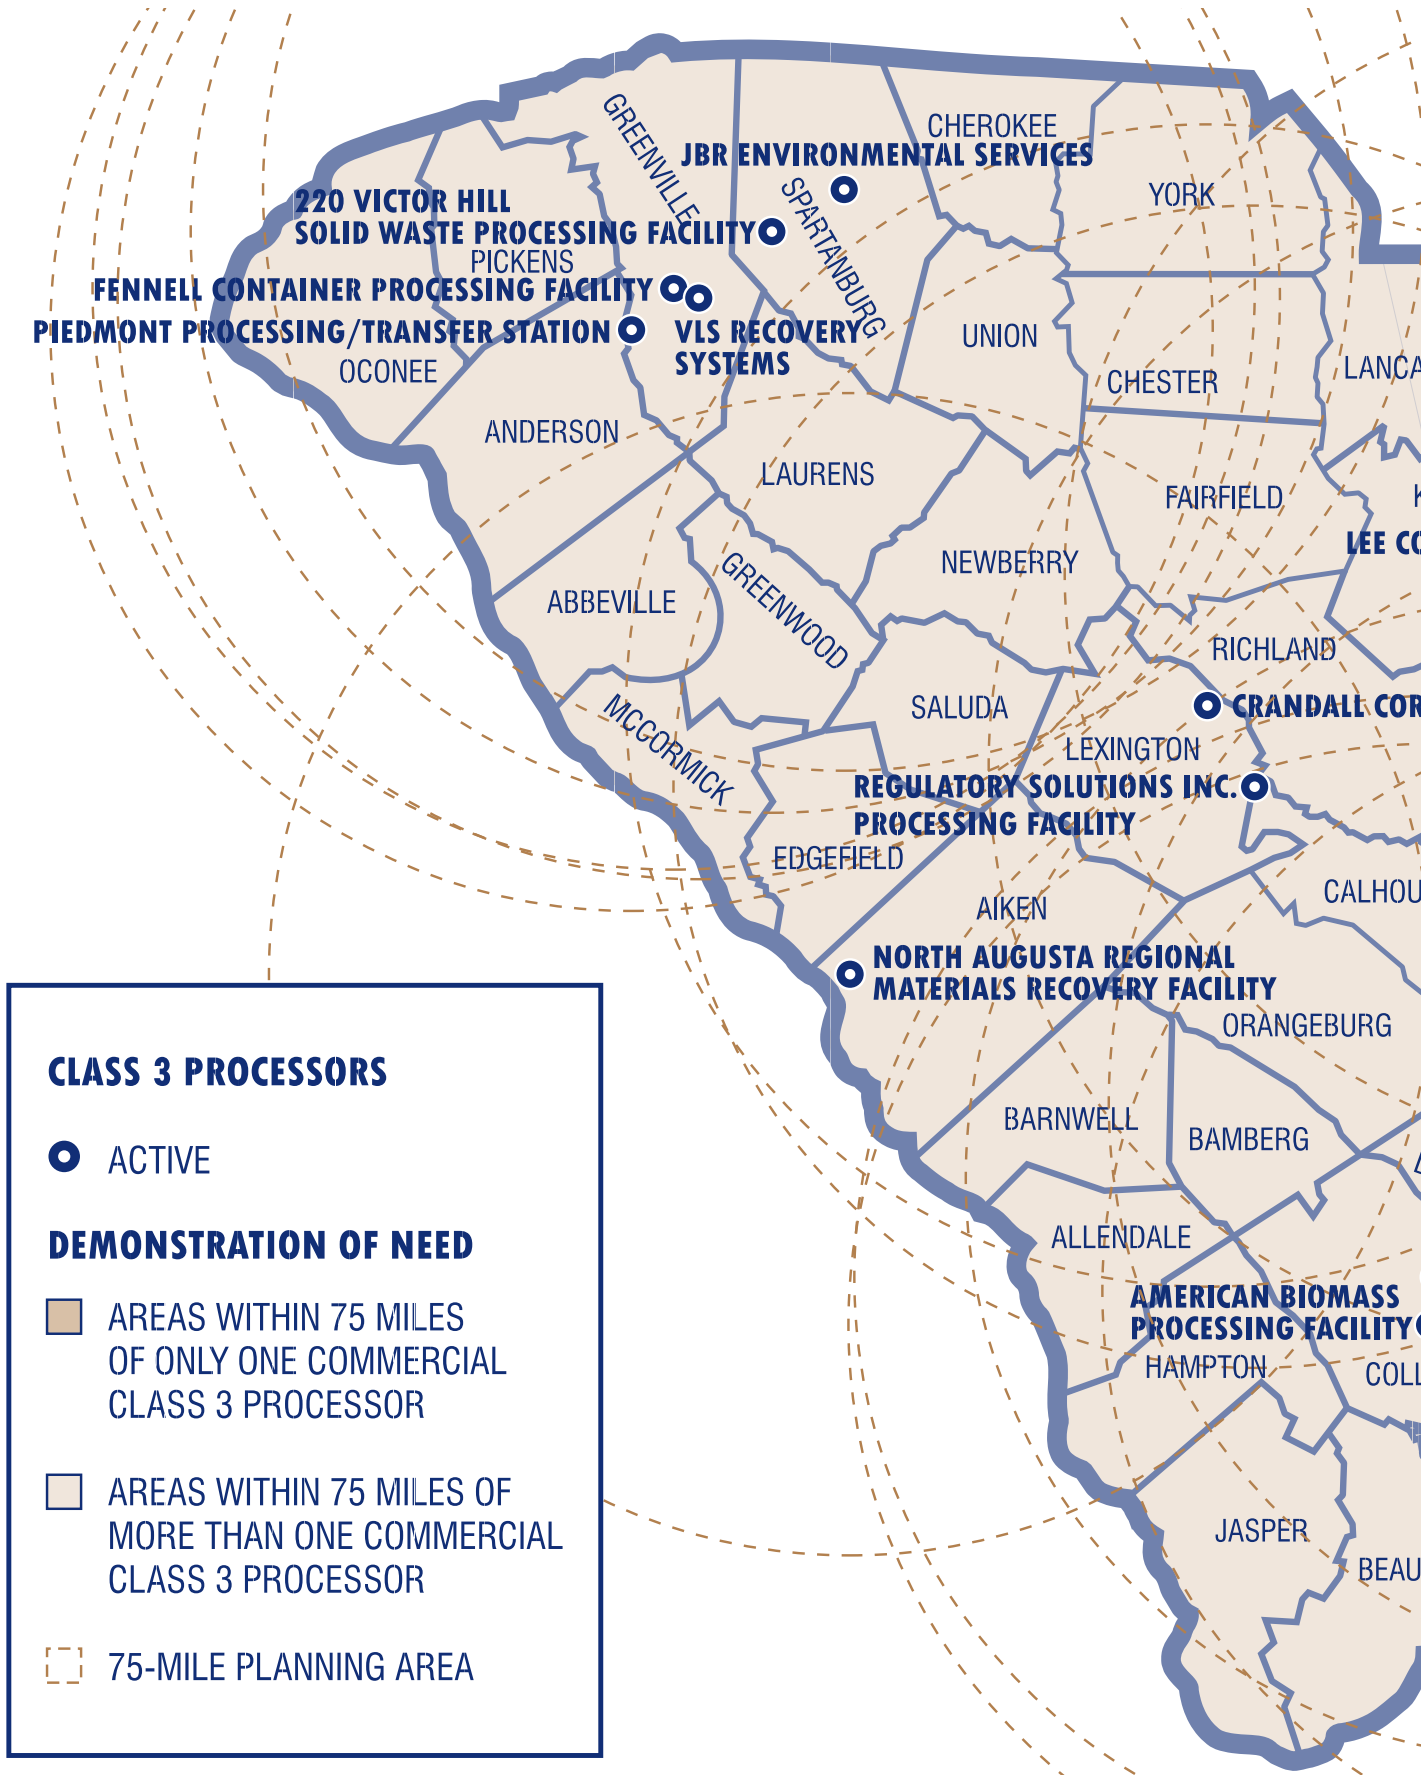

Class 3 Landfills

As of June 30, 2024

CLASS 3

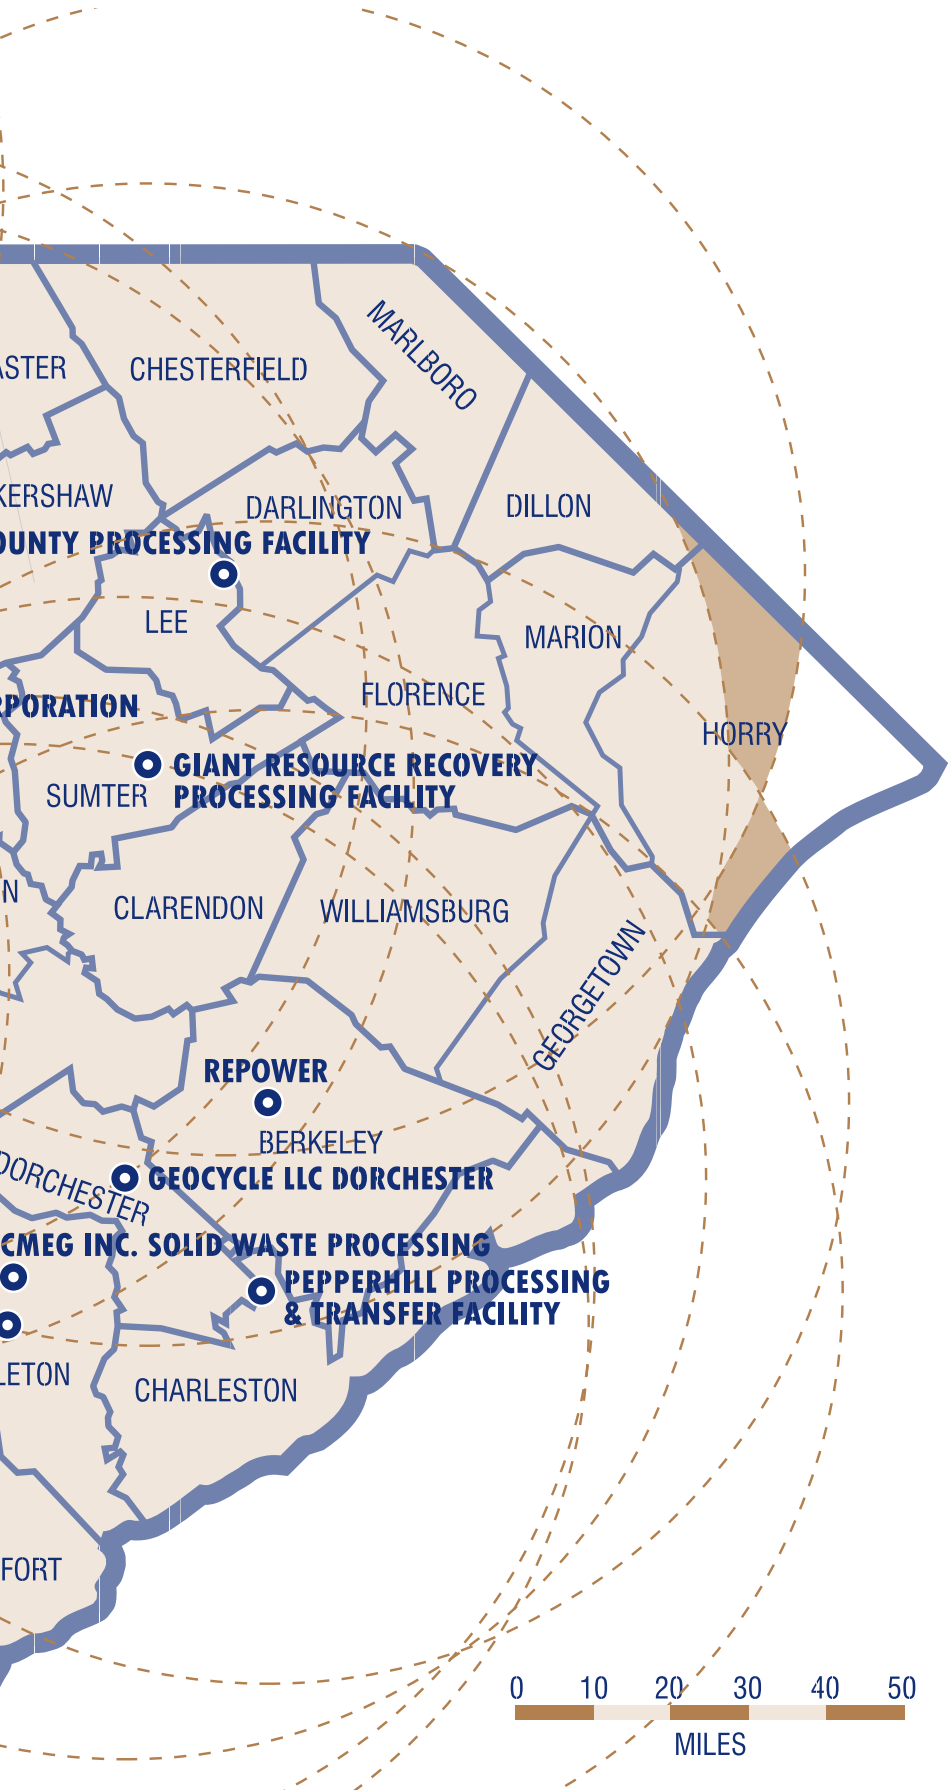

- Requires waste characterization through the Special Waste Analysis and Implementation Plan
 - Requirement to inspect 10 percent of incoming loads
 - Landfills that were permitted as Industrial Solid Waste Landfills prior to the effective date of Regulation 61-107.19 are exempt from design criteria provided the waste streams remain below 30 times the MCLs
 - Leachate recirculation allowed under permit modification
 - Buffers established when "Notice of Intent to File a Permit Application" is published
 - Notification required within 72 hours of receipt of hazardous or PCB waste
 - Slope-stability requirements
- Certification testing of cap to include:
- One permeability test per acre
 - Four density/thickness tests per acre

Demonstration of Need Map

Class 3 Solid Waste Processing Facilities

As of June 30, 2024

Permitted Solid Waste Facilities

SCDES regulates solid waste facilities and activities through permits or registrations.

In FY24, South Carolina had 431 and 12 types of permitted solid waste facilities. See Tab 4.1 for additional information. Several permits apply to multiple facility types. For example, there are three types of composting facilities, landfills and transfer stations.

Beyond permits, SCDES requires registration for solid waste activities including lead-acid battery collectors, used oil transporters, waste tire haulers, and C&D debris recyclers.

Composting & Wood-Grinding Facilities

These facilities convert land-clearing debris, yard trimmings, and/or organics residuals into compost, mulch, and boiler fuel. Type is determined by feedstock.

Facility types include:

- **TYPE 1 FACILITIES** grind or compost only source separated organic residuals described as Category 1 feedstocks;
- **TYPE 2 FACILITIES** compost only source separated compostable materials described as Category 2 feedstocks or mixtures of Category 1 and Category 2 feedstocks; and
- **TYPE 3 FACILITIES** compost Category 3 feedstocks or mixtures of Category 3 feedstocks with other feedstock categories.

All feedstocks are listed in the Appendix in R.61-107.4 SWM: Compost and Mulch Production from Land-Clearing Debris, Yard Trimmings, and Organic Residuals.

Solid Waste Transfer Stations

These facilities accept and transfer solid waste from collection vehicles to larger vehicles for movement to another facility prior to its processing and disposal. As of June 30, 2024, there were 43 permitted transfer stations - seven Class 2, and 36 Class 3 - located across 31 counties.

C&D Debris

C&D debris is non-hazardous solid waste generated during the construction, remodeling, repair, or demolition of homes, buildings, roads, and bridges. C&D debris (as outlined in the Act) is not part of MSW. It is measured, however, given the sheer amount of material generated. Registered C&D debris recyclers are required to report to SCDES each calendar year while other solid waste facilities report each fiscal year. See Table 4.5 for additional information.

Solid Waste Processing Facilities

Processors reduce or alter the volume and chemical or physical characteristics of solid

(Continued on page 23)

waste through processes such as shredding, baling, sorting, or bulking waste. These actions result in the generation of a new waste stream. The newly generated waste stream is then delivered to a recycling, treatment, or disposal facility.

For reporting purposes, waste received from a processing facility is attributed to the county where the processor is located. In FY24, there were 25 processors located in 16 counties as shown in Table 4.6.

Waste Tire Facilities

There are two types of waste tire facilities in the state - collectors and processors. Processors recover reusable by-products from waste tires or cut, burn, or alter waste tires so the tires are no longer whole. This includes baling, compacting and pyrolysis. In FY24, there were 12 facilities located in 12 counties as seen in Table 4.7.

Used Oil

There are two types of used oil facilities - processors and burners. Processors are operations designed to produce or make used oil more amenable for production of fuel oils, lubricants, and other products. Burners refer to facilities that burn off-specification used oil for energy recovery. In FY24, there were 12 facilities in 8 counties as seen in Table 4.8.

Structural Fill

A structural fill is the filling of a natural low-lying area with land-clearing debris, hardened concrete/cured asphalt, bricks,

and/or masonry blocks for future beneficial use. These fills may not provide a structural base for building purposes. In FY24, there were 4 permitted structural fills as seen in Table 4.9.

Land Application & Soil Treatment Facilities

Land application permits refer to builders, farmers, and others that place non-hazardous solid waste on or into soil that is being used for agricultural, silvicultural, and horticultural beneficial purposes and not as a means of disposal. In FY24, there were 4 facilities

approved to land apply solid waste as shown in Table 4.10. Soil treatment facilities treat contaminated (e.g., by petroleum) soil. In FY24, there was 1 facility permitted as shown in Table 4.10.

Incinerators

There are two types of incinerators - solid waste and air curtain. Currently, there are no permitted solid waste incinerators in the state. Air curtain incinerators are used to reduce the volume of land-clearing debris. All 3 air curtain incinerators were located in Beaufort County as seen in Table 4.11.

TABLE 4.6: Permitted Solid Waste Processing Facilities in FY24

Beaufort	Oliver's Clean Burn	Air Curtain Incinerator	1,620 CY	9,029

Landfills & Disposal

The Act and subsequent regulation require permitted public and private solid waste facilities to report to SCDES the amount and type of solid waste disposed of, incinerated, or exported.

The types of solid waste measured are:

- **MSW** as defined in the Act (page 1); and
- **TSW** is all solid waste disposed of including MSW, C&D debris, ash, industrial process waste, processed tires, and land-clearing debris.

Almost all solid waste not recovered is disposed of in landfills with a small amount incinerated or exported.

In FY24, South Carolina had 135 permitted solid waste landfills as seen in Table 5.1. Tables 5.3 to 5.14 show all disposal information for FY24.

Imported & Exported Solid Waste

South Carolina both imports and exports solid waste. The vast majority of imported solid waste is MSW but may include other material. The majority of all solid waste is disposed of in Class 3 landfills. For reporting purposes, imported solid waste is not counted as part of the state's solid

waste generation since the waste is generated out of the state. Waste generated in South Carolina and waste exported to other states is counted.

Class 1 Landfills

Only land-clearing debris can be disposed of in Class 1 landfills. However, land-clearing debris can also be disposed of in Class 2 landfills. The amount of material disposed of in Class 1 landfills was 47,932 tons - a decrease of 3,578 tons from FY23. See Table 5.8 for more information.

Class 2 Landfills

Class 2 landfills accept three types of waste:

1. **C&D debris**;
2. **Land-clearing debris** (e.g., trees, stumps, wood chips generated from land-clearing activities, yard trimmings that have not come

TABLE 5.1: S.C. Landfill Classifications

TYPE	NUMBER OF FACILITIES IN FY24	WASTE ACCEPTED
Class 1	29	Land-Clearing Debris
Class 2	77	C&D Debris, Land-Clearing Debris & Industrial Process Waste
Class 3	29	MSW, C&D Debris & Industrial Process Waste

TABLE 5.2: Sources & Examples of MSW

SOURCES	WASTE ACCEPTED
Residential (e.g. single-family homes, multi-family homes)	Appliances, bottles, cans, jars, cardboard, newspaper, paper, food, yard waste trimmings, clothing, electronics
Commercial (e.g. office buildings, retail establishments, hotels, restaurants)	Cardboard, office paper, cafeteria waste (e.g., food, bottles, cans), yard trimmings
Institutional (e.g. schools, libraries, hospitals, prisons)	Books, cardboard, office paper, cafeteria waste (e.g., food, bottles, cans), yard trimmings
Industrial Office/Packaging (e.g., warehouses, manufacturing facilities)	Cardboard, office paper, wood pallets, plastic film, cafeteria waste (e.g., food, bottles, cans)

TABLE 5.3: Disposal in South Carolina by FY

	FY20	FY21	FY22	FY23	FY24
MSW Disposed Of (tons)	3,541,739	3,772,282	3,951,239	4,311,032	3,682,186
MSW Disposed Of (p/p/d)	3.8	4.0	4.2	4.5	3.8
TSW Disposed Of (tons)	9,399,943	11,436,163	12,113,909	12,992,863	13,191,355
TSW Disposed Of (p/p/d)	10.0	12.2	12.8	12.8	13.5

into contact with petroleum products or hazardous constituents); and

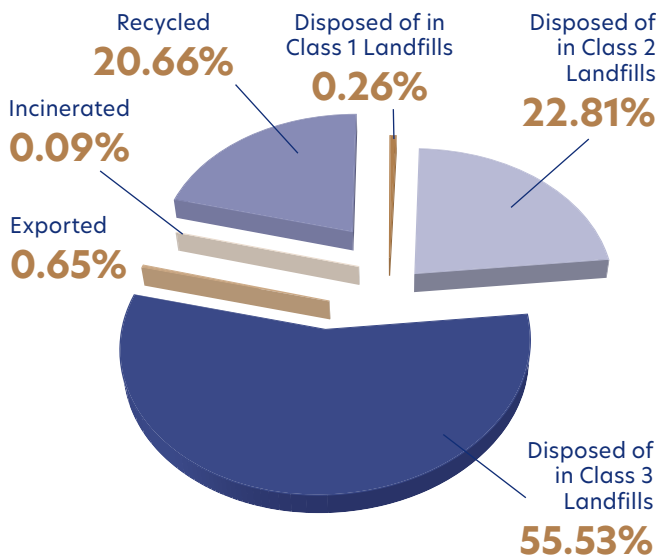

3. Industrial process waste (e.g., scraps and by-products from the manufacturing process).

In FY24, the amount of solid waste disposed of in Class 2 landfills was 3,963,026 tons - an increase of 162,081 tons from FY23. See Table 5.9 for more information.

Class 3 Landfills

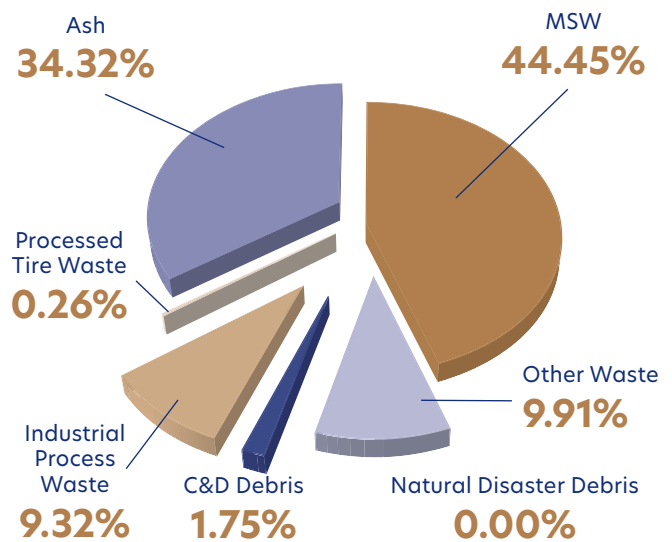

Class 3 landfills are identified as commercial or non-commercial - with the non-commercial designation signifying that the landfill only accepts waste generated on-site under the same ownership or control of the facility. Class 3 landfills accept MSW, C&D debris, and industrial process waste. See Figure 5.10 for a map of Class 3 landfill locations at the close of FY24.

CHART 5.4: TSW Generated by South Carolina in FY24

Total TSW Generated in South Carolina: 16,635,580.89 TONS

CHART 5.5: TSW Disposed of in Class 3 Landfills from South Carolina and Out-of-State by Type of Waste in FY24

Total TSW Disposed Of in Class 3 Landfills: 9,256,546.00 TONS

Tipping Fees

Here are the average fees calculated from the reported data for FY24:

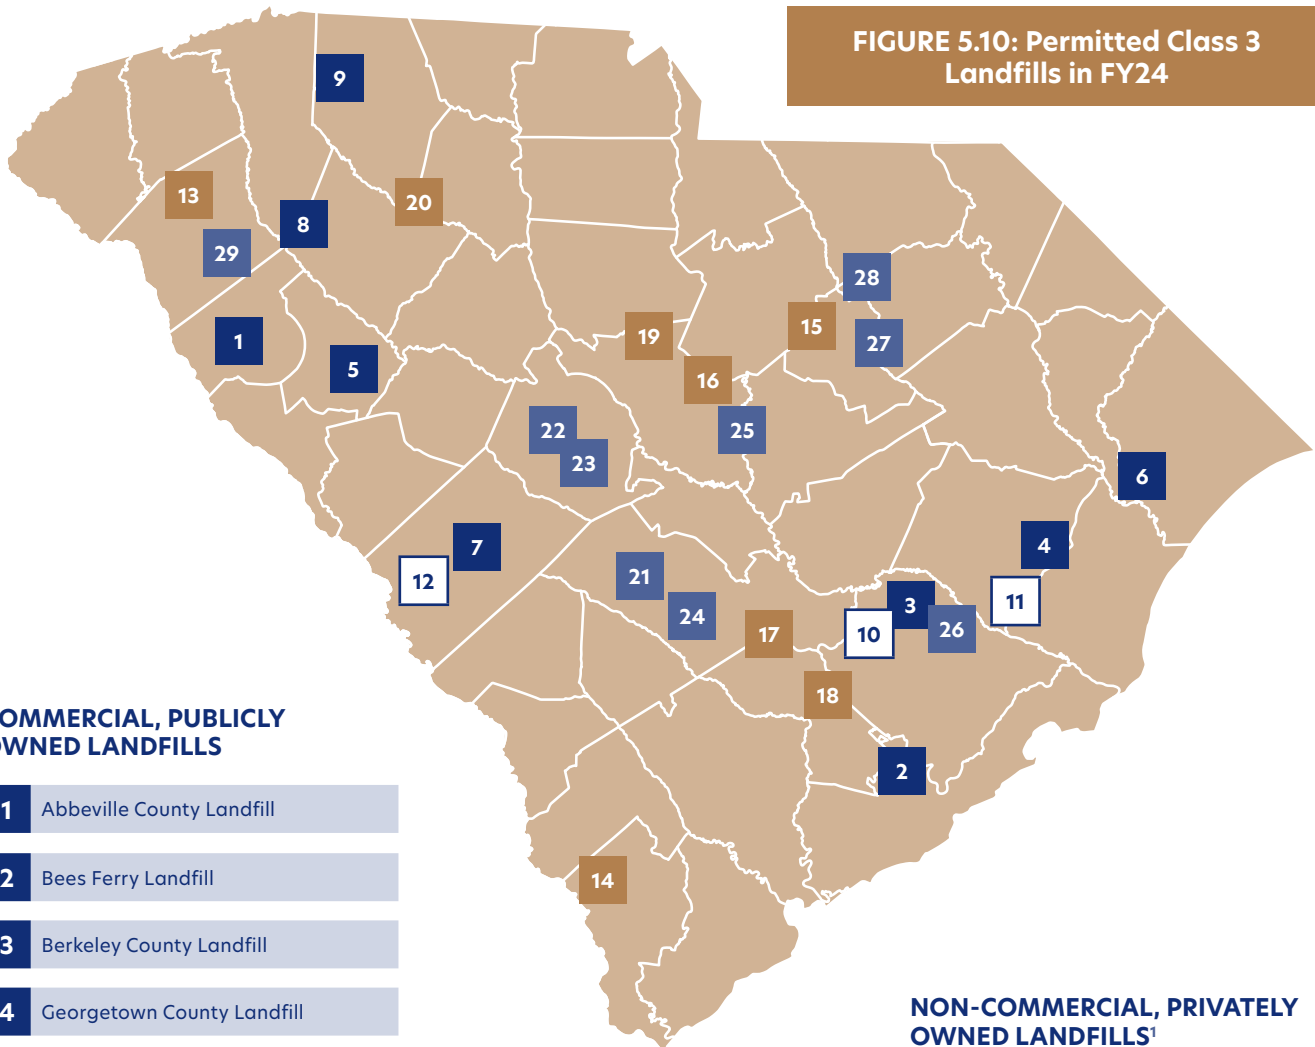

- **Class 1: \$7/ton** - Of the 29 permitted Class 1 landfills, 12 reported an average tipping fee;
- **Class 2: \$24/ton** - Of the 77 permitted Class 2 landfills, 53 reported an average fee; and
- **Class 3: \$45/ton** - Of the 17 Class 3 commercial landfills required to report tipping fees, 17 facilities reported fees.

Recycling by Commodity

Recycled MSW is measured by category and commodity. Each of the eight categories listed below is comprised of specific items (i.e., commodities). All material recycled is measured by weight.

1 Glass (i.e., primarily containers for beverages, food and other products) at one time was a traditional item accepted in residential recycling programs. The recycling environment has changed, however, as local programs nationwide - including South Carolina - have dropped glass collection due to unfavorable economics (i.e., high processing costs and low market value).

2 Metal is a traditionally accepted recyclable that includes aluminum cans, ferrous, non-ferrous, steel cans, and other mixed scrap metal.

3 Paper is a traditionally accepted recyclable that includes cardboard, magazines, mixed paper, newspaper and inserts, office paper, and paperboard.

4 Plastic is a traditionally accepted recyclable that includes PET (#1), HDPE (#2), vinyl (#3), LDPE (#4), PP (#5), PS (#6), commingled PET and HDPE, and other mixed plastic.

5 Banned items cannot be disposed of by law in South Carolina and must be recycled. These items include appliances, electronics, lead-acid batteries, used motor oil, and whole tires. Yard trimmings are banned from Class 3 landfills, but may be disposed of in Class 1 or Class 2 landfills.

6 Miscellaneous items include antifreeze, cooking oil, fluorescent bulbs, hazardous household material, inkjet/toner cartridges, mattresses, paint, rechargeable batteries, textiles, used motor oil filters, and wood packaging as well as other specialty items. These items vary by program.

7 Organics include yard trimmings and food waste. Yard trimmings are banned from Class 3 landfills but may be disposed of in Class 1 or Class 2 landfills.

8 Commingled items - also known as single stream - are recyclable items collected together, not sorted by type.

Recycling Market Development

South Carolina Recycling Market Development reports that the state's recycling industry continues to be a key contributor to the economy. Four companies made **\$45.7 million** in capital investment, potentially creating **164 jobs**. Companies that made notable investments include DCC Metal Recycling (Dillon), Princeton NuEnergy, Inc. (Chester), Nova Molecular Technologies, Inc. (Sumter), and Eveon Containers, Inc. (Charleston).

The commodities are metals, lithium-ion, and chemicals. These investments will have a positive impact on these recycling sectors.

- **Manufacturing**
- **Automotive**
- **Metal & Fabricated Metal Products**
- **Consumer Products**
- **Warehouse & Distribution**

Since 2019, more than **\$6.63 billion** has been invested into the state's recycling industry with an estimated **4,934 jobs** created.

Recycling by State & County

Counties are required by the Act to submit annual reports to SCDES providing the amount and type of MSW recycled each FY. South Carolina has a 50 percent or more MSW recycling goal and 3.25 p/p/d or less disposal rate goal. Since FY01, South Carolina has recycled 963,546 tons of MSW.

Clarendon, Colleton, Darlington, Dorchester, Kershaw, Lancaster, Laurens, Marion, Marlboro, McCormick, Pickens, Union, Williamsburg and York - met the disposal rate goal of 3.25 pounds per person per day (p/p/d) or less.

In FY24:

- **Two counties - Chesterfield and Lee** - met the recycling rate goal of 50 percent or more MSW recycled and the disposal rate of 3.25 p/p/d; and
- **Twenty counties - Abbeville, Aiken, Allendale, Anderson, Berkeley, Calhoun,**

Figure 7.3 highlights the counties that met the waste reduction goal.

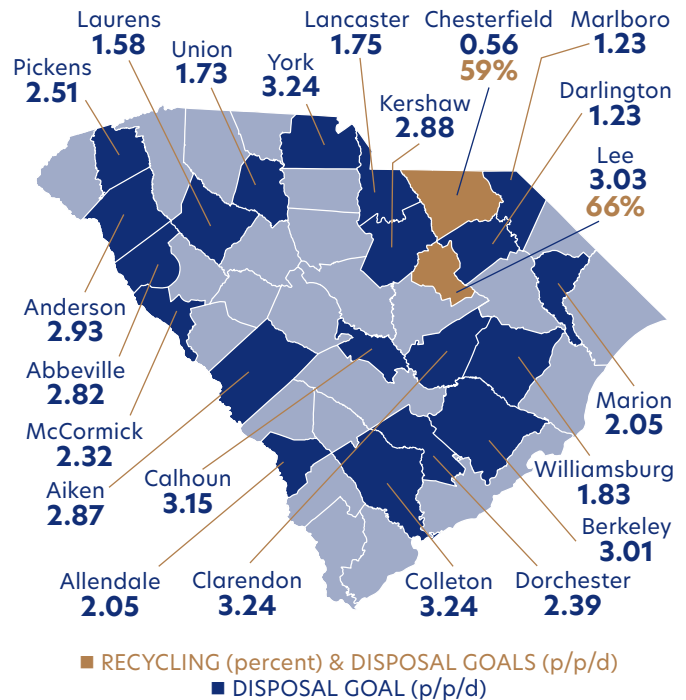

TABLE 7.1: S.C. MSW Recycling Tonnages

	TONS	+/- IN TONS FROM THE PREVIOUS FY	CHANGE FROM THE PREVIOUS FY
FY20			
ALL MSW	1,141,299	-167,687	-12.8%
RESIDENTIAL ONLY	501,689	+15,686	+3.2%
FY21			
ALL MSW	1,183,984	+42,685	+3.7%
RESIDENTIAL ONLY	531,621	+29,932	+6.0%
FY22			
ALL MSW	1,161,924	-22,060	-1.9%
RESIDENTIAL ONLY	661,664	+130,043	+21.8%
FY23			
ALL MSW	1,135,905	-26,019	-2.24%
RESIDENTIAL ONLY	586,290	-75,374	-12.08%
FY24

Improving Solid Waste Management

Recommendations for FY24

1 Complete a wide-ranging waste characterization analysis. In the 31 years since the passage of the Act, SCDES has not conducted a thorough analysis of waste generated in South Carolina. Instead, it has relied on data collected by local governments, EPA, and independent organizations.

Understanding what makes up South Carolina's waste is essential for planning - a first step in devising strategies, priorities, and goals to prevent and reduce waste, recover more material, develop successful recycling markets, and conserve resources.

The analysis should be comprehensive to not only include the traditional statewide MSW stream (e.g., aluminum, cardboard, glass, paper, plastic, steel, food waste), but under-addressed commodities such as C&D debris and tires as well as newer commodities like solar panels and rechargeable batteries. The addition of C&D debris means audits will need to be conducted at both Class 3 and Class 2 landfills. Recycling markets also need to be addressed.

2 Update the State Plan. The Act (Section 44-96-60) requires SCDES to develop and maintain a comprehensive State Plan for managing solid waste generated in South Carolina. In turn, county governments or regions must develop and maintain solid waste management plans consistent with the State Plan.

The State Plan is essential. It is the foundation for the work that must be done to manage solid waste in a socially, economically, and environmentally responsible manner. It establishes the framework, goals, priorities, strategies, and overall direction of these efforts.

Although the annual report is considered an update of the State Plan, a thorough revision of the State Plan has not been done since 1999. Solid waste management has changed dramatically since then and the State Plan needs revision to reflect these changes in commodities, technology, and markets. The revision should

be coordinated with the completion of the waste characterization analysis. This two-step approach will provide South Carolina the information to plan smartly to address the next decade.

3 Address challenges facing scrap tire management. South Carolina's scrap tire management program has been a success since its beginning in fiscal year 1994 (July 1, 1993 to June 30, 1994) - with counties recovering more than 110 million tires from current generation and stockpiles.

The end-of-life management of scrap tires is addressed in the Act (Section 44-96-170), which bans the landfill disposal of whole tires and places a \$2 fee on the purchase of new tires for the proper management of scrap tires.

Nearly 30 years later, two key issues have emerged that threaten the program: insufficient funding and limited markets.

- 1. Current funding cannot match the significant increasing costs for the collection, hauling, and processing of waste tires** - resulting in a spiraling price tag for county governments. These increased costs will limit scrap tire collection services and/or force moving funding from traditional recycling programs to offset the increase.
- 2. Recycling markets are limited.** Markets such as tire-derived fuel, crumb rubber, and civil

Legislative Update for FY24

Each year, South Carolina continues to strengthen solid waste management within the state. Legislation discussing solar panels was a key topic in the past FY year.

- Solar Panels** - R. 61-107.20, Solar Energy Systems, went into effect on May 24, 2024. This regulation manages the of the end-of-life photovoltaic modules and energy storage system batteries on solar projects in excess of 13 acres.

engineering applications are available with emerging technologies on the horizon, but most are not economically feasible and/or face resistance from various stakeholders.

These issues are being addressed with the reconvening of stakeholders via the S.C. Scrap Tire Sustainability Coalition. This work is a priority and needs to continue until solutions are found.

4 Maximize food waste reduction and recovery. Food waste is the No. 1 item Americans throw away. In fact, the United States discards more food than any other country in the world - nearly 80 billion pounds every year. That's estimated to be 30-40 percent of the nation's entire food supply.

Wasted food wastes resources. Any labor, energy, water, land and other resources used to produce, package and move food from the farm to our plates are lost. In addition, wholesome food that could have helped families in need is lost. Also lost is the money spent to buy food that is never eaten.

To address this issue, SCDES created the Don't Waste Food SC (DWFSC) campaign to raise awareness of the negative economic, environmental and social impact of food waste. DWFSC addresses all producers of food waste, but has priority focus on where the most food waste is generated - at home. Food waste, however, is a problem with solutions.

Here are basic recommendations.

- **Continue to promote the DWFSC campaign.**
- **Use the data from the waste characterization analysis** (see first recommendation) to re-evaluate plans to meet EPA's food waste reduction goal.
- **Increase consumer education and outreach efforts** by providing data on food storage, food date labels, and food donation.
- **SCDES and the S.C. Department of Education must increase efforts** to minimize food waste in the school meals program.
- **SCDES must continue to provide technical assistance, curriculum lessons, and other educational material as well as**

grant funding to implement reduction and composting initiatives at schools.

- **Encourage food waste prevention and recovery by businesses.**
- **SCDES must continue to assist and provide grant funding to local governments to implement reduction and organics recovery.** This should include backyard composting, potential government programs, and government support to commercial composting facilities.
- **In partnership with the S.C. Department of Commerce Recycling Market Development program and other stakeholders, grow commercial organics recovery infrastructure.**

5 Promote and develop regionalization through a statewide hub-and-spoke recycling infrastructure. Hub-and-spoke recycling is a system that creates hubs - regional recycling processing centers in larger communities where recyclables are prepared and sold to markets - and spokes - programs in smaller nearby communities that deliver their recyclables to the hub for processing.

This system provides an opportunity to increase the recovery of recyclables and more efficiently use limited grant funding. With smaller populations, rural communities nationwide struggle to provide cost-effective recycling services because of the low volume of recyclables produced. The hub-and-spoke system allows spokes that cannot go it alone an opportunity to reduce operation costs or begin programs. Hubs benefit through better economies of scale and the consolidation of material for higher revenue. These systems have proven successful in Iowa, Nebraska, and New Mexico.

Long term, South Carolina will be facing potential landfill capacity issues. One of the first priorities for a hub-and-spoke system should be focused on the No. 1 item Americans throw away - food waste - from being disposed of in landfills through regional composting initiatives. One of the many economic and environmental benefits of this approach would be reducing the need to build new landfills.

SCDES's Office of Solid Waste Reduction & Recycling

The Office of Solid Waste Reduction and Recycling (Office) continues to provide technical assistance and grant funding to local governments. Below is a list of the key programs and campaigns. For more information, visit des.sc.gov/recycle.

RECYCLE RIGHT SC focuses on one of the largest issues facing recycling – contamination in the recycling stream. The campaign provides technical assistance and outreach material including artwork and messaging for billboards, cart stickers, door hangers, fliers and more for local government programs. For more information, please visit des.sc.gov/recyclerrightsc.

DON'T WASTE FOOD SC (DWFSC) is a collaborative outreach public awareness campaign that brings together shareholders from the public and private sectors dedicated to reducing food waste in South Carolina.

The goals of the campaign are to:

- **Increase the awareness of the economic, environmental and social impacts** of wasted food;
- **Inspire individuals, communities, restaurants, schools and others** to take action to reduce food waste through **prevention and donation**; and
- **Cut food waste in half** in South Carolina by 2030.

For more information, visit des.sc.gov/dwfsc.

SMART BUSINESS RECYCLING PROGRAM is a free, voluntary program designed to:

- **Help South Carolina companies reduce the environmental impact** of their operations;
- **Provide technical assistance to help businesses begin or expand green practices** such as waste reduction, recycling, composting, energy and water conservation and environmentally preferred purchasing; and
- **Recognize businesses** for their recycling and sustainability efforts with an annual awards program.

To participate, visit des.sc.gov/smartbusiness.

TAKE ACTION SC ENVIRONMENTAL EDUCATION PARTNERSHIP is designed to inform, inspire and empower students and teachers to protect and preserve the environment. The program offers lessons, support material, teacher workshops and classroom presentations to promote composting, recycling, waste reduction, litter prevention and sustainability.

The centerpiece of the program is SCDES's "Action for a Cleaner Tomorrow: A South Carolina Environmental

Curriculum Supplement" ("Action"). The partnership is comprised of Coastal Carolina University, Palmetto Pride, Keep South Carolina Beautiful, S.C. Energy Office and SCDES. For more information, visit takeactionsc.org.

GREEN GOVERNMENT INITIATIVE provides assistance to state agencies in order for them to lead by example and operate in an environmentally-responsible manner.

Services provided include:

- **Technical assistance to support, improve or expand state agency waste reduction and recycling programs;**
- **Signage, posters and other material to promote programs;**
- **Current information about recycled-content product vendors and state contracts;**
- **Quarterly newsletters and workshops;**
- **S.C. State Agency Recycling Professionals Certification;** and
- **Recognition through an annual awards program.**

RECYCLE U offers free, non-regulatory services to colleges and universities in South Carolina that includes:

- **Site visits to assess waste reduction, reuse and recycling successes and opportunities;**
- **Technical assistance including phone/email consultations, research and contacts for potential markets, service providers and beneficial reuse;** and
- **The S.C. Collegiate Recycling Professionals Certification and other workshops.**

GRANT PROGRAMS continue to be an integral part of the Office's services. The Office awards annual funding to S.C. local governments, schools and colleges/universities.

In FY23, the grant program offered six types of grants totaling more than \$3.6 million. Those grants included the following:

- **Solid Waste Grants** issued to 58 local governments for general recycling;
- **Waste Tire Grants** issued to 48 local governments for waste tire recycling expenses. A special Waste Tire Stockpile Grant was issued to Anderson County for the cleanup of a former tire processing facility;
- **Used Oil Grants** issued to 49 local governments for expenses related to used oil recycling;
- **Collegiate Recycling Grants** included 12 grants to colleges and universities; and
- **Recycling Education Grants** issued to 26 K-12 schools.

ABOUT THIS REPORT

The S.C. Solid Waste Management Annual Report - prepared by the S.C. Department of Environmental Services (SCDES) - is a requirement of the S.C. Solid Waste Policy and Management Act of 1991 (Act) and must be submitted to the Governor and General Assembly annually by March 15.
