A. SUMMARY

F&ME Consultants has performed this Phase II Environmental Site Assessment on the 0.49-acre tract located at 2309 Russell Street in Orangeburg, South Carolina for South Carolina State University.

This Phase II Environmental Site Assessment has been performed as recommended in F&ME Consultants Phase I Environmental Site Assessment (October 3, 2005) because of the existence of underground storage tanks.

The subsurface investigation was performed on September 25, 2006. This investigation consisted of two (2) soil/groundwater sampling borings to determine the potential presence of petroleum hydrocarbon release from the existing underground storage tanks (UST's).

The soil/groundwater sampling was conducted in accordance with the USEDA, SCDHEC, and analytical laboratory protocols.

The results of the laboratory tests indicate the presence of petroleum hydrocarbon and lead in the soil and groundwater above SCDHEC risk-based screening levels. Therefore, SCDHEC Bureau of Land and Waste Management (UST Program) will need a copy of the report to submit the laboratory results to the SCDHEC Assessment and Corrective Action Division for their review and comments.

If there are any questions concerning this Phase II Environmental Site Assessment, or if we can be of any further assistance on this project, please do not hesitate to contact us. We appreciate the opportunity to have provided this service.

Sincerely,
F&ME Consultants

B. INTRODUCTION

1. Purpose

F&ME Consultants has performed this Phase II Environmental Site Assessment (ESA) for South Carolina State University (SCSU) on the 0.49-acre tract located at 2309 Russell Street in Orangeburg, South Carolina (Appendix II, Figure 1).

Since SCSU is considering the purchase of this property, the State requires an environmental site assessment to determine the potential for current and future liability (i.e. soil/groundwater contamination). This potential soil/groundwater contamination is attributed to the leakage of the on-site underground storage tanks (UST's).

2. Scope of Work

F&ME has located five UST's and potentially a sixth UST. Once the UST's were located, two (2) soil/groundwater sampling boreholes were performed on September 25, 2006. Borings were performed utilizing a CME-55 drill rig. The groundwater was encountered at approximately 22 feet to 25 feet below ground surface in both bore holes. Soil and groundwater samples were obtained for laboratory analysis for petroleum constituents (SCDHEC approval September 20, 2006, Appendix I).

3. Records Review

Historical records (i.e. property deeds, tax assessor's records) make no mention of a vehicular service station. However, the reasonably ascertainable aerial photographs indicate building structures on the tract as early as 1948 (Appendix II).

SCDHEC, Freedom of Information, EQC, records were reviewed. No past or to-date releases have been recorded. The first indication of the presence of underground storage tanks (UST's) was identified on September 9, 2005 during the Phase I Environmental Site Assessment (Phase I ESA) by F&ME Consultants. This report indicated ten (10) fill pipe locations. After several extended rainfalls, the surface sands had washed away and twelve (12) fill pipe and valve covers were identified on September 14, 2006. Also, on this date, ground penetrating radar (GPR) was used to locate five (5) UST's and potentially a sixth UST. However, due to the close proximity of the UST's, it proved difficult to outline the UST's on the surface using the GPR. This is typical of any return signal produced by a GPR instrument.

4. Analytical Tests

The laboratory test program for potential petroleum contamination included analysis for benzene, toluene, ethylbenzene, xylenes (BTEX), polycyclic aromatic hydrocarbons (PAH), naphthalene, methyl tert-butyl ether (MTBE), and lead.

The results of the laboratory tests are exhibited in Table I for a comparison with SCDHEC reporting limits and SCDHEC risk-based screening levels for soil and groundwater. As indicated in the table, lead and petroleum hydrocarbon components exceed reporting limits and risk-based screening levels. Therefore, SCDHEC, Bureau of Land and Waste Management, will submit the laboratory results to the Assessment and Corrective Action Division for their review to determine the need for further assessment.

After SCSU and the property Owner have reviewed this report, a copy has to be sent to SCDHEC (Appendix V does not have to be included in the SCDHEC copy). The copy to SCDHEC needs to be submitted by the property Owner no later than November 3, 2006.

If desired, F&ME Consultants can submit the report to SCDHEC. The property Owner will need to send us a transmittal letter (addressed to SCDHEC) requesting a review of the laboratory data. The report needs to be addressed to:

RE: Vacant Lot on the Corner of Buckley & Russell Streets (aka 2309 Russell St.)

Dear Mr. Wright,

This letter is a follow up to our phone conversation today wherein you have given your verbal approval for F&ME Consultants to perform a Phase II Environmental Survey of your property on the corner of Buckley & Russell Streets.

With your written permission, a representative of F&ME will come on site beginning September 11, 2006. As we discussed samples of soil and ground water will be collected and laboratory tested for contamination. F&ME is estimating 5 borings may be necessary at 5 feet intervals to collect the samples. All work will conclude by September 30, 2006. Please be aware, due to the presence of underground tanks on the property, SCDHEC will require a copy of the laboratory test results.

By signing below you give your permission for F&ME and/or its representative, acting on behalf of South Carolina State University to enter the subject property and to drill for samples of soil and ground water.

Dear Mr. Miner:

F&ME CONSULTANTS has been authorized to perform a Phase II ESA on the above referenced property to determine the potential for the presence or absence of hydrocarbon contamination.

The scope of our work will involve using our Ground Penetrating Radar to locate the underground storage tanks. Once located, subsurface drilling to obtain soil and groundwater samples for laboratory analysis for potential hydrocarbon contamination will be performed.

We propose to perform five (5) borings on the property (to approximately 20 feet, with soil sampling at 5-foot intervals and at groundwater). Depending upon what we observe (using on-site analysis with an OVA meter), the number and locations of subsurface borings may be adjusted.

We will not install any temporary or permanent monitoring wells. However, all bore holes will be drilled and decommissioned according to SCDHEC regulations.

All soils/groundwater samples determined (on-site) to exhibit elevated levels of petroleum hydrocarbons, will be containerized on-site (i.e. sealed drums) for future removal (if determined necessary by F&ME).

AASHTO ACCREDITED
LABORATORY

Request to Install Groundwater Monitoring Wells received September 19, 2006
Orangeburg County

Dear Mr. Powell:

The Underground Storage Tank (UST) Program has received your request to perform soil borings and/or monitoring wells at the referenced UST facility. The submittal has been placed on file. Monitoring well approval to perform 5 soil borings and/or install monitoring wells in accordance with *South Carolina Well Standards*, R.61-71 is enclosed. Please submit a monitoring well record form (DHEC Form 1903) and analytical results of all soil and/or groundwater sampling to me within 30 days of receipt of the analytical results.

On all correspondence concerning this facility, please reference the UST permit and monitoring well approval numbers. If you have any questions, please contact me at (803) 896-6944.

Sincerely,

Denise M. Place

Monitoring Well Approval

Approval is hereby granted to: F&ME Consultants
Facility: Former Service Station, 2309 Russell St, Orangeburg, SC
County: Orangeburg

This approval is for the installation of 5 soil borings and/or groundwater monitoring wells. The monitoring wells are to be installed in the approved locations. Monitoring wells are to be installed following the South Carolina Well Standards, R.61-71, and the applicable guidance documents.

Please note that R.61-71 requires the following:

1. All wells shall be drilled, constructed, and abandoned by a South Carolina certified well driller per R.61-71.D.1.
2. All monitoring wells shall be labeled as required by R.61-71.H.2.c.
3. A Water Well Record Form or other form provided or approved by the Department shall be completed and submitted to the Department within 30 days after well completion or abandonment unless another schedule has been approved by the Department. The form should contain the "as-built" construction details and all other information required by R.61-71.H.1.f
4. All analytical data and water levels obtained from each monitoring well shall be submitted to the Department within 30 days of receipt of laboratory results unless another schedule has been approved by the Department as required by R.61-71.H.1.d.
5. If any of the information provided to the Department changes, notification to Denise Place (tel: 803-896-6944 or e-mail: placedm@dhec.sc.gov) shall be provided a minimum of twenty-four (24) hours prior to well construction as required by R.61-71.H.1.a.
6. All temporary monitoring wells shall be abandoned within 5 days of borehole completion using appropriate methods as required by R.61-71.H.4.c. All other wells shall be properly developed per R.61-71.H.2.d.
7. Departmental approval is required prior to abandonment of all monitoring wells as required by R.61-71.H.1.a.

This approval is pursuant to the provisions of Section 44-55-40 of the 1976 South Carolina Code of Laws and R.61-71 of the South Carolina Well Standards and Regulations, dated April 26, 2002. A copy of this approval should be on the site during well installation.

LABORATORY ANALYTICAL REPORT

October 05, 2006

Client: F & ME Consultants (2201)
P. O. Box 5855
Columbia, SC 29250
Attn: Robert Powell

Work Order: NPI3570
Project Name: F & ME Consultants
Project Nbr: E4303.23 / 2309 Russell St.
P/O Nbr: E4303.23
Date Received: 09/27/06

SAMPLE IDENTIFICATION

B-1
B-1
B-2
B-2

LAB NUMBER

NPI3570-01
NPI3570-02
NPI3570-03
NPI3570-04

COLLECTION DATE AND TIME

09/25/06 10:35
09/25/06 11:07
09/25/06 12:39
09/25/06 01:30

An executed copy of the chain of custody, the project quality control data, and the sample receipt form are also included as an addendum to this report. If you have any questions relating to this analytical report, please contact your Laboratory Project Manager at 1-800-765-0980. Any opinions, if expressed, are outside the scope of the Laboratory's accreditation.

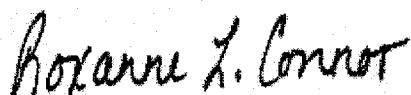

This material is intended only for the use of the individual(s) or entity to whom it is addressed, and may contain information that is privileged and confidential. Re: Vacant Lot
2309 Russell St., Orangeburg, SC
Permit ID #19268

Dear Mr. Wright:

The UST Program has reviewed an environmental assessment performed at the above referenced location. Petroleum constituents were discovered in excess of the South Carolina Risk Based Screening Levels; therefore, additional assessment will be required.

The report has been referred to the UST Program's Corrective Action Section. A project manager will forward a written directive explaining in the requirements of the assessment and cleanup process.

If you have any questions, please contact me at (803) 896-6944 or via email at placedm@dhec.sc.gov.

Re: Underground Storage Tank (UST) Information
Vacant lot at 2309 Russell St., Orangeburg, SC

Dear Mr. Wright:

During a recent Phase II Environmental Site Assessment at the above referenced location, F&ME Consultants encountered previously undisclosed USTs.

Enclosed please find copies of the "Notification for Underground Storage Tanks No Longer in Operation" form, a tank closure information packet, and the Underground Storage Tank Assessment Guidelines. Please complete and return to the UST Program.

Register the tanks by completing the "Notification for Underground Storage Tanks No Longer in Operation" form and submitting that completed form to us. Voluntary registration of the tanks will ensure that any petroleum release will maintain its eligibility for coverage by the State Underground Petroleum Environmental Response Bank (SUPERB) Account. For each eligible and qualified release, the SUPERB Account will pay up to one million dollars in costs for site rehabilitation activities and third party lawsuits once the tank owner satisfies a \$25,000 deductible.

Permanently close the tanks by either filling them in place or having them removed from the ground. To do this, the tank owner should first complete the "Tank and Sludge Disposal" form (in the tank closure information packet) and submit it to us at least thirty days prior to the closure event. Our Permitting coordinator, Ms. Alison Hathcock, can be reached at (803) 896-6942. She will be happy to answer any questions regarding the tank closure process.

Ensure that the required closure report is submitted to us within the required timeframe and includes all necessary supplemental documentation. Because contamination has been documented, sampling will not need to be done. The format for the closure report can be found in Attachment 1 of the UST Assessment Guidelines (pages 13-25). Please note: The tank owner must sign the closure report in Section V. (page 14).

Address

RE: NOTICE OF VIOLATION

Vacant Lot 19268 Facility name, Permit ID#

2309 Russell St. Address

Orangeburg, SC 29116

Dear Mr. Wright:

On _____ a compliance inspection of the underground storage tank (UST) system(s) was performed at this facility.
(Date)

PART ONE: Items identified in this part require immediate attention.

Section 280

- .10(e) Introduction of petroleum or petroleum products into an UST for which the owner does not hold a currently valid registration.
- .20/.21 Failure to equip a permitted or upgraded site with spill, overfill, and corrosion protection.
- .41 Failure to equip pressurized line with an automatic line leak detector.
- .61 Failure to report a release.
- .62 Failure to abate a confirmed release.

Because the violations indicated in this section could prevent access to the SUPERB account, please correct them immediately. This situation is being referred to the Enforcement Section for further action.

How To Get In Compliance

FACILITY: Vacant lot PERMIT ID#: A268 DATE: 3/11/08

Mail requested information to: **Compliance Section, UST Program, 2600 Bull Street, Columbia, SC, 29201.**

Send the following:

- Completed and signed notification form
- Completed and signed Application for Permit to Install
- Completed and signed Application for Permit to Operate
- Completed and signed Release Report
- Repair and testing records for _____
- Results of:**
 - Tank tightness test
 - Piping tightness test
 - Corrosion protection system test
 - Line leak detector function check
 - Annual function check for _____
- Monthly inventory control logs for _____
- SIR records for _____
- Third party certification for _____
- Proof of suction system check valve location
- Monthly tank and/or line monitoring logs (monitoring wells, ATGs, electronic leak detectors, etc.)
- Rectifier log for _____
- Financial responsibility information

Run the following tests and send a copy of the results:

- Line leak detector function check
- Piping tightness test
- Tank tightness test
- Corrosion protection system test
- Site check (use the Assessment Guidelines)
- Other _____

Install the following and send a copy of the invoice:

- Line leak detector on each pressurized line
- Spill prevention equipment
- Overfill prevention equipment
- Corrosion protection on _____
- Drop tubes in fill pipe
- New gauging stick
- Other _____

Start doing the following:

- Daily inventory measurements
- Measurements to 1/8"
- Leak check at end of month
- Water measurement
- Monthly test using ATG
- Monthly piping test (eld)
- Manual tank gauging
- Maintain rectifier log

Empty tanks to less than
one inch and send in
documentation.

Other:

If you have questions about any of these items, call the UST compliance staff at 1-803-896-7957.

Important Test Dates for your Site:

Cathodic Protection System test (3 years) Due Date _____

Line Leak Detector Function Check (annual) Due Date _____

Sump Sensor Function Check (annual) Due Date _____

Line Tightness Test (annual/3 years) Due Date _____

Tank Tightness Test annual/5 years) Due Date _____

PART TWO: Further violations noted by the inspector were:

Section 280.

- . 34(a) Failure to provide records to the Department upon request.
- . 41(b)(i)(ii) Failure to conduct an annual line tightness test on pressurized line or have monthly monitoring.
- . 41(b)(2) Failure to conduct a line tightness test every 3 years on "American" suction piping.
- . 50 Failure to report a suspected release.
- . 111 Failure to maintain Certificate of Financial Responsibility on site.
- . 40(a) Failure to provide an adequate release detection method.
- . 30(a) Failure to ensure that releases due to spilling or overfilling do not occur.
- . 31(a) Failure to maintain and operate cathodic protection system.
- . 31(b1) Failure to conduct 3-year cathodic protection system test.
- . 31(c) Failure to conduct 60-day inspection of impressed current system.
- . 44(a) Failure to conduct annual test of automatic line leak detectors.

Other

-
-

Part Three: Comments:

Contamination has been documented on this property. The underground storage tanks need to be emptied to less than ~~1~~ / inch in order to abate the release.

The attached list identifies the actions needed to bring the facility into compliance. By 3-28-08 send proof of the corrective actions you have taken to:

Compliance Section, UST Program
2600 Bull Street
Columbia, South Carolina, 29201.

Please use the Permit ID number on correspondence. If you have questions, call the UST Compliance Section, at (803) 896-7957, Fax (803) 896-6245. Website www.scdhec.gov/ust.

How To Get In Compliance

FACILITY: 2309 Russell st., Orangeburg, SC PERMIT ID#: 19268 DATE: 12-12-06

Mail requested information to: **Compliance Section, UST Program, 2600 Bull Street, Columbia, SC, 29201.**

Send the following:

- Completed and signed notification form
- Completed and signed Application for Permit to Install
- Completed and signed Application for Permit to Operate
- Completed and signed Release Report
- Repair and testing records for _____
- Results of:
 - Tank tightness test
 - Piping tightness test
 - Corrosion protection system test
 - Line leak detector function check
 - Annual function check for _____
- Monthly inventory control logs for _____
- SIR records for _____
- Third party certification for _____
- Proof of suction system check valve location
- Monthly tank and/or line monitoring logs (monitoring wells, ATGs, electronic leak detectors, etc.)
- Rectifier log for _____
- Financial responsibility information

Run the following tests and send a copy of the results:

- Line leak detector function check
- Piping tightness test
- Tank tightness test
- Corrosion protection system test
- Site check (use the Assessment Guidelines)
- Other _____

Install the following and send a copy of the invoice:

- Line leak detector on each pressurized line
- Spill prevention equipment
- Overfill prevention equipment
- Corrosion protection on _____
- Drop tubes in fill pipe
- New gauging stick
- Other _____

Start doing the following:

- Daily inventory measurements
- Measurements to 1/8"
- Leak check at end of month
- Water measurement
- Monthly test using ATG
- Monthly piping test (eld)
- Manual tank gauging
- Maintain rectifier log

Other:

Please send documentation
that tanks have been pumped
to less than 1/3 (disposed manifest)

If you have questions about any of these items, call the UST compliance staff at 1-803-896-7957.

Important Test Dates for your Site:

Cathodic Protection System test (3 years) Due Date _____

Line Leak Detector Function Check (annual) Due Date _____

Sump Sensor Function Check (annual) Due Date _____

Line Tightness Test (annual/3 years) Due Date _____

Tank Tightness Test annual/5 years) Due Date _____

RE: NOTICE OF VIOLATION

Vacant Lot 19268 Facility name, Permit ID#

2309 Russell St. Address

Orangeburg, SC 29116

Dear Mr. Wright:

On _____ a compliance inspection of the underground storage tank (UST) system(s) was performed at this facility.
(Date)

Enf. ID # 08-0172-UST
Resolved 5-22-08

PART ONE: Items identified in this part require immediate attention.

Section 280

- .10(e) Introduction of petroleum or petroleum products into an UST for which the owner does not hold a currently valid registration.
- .20/.21 Failure to equip a permitted or upgraded site with spill, overfill, and corrosion protection.
- .41 Failure to equip pressurized line with an automatic line leak detector.
- .61 Failure to report a release.
- .62 Failure to abate a confirmed release.

Because the violations indicated in this section could prevent access to the SUPERB account, please correct them immediately. This situation is being referred to the Enforcement Section for further action.

MEMORANDUM

TO: Vacant Lot / Bernie Wright File

UST # 19268

FROM: Charlie Strange, Environmental Health Manager
Regulatory Assistance Section
UST Program
Bureau of Land and Waste Management

DATE: October 28, 2008

RE: Vacant Lot
2309 Russell Street
Orangeburg, SC 29116

According to the Orangeburg County Tax Assessor and Deeds Office (803-533-6230) on 9-2-08, Bernie Wright is the current owner of the referenced property, according to the deed for the property. On 9-10-08 I spoke with Rebecca Abraham (803-534-5039), who owns a lot next door to the referenced site. She said that she knew James Sulton who operated a gasoline filling station on the referenced site, and that he was the last person to operate a gasoline filling station on the site. She said that he went out of business and sold the property. She also said that he died recently. The Social Security Death Index indicates that James Sulton died in April of 2008. According to 44-2-20 (11), based of the facts gathered, the responsible party issues cannot be resolved due to the death of the last known owner/operator. Therefore, a release from this site should be assigned as orphan status.

From: Denise M. Place
UST Regulatory Assistance Section
Assessment & Corrective Action Division
Bureau of Land and Waste Management

Subject: Vacant Lot
2309 Russell St., Orangeburg, SC
UST Permit #19268
Substantial Compliance Determination

The UST Program received a pre-buy assessment report documenting contamination at the above referenced location. Tanks are still present but have been emptied. The UST program has determined this site as an orphan and declared a release. In accordance with Section 44-2-115 of the State Underground Petroleum Environmental Response Bank (SUPERB) Act the Program will favor eligibility and find them in substantial compliance for this release. Due to lack of site history, a substantial Compliance worksheet will not be completed.

April 10, 2014

Bernie Wright
P.O. Box 275
Orangeburg, SC 29116

Re: Vacant Lot, Corner of Buckley & Russell St., Orangeburg, SC
Permit # 19268

Dear Mr. Wright:

The UST Management Division has received your request for a variance on sampling at the above referenced site. According to Subpart J Section 280.300 of the Underground Storage Tank Regulations, "The Department may vary the application of any provisions of these regulations, when, in its opinion, the applicant has demonstrated that an equivalent degree of protection will be provided to the State's waters."

Based on the conditional no further action issued on June 12, 2012 and the review of the available information concerning the site, the Division agrees to grant a variance on the closure sampling requirement.

Sincerely,

Denise M. Place

PO Box 275
Orangeburg, SC 29116

Re: Vacant Lot
Corner of Buckley and Russell Street
UST Permit ID #19268

Dear Tank Owner:

The Underground Storage Tanks (USTs) are out of compliance with the requirements of the South Carolina Underground Storage Tank Control Regulations, R.61-92, Section 280.70. Under the regulations, tanks that are temporarily closed for greater than twelve months that do not meet the corrosion protection standards must be permanently closed. In order to bring this facility into compliance with the regulations, the following must be done:

- Tank and sludge form must be completed and submitted
- Once approval for the removal is issued, then 48 hours notice must be given to the permitting coordinator prior to removal.

Please submit the requested information by March 4, 2014. If you have any questions, please contact me at the above address or by calling (803) 898-0587.

Sincerely,

Alison M. Hathcock

Alison M. Hathcock, M.S.

Permitting/Operator Training Coordinator
Division of Underground Storage Tank Management
Bureau of Land and Waste Management

02/06/14

Dear Ms. Alison

As I stated earlier, resoucer or funds to remove the underground tank on my lot, I do not have.
I am requesting what ever consideration possible be given to me on this matter. Sincerely, Bernie Wright
