Subject: **September** 2026 CA Progress Report

Mr. Cassidy:

In accordance with Item 19 of Consent Agreement (CA) 19-02-HW, this progress report is being submitted to you, including the following requested information:

(a) a brief description of the actions which Westinghouse has taken toward achieving compliance with the Consent Agreement during the previous month;
(b) results of sampling and tests, in tabular summary format received by Westinghouse during the reporting period;
(c) a brief description of all actions which are scheduled for the next month to achieve compliance with the Consent Agreement, and other information relating to the progress of the work as deemed necessary or requested by the Department; and
(d) information regarding the percentage of work completed and any delays encountered or anticipated that may affect the approved schedule for implementation of the terms of the Consent Agreement, and a description of efforts made to mitigate delays or avoid anticipated delays.

In response to the above requirements, the following is being reported to the Department since the last progress report submitted on **September 15, 2026.** The following progress report is for work occurring from **September 1- 30, 2026**:

(a) Actions during the previous month:
- Submitted the Uranium Source Assessment Report for areas upgradient of W-56 that may be associated with historical uranium (U) impact in groundwater in this area, including the supporting Technical Basis Document on September 29, 2026.
- Clemson University continues to prepare the draft treatability study report.

Pilot Study Work Plan
- Met with AECOM and site contractor on September 3 to evaluate the implementation strategies for underground injections associated with the U and Technetium-99 (Tc-99) pilot studies.

(b) Results of sampling and tests:
- None

(c) Brief description of all actions which are scheduled for the next month:
- Complete the October 2026 semiannual groundwater sampling (117 wells).

Pilot Study Work Plan
- AECOM will prepare the draft Injection Completion Report for the chlorinated volatile organic compound (CVOC) pilot study area near groundwater wells W-120 and W-121.
- Clemson University will continue to finalize nitrate analysis and continue preparing the draft treatability study report.
- Continue to plan and evaluate the implementation strategies for underground injections associated with the uranium and Tc-99 Pilot Studies.

(d) Percentage of work completed, and any delays encountered or anticipated:
- 100% of the **Remedial Investigation** is complete**.**
- 100% of the **Groundwater Flow Model** is completed.
- 100% of the **Feasibility Study Work Plan** is completed.
- 100% of the **Groundwater Fate and Transport Model** is completed.
- 90% of the **Feasibility Study** is completed.
- 100% of the **Pilot Study Work Plan** is completed.
- 61% of the **Pilot Study** is implemented.
- Currently there are no anticipated delays.

Respectfully,

Diana P. Joyner
