

Discussion and Development of Implementation Plan

Implementation Plan – Draft Objectives

Objective	Prioritization
Objective 1. Improve water use efficiency to conserve water resources	<i>K.C. Price will attempt to prioritizing strategies. Objectives will likely not be prioritized, recognizing that they each have multiple strategies, some of which may be a priority</i>
Objective 2. Communicate, coordinate, and promote findings and recommendations from the River Basin Plan	
Objective 3. Improve technical understanding of water resource management issues	
Objective 4. Protect water resources	
Objective 5. Improve drought management	
Objective 6. Promote engagement in the water planning process	

- Objectives should be ranked by importance and prioritized
- Each objective should include a justification describing its importance to water management in the basin
