

The U.S. Environmental Protection Agency (EPA) has completed its initial sampling activities in response to the former Burlington Industries Site in Cheraw, SC. When sampling results have been validated, those results will be forwarded to property owners.

The EPA On-Scene Coordinator has recommended that the Site be given priority for removal eligibility and efforts are being made to initiate cleanup activities. A meeting will be held early this summer to explain results, next steps and provide other valuable information to the Cheraw community.
