Re: VCC Activity Report dated October 31, 2016
Marsh Lumber Comp: 32 Site
Florence County
File #414343

Dear Mr. Collins:

The Department has reviewed the referenced report and offers the following comments:

1. Page 9, paragraph 6 states that "Analytical results for soil samples representing the deeper soil interval reported concentrations (of manganese) greater than the corresponding SSL. However, the deeper interval concentrations are actually less than the corresponding SSL. Please revise.
2. The analytical data in Appendix 1 include two copies of the groundwater SVOC data and no soil data. Please submit the soil data.
3. Due to the fact that several of the metals were detected in soil at levels exceeding the Protection of Ground Water SSLs, the Department is requesting that the groundwater be analyzed for metals at one location, MW-3. This well is located hydraulically downgradient of the soil sample collection locations.

Please submit a replacement Page 9 with the soil analytical data, to my attention, on or before February 15, 2016. The metals analysis of the groundwater from MW-3 can be performed during the next quarterly sampling event.

Sincerely,

Addie Walker, Project Manager
State Remediation Section
