Re: Review of Recovery Trench Removal/Replacement and Improvements Along Browns Creek Hillslope
Products (SE) Pipeline Lewis Drive Release, 112 Lewis Drive, Belton, SC
Anderson County
Site #18693
Petroleum Pipeline Release Reported December 8, 2014
Recovery Trench Removal/Replacement Along Browns Creek received November 6, 2020

Dear Mr. Dempsey,

The South Carolina Department of Health and Environmental Control (DHEC) has reviewed the above referenced documents. DHEC understands that the target of 30% granular activated carbon (GAC) sand mix was not met due to the excavation of the trench dimensions being larger than originally estimated. The 28% GAC, sand mix that was achieved will be sufficient at this time.

The effectiveness of the GAC/sand mix will be monitored through Browns Creek surface water sampling locations and permanent monitoring wells as outline in the *Groundwater and Surface Water Monitoring and Reporting Plan Approval (April 1, 2020 through March 31, 2021)* dated August 13, 2020, in the area of the former trench. All surface water analytical results that exceed DHEC surface water standards are to be reported to DHEC immediately upon receipt of laboratory analytical results.

Documents should continue to be provided in paper format and pdf via a disk with Site ID # 18693 and Products (SE) Pipeline Lewis Drive Release noted in a prominent location. Should you have any questions, I can be reached at (803) 898-7542 or mendenje@dhec.sc.gov. Faxes can be sent to (803) 898-0673.

Sincerely,

Ed Mendenhall, Hydrogeologist
Assessment & Non-Permitted Petroleum Section
Underground Storage Tank Management Division
Bureau of Land and Waste Management
