Re: Review of Third Trimester 2021 Monitoring Report (August 2021 through November 2021)
Products (SE) Pipeline - Lewis Drive Release, 112 Lewis Drive, Belton, SC
Anderson County
Site #18693
Release reported December 8, 2014
2021 Third Trimester Monitoring Report received February 22, 2022

Dear Mr. Dempsey,

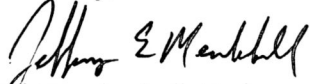

The South Carolina Department of Health and Environmental Control (DHEC) has reviewed the report and offers the following comments and/or recommendations are provided:

- 1) Due to the elevated water table at the site, ranging from 1.5' to 14.0' below ground surface, gauging for the presence of free phase product (FPP) will continue across the site and any FPP found will be removed.
- 2) If there is a change in site conditions such as increased product levels, product in areas that product was not previously found and/or product appears on surface waters, a new corrective action plan to address the product will need to be submitted and/or more frequent monitoring may be required to address any issue that arises.
- 3) The Hayfield Air Sparge Zone was shut down in October 2020 and at this time will remain off. The concentrations of petroleum chemicals of concern (CoCs) in monitoring wells within the area of influence of the system have continued to display an overall decreasing trend.
- 4) The Air Sparge System expansion to include new horizontal sparge wells in both the Browns Creek and Cupboard Creek start up is expected to begin by the end of July 2022
- 5) A new Groundwater Monitoring and Reporting schedule for the future groundwater and surface water sampling events will be submitted to DHEC.

In the future any proposed changes to the Corrective Action Plan Addendum (CAPA) must be provided in a stand-alone document. The reviewing of monitoring reports or any other miscellaneous documents provided by Products (SE) Pipeline or Jacobs that discuss changes to the CAPA do not constitute approval of changes to the CAPA.

DHEC should be notified a minimum of four days prior to any environmental work being conducted. Documents should continue to be provided in paper format and pdf via a disk with Site ID # 18693 and Products (SE) Pipeline Lewis Drive Release noted in a prominent location. Should you have any questions, I can be reached at (803) 898-7542 or mendenje@dhec.sc.gov. Faxes can be sent to (803) 898-0673.

Sincerely,

Ed Mendenhall, Hydrogeologist
Assessment & Non-Permitted Petroleum Section
Underground Storage Tank Management Division
