

CLEAN WATER ACT SECTION 319

GRANT

implement best management
practices to improve water quality
and human health in your area

The Clean Water Act Section 319 grant invites proposals for the execution of a watershed-based plan through best management practice (BMP) implementation. Implementation projects must incorporate BMPs for a waterbody that is included on the most recent 303(d) list or has an approved TMDL, and may include, as a portion of the project, a protection focus for high quality or threatened waters.

Basic Eligibility Requirements

- 40% **non-federal match**
- DHEC-approved watershed-based plan with **EPA's 9 elements**
- Cover **one to four** 12-digit HUCs
- At least 75% of Federal 319 funds must go toward on-the-ground **BMP implementation**

PROTECT & RESTORE WATER QUALITY

Let us help fund
your project

BEFORE

AFTER

BMP examples include but are not limited to:

- stream restoration
- conservation easements
- septic repair/replacement
- agricultural BMPs
- daylighting
- green infrastructure/LID
- bioretention basins
- oyster reef restoration
- urban retrofits

All projects must include an outreach/education component

Visit our [webpage](#) for more information about the 319 grant program.
